

Shikha Bhati

774-535-3766 | Shikhabhatids@gmail.com | Boston, MA |
Masters (MS) Computer Science | Clark University

Expert Data Professional with 4+ years of experience in Analytics, Statistics, Data Visualization, skilled in transforming complex data into actionable business insights. A strong communicator, adept at crafting compelling data narratives and driving strategic decisions.

PROFESSIONAL EXPERIENCE

Data Analytics Engineer | ALS Wholesale | (remote) Feb 2025 – Present

- Analyzed data with over 20 million rows in **SQL Redshift**, accounting for data discrepancies, **unstructured** product records, **missing** data points, and intricate relationships between 40+ tables, built data models and improving auditing by 25%.
- Implemented full-cycle **ETL** processes across diverse sources like **Splunk**, **AWS**, **Snowflake**, 3rd party **APIs** and used Snowflake **SQL CTEs**. **Procedure and Tasks** to generate reproducible sales and inventory **metrics reports** for business teams.
- Automated **data pipeline development** using **Python**, Apache **Airflow**, for Snowflake, Salesforce, and **Google** Analytics data in **AWS S3**, enhancing data quality and availability, improving efficiency for the inventory management and sales tracking by 20%.
- Designed a remote inventory monitoring dashboard in **Splunk**, leveraging **advanced queries**, and **visualization** to assess product connectivity and data integrity and proactively recommend fixes for retailers, reducing remote monitoring **costs** by \$40k/month.
- Created a dashboard **application** in Snowflake Streamlit using **Python** to identify underperforming products using **NLP**, aggregated with the sales metrics while generating **reports in PowerBI** and **sending slack notifications**, improving detection by 35%.
- Cross-functionally collaborate with **data engineers**, **PMs** and **business stakeholders**, **operations teams**, and **analytics teams**, strategizing initiatives for performance enhancement, and discussing **data best practices**, industry trends, and **continuous improvements** to meet company goals.

Data Analytics Intern | ALS Wholesale | (remote) May 2024 – Dec 2024

- Orchestrated **advanced SQL analysis** and **dbt** to dissect sales, inventory, and supply chain data, unveiling critical patterns and anomalies, and developed a **predictive inventory/operations model** that reduced equipment downtime and annual operational costs by up to \$150,000/month.
- Identified and resolved data integrity issues in inventory and product decommissioning processes using **Snowflake SQL**, and **Redshift**, ensuring accurate tagging and improving **data reliability** by 20%, enhancing overall analytical accuracy for **operational reporting and compliance**.
- Developed and automated comprehensive **Tableau dashboards** for real-time performance tracking of sales, inventory, and operational metrics, empowering the operations and quality assurance teams with **strategic insights** to track panel performance better.

Associate Analyst | Congruex | (remote) Sep 2021 – Jan 2023

- Implemented Apache **Spark** to preprocess and analyze massive datasets in network performance and telecom simulation datasets by performing **log extraction**, **cleaning**, and **normalization** of unstructured telemetry data, ensuring quality assurance and data-driven network optimization reporting,
- Spearheaded the development of **automated reporting solutions** using **MS PowerAutomate**, and Python scripts for complex data manipulation, and utilizing advanced MS Excel features to optimize data workflows and drive operational efficiencies.
- Pioneered the adoption of **Power BI** in the team to create **dynamic dashboards** and streamline the weekly reporting processes.
- Led** a specialized **team of 4** in applying NLP and Machine Learning (**K-means clustering**) to a proprietary dataset of network logs and system telemetry, improving anomaly detection and reducing debugging time by 35%.

TPM-AI| FutureGen| (remote) Oct 2020 – Aug 2021

- Designed a **LWC** to present insights into opportunities across hierarchical accounts which empowers representatives with holistic view to focus on high-potential opportunities.
- Pioneered a tool that examines Field and Object permissions within custom object records against Salesforce org permissions, yielding a time savings of 100-man hours per release.

PROJECTS

Statistical Analysis on Network Incident Escalation

- Utilized **statistical methods** and **hypothesis testing** (**Chi-Square Test**, **t-test**, **Logistic Regression**) and **A/B testing** to analyze network incident and customer complaint data, identifying key factors contributing to patient case escalations.
- Engineered features** such as last reported outage, historical incidents from the same region or customer, previously known network issues, etc., enhancing predictive power and achieving a **25% reduction in incident escalations** by implementing targeted mitigation strategies.

Large-Scale Data Integration and Analytics

- Extracted, cleaned, and aggregated **20M+ records/month** from Redshift, Snowflake, Salesforce, Google Analytics, and third-party APIs using **AWS S3**, **SQL**, and **Python**; performed feature engineering, statistical, descriptive, and time-series analysis, producing structured datasets and improving auditing accuracy by 25%.
- Built dashboards in **Tableau**, **Power BI**, and **Splunk**, applied anomaly detection, correlation, and **statistical analysis**, and automated workflows with **Apache Airflow on AWS**, saving hours reducing monitoring costs by \$40k/month.

KEY SKILLS

SQL (advanced), MySQL, Python (pandas, NumPy, scikit-learn), R, Snowflake, AWS(certified), GCP, Statistics, Business Intelligence, Tableau, PowerBI(certified), Google BigQuery, Big Data, Hadoop, Spark, Machine Learning algorithms, Data Mining, Predictive Modeling, Quantitative Analysis, Project Management, Git, Agile methodologies, JIRA, MS Office, Excel, SharePoint

CERTIFICATES

AWS Certified Solutions Architect – Associate | **Microsoft** Certified: Power BI Data Analyst Associate | Tableau 2022 A-Z

ADDITIONAL INFORMATION

- **Availability:** Immediate
- **Work Authorization:** OPT (Authorized to work in the U.S., visa sponsorship **not** required)
