EDUCATION

University of Texas at Arlington | Arlington, TX

Master of Science in Computer Science | Aug 2023 - May 2025

- GPA: 3.6/4.0
- Relevant Coursework: Cloud Computing, Machine Learning, AI, Distributed Systems
- Awards & Certifications: Vruwink Outstanding Grad Student 2025, Graduate Certificate in Big Data Management and Data Sciences

NMIMS University | Mumbai, India

Bachelor of Technology in Computer Engineering | Jun 2018 - Apr 2022

- GPA: 3.56/4.0
- Relevant Coursework: Advanced Web Development, Object-Oriented Programming, Database Management

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, R, Scala, C, HTML, CSS, TypeScript

Backend & Frameworks: Node.js, Flask, Express, Spring Boot, Microservices, REST APIs

Frontend: React, Angular, Bootstrap

Databases: Oracle SQL, MySQL, MongoDB, SQLite, PL/SQL

Cloud & DevOps: Google Cloud Platform, AWS, Docker, Kubernetes, Git, CI/CD Pipelines, Agile Development

PROFESSIONAL EXPERIENCE

Software Engineer - Kopacetic Inc. | Arlington, Texas | August 2025 - Current

- Optimized backend codebase in Node.js and TypeScript, improving system performance and maintainability.
- Streamlined Docker builds for GCP deployment, reducing image size and build times by minimizing redundant library installations.
- Engineered and enhanced Angular frontend components to ensure a responsive, consistent user interface across screens and deliver new product features.

Associate Consultant - Oracle Financial Services Software Ltd. | Mumbai, India | Jun 2022 - Aug 2023

- Optimized SQL queries to reduce report generation time by 90%, from 5 hours to 30 minutes.
- Engineered scalable Java backend services using Spring Boot, integrating over 15 client-driven features for secure transaction processing.
- Resolved over 100 client-reported issues, including critical errors in SWIFT international transactions, boosting operational efficiency by 30%.
- Led onboarding and training for 5+ new employees, improving knowledge transfer and reducing ramp-up time.

PROJECTS

BotKonnnect - AI-Powered Phone Call Assistant

- Developed an AI-driven phone assistant using OpenAI API & Twilio, which improved call efficiency by 40%.
- Built a MERN stack dashboard for real-time business analytics, tracking key metrics like call volume and customer satisfaction.

Semantic Search Engine

- Engineered a search engine using NLP and Deep Learning on a large-scale IMDB dataset, increasing search accuracy by 35%.
- Utilized BERT-based semantic encoding and optimized retrieval speeds by 60% with Elasticsearch.

SecuroServe - Secure Chat App

- Collaborated on a real-time messaging application using a MEAN stack (MongoDB, Express, Angular, Node.js).
- Implemented end-to-end encryption to reduce security risks by 80% while enabling secure, low-bandwidth communication.
