EDUCATION

New Jersey Institute of Technology (NJIT)

Master of Science in Computer Science

Shri Govindram Seksaria Institute of Technology and Science

Bachelor of Engineering in Information Technology

Newark, NJ

Jan 2024 – Dec 2025

Indore, India

Jul 2016 – Apr 2020

WORK EXPERIENCE

Administrative Coordinator

Office of Global Initiatives (OGI), NJIT

Newark, NJ

Aug 2024- Present

- First point of contact for students, addressing inquiries on international student services (OPT, CPT, I-20s, travel, study abroad)
- Support Study Abroad programs and OGI events through applications, orientations, scheduling, and logistics
- Manage front-desk operations and student records, ensuring efficient communication and office procedures

Software Engineer

Simplilearn Solutions Private Limited

Bengaluru, Karnataka

Jul 2021 – Mar 2023

- Optimized MongoDB/MySQL databases and redesigned REST APIs (PHP, React) within Agile sprints, improving performance by ~35% and accelerating feature delivery
- Redesigned and enhanced REST API implementations using PHP and MongoDB, improving performance by ~20% and ensuring consistent functionality; integrated APIs with a React frontend and updated documentation for better developer usability
- Implemented dynamic lazy loading and SEO-optimized sitemaps, boosting page speed (~30%) and organic traffic (~15%)
- Resolved high-priority issues and delivered performance improvements in Agile workflows, ensuring system stability and availability

Data Analyst Intern

RMSI Private Limited

Noida, Uttar Pradesh

May 2019- Jul 2019

- Contributed to Python backend development for NDMA's Web-DCRA project, predicting natural disaster losses through QGIS visualizations, data cleaning, and analytical MySQL queries
- Analyzed rainfall data to identify patterns and trends, enhancing disaster preparedness, and developed Decision Support System (DSS) components that improved decision-making speed by ~40%

SKILLS

- Programming Languages:** Java, JavaScript, Python, SQL
- Database Systems:** MongoDB, MySQL
- Frameworks and Libraries:** Spring Boot, React.js, Node.js, Express.js
- Tools:** AWS, GIT, Jira, Linux

PROJECTS

Multi-Threaded Chat Application – Java, Sockets, Multithreading, AES, Linux

- Developed a real-time multi-threaded Java client-server chat system using socket programming and inter-process communication
- Implemented AES-encrypted messaging, secure file transfer, and user authentication to ensure data confidentiality and seamless communication
- Optimized concurrency handling to support multiple simultaneous clients while maintaining system stability and performance

Sentiment Analysis and Emotion Classification

- Designed and implemented deep learning models (BERT, BiLSTM) alongside traditional ML algorithms (Logistic Regression, Naive Bayes, Decision Trees) for multi-class text classification
- Applied data preprocessing, tokenization, and resampling techniques to handle noisy and imbalanced datasets, improving model reliability
- Achieved up to ~97% accuracy and strong F1 scores, validated through confusion matrices, ROC curves, and performance benchmarking

LEADERSHIP

Physics Proctor

Physics Department, NJIT

Newark, NJ

Mar 2024 – Sep 2024

Placement Manager

SGSITS Indore

Indore, India

Apr 2017- Jul 2020
