About Me

I'm a developer who loves building websites with JavaScript and TypeScript, and I really enjoy the creative side of styling them with CSS. I take on diverse projects and focus on delivering clean, functional solutions. I'm always picking up new tech because this field moves fast and there's always something cool to learn.

Technical Skills

HTML5 & CSS3 | Bootstrap Framework | SQL | Typescript | Tailwind CSS | Git & GitHub | Node | Javascript | React.js

Education

Boston City Campus (2022-2024) — Diploma In Systems Development

Course focused programming, database management, and systems analysis. I gained practical experience in software design and problem-solving for real-world applications.

Full Stack Web Development (freeCodeCamp) (2023-2024)

Learned both front-end and back-end web applications using HTML, CSS, JavaScript, React, Node.js, and database integration through a hands-on, project-focused curriculum.

Experience

Software Developer — ThinkBack (2025)

Gamified memory journal to help users track and remember important tasks, earning points and maintaining streaks to improve recall.

Frontend Developer — Car-Tang (2025)

Frontend platform that brings together car inventories from wholesale rental providers, so users can easily browse options while we handle the traffic and exposure for them.

Personal Web Project — G-Tour (2024)

Frontend website where users can discover destinations and conveniently book tours, taxis, and hotels via affiliate links, with ads integrated for revenue.
