

SHIKHA GUPTA BANSAL

shikhagupta2006@gmail.com | +1-860-328-2518 | www.linkedin.com/in/shikhaguptabansal

Results-driven Data Analyst with expertise in industry research, macroeconomic analysis, and AI-driven data insights. Proficient in Tableau, Power BI, Python, and SQL, with a strong foundation in predictive modeling and machine learning. Adept at transforming complex data into actionable insights to drive strategic initiatives and operational efficiency.

SKILLS

Python, R, SQL, Machine Learning (Clustering, PCA), Predictive Modeling, Statistical Analysis, Tableau, Power BI, Excel, IBM Cognos, Google Analytics, Open Refine, SharePoint, Data Visualization, Data Cleansing, Industry Research, Data Integrity Management, Stakeholder Communication, Cross-functional Collaboration, Presentation Skills, Requirements Gathering.

EDUCATION

Master of Science in Business Analytics (GPA 4.0)	University of Hartford (Connecticut, USA)	May 2024
Master of Business Administration (Finance)	ICFAI University	
Bachelor of Commerce	Delhi University	

EXPERIENCE

Web3 Security Data Analytics Externship	Webacy Remote Extern	Aug 2024 – Sep 2024
- Improved labeling accuracy by 10% by analyzing 100+ smart contract vulnerabilities using SQL & Python for validation and risk assessment. - Identified prevalent vulnerabilities & risk patterns using frequency analysis, correlation & unsupervised ML techniques (clustering & PCA). - Utilized SQL, Excel & Tableau for data analysis and visualization, uncovering insights into vulnerabilities & risk profiles.		

Corporate Venture Capital & Business Analytics Externship	HP Tech Ventures Remote Extern	Aug 2024 – Sep 2024
- Researched startup metrics, business models, & market differentiators to identify growth opportunities aligned with HP's investment thesis. - Built market maps and ensured data integrity using Open Refine, maintaining quality for accurate analysis across startup sectors. - Analyzed data with Excel & SQL, visualized trends in Power BI, & supported data-driven investment recommendations.		

All People Marketplace	Business Analytics Intern	May 2024 – Sep 2024
- Enhanced financial reporting efficiency by 15% using IBM Cognos & Tableau, creating dashboards for real-time KPI tracking & insights. - Analyzed trends to identify opportunities & risks, providing data-driven recommendations for strategic decisions & improvements. - Researched prospects, optimized lead generation, & supported proposal development to drive business growth & client engagement.		

Skylt Ltd. (GBCS Group)	Business Analyst Intern	May 2024 – Aug 2024
- Optimized business strategies using Power BI & Python, enhancing client engagement, identifying new opportunities via data analysis. - Analyzed web traffic with Google Analytics, increasing team performance by 9% and optimizing marketing & lead generation strategies. - Streamlined processes through market trend analysis & proposal development, aligning strategies with business objectives & growth.		

Blockchain & Web3 Security Research Externship	Webacy Remote Extern	May 2024 - June 2024
- Developed a strong understanding of VC deal sourcing and investment thesis creation, identifying high-potential startups for investment. - Conducted in-depth research using platforms like Crunchbase, gathering critical market data and insights for informed investment decisions. - Applied market sizing & revenue projections, leveraging AI tools (ChatGPT & Bard) to automate research & generate actionable insights.		

University of Hartford	Graduate Assistant & Teaching Assistant	Jan 2024 – May 2024
- Utilized Python, R & Tableau for student data analysis, driving a 5% success rate increase through dynamic, data-driven dashboards. - Delivered personalized statistical support, enhancing student understanding and significantly improving academic performance. - Applied regression analysis & time series forecasting to build predictive models for course seat demand, optimizing resource allocation.		

Clerp Solutions Pvt Ltd	Data Analyst	May 2017 - Nov 2020
- Led data collection & analysis, collaborating with stakeholders to define scope & align results with goals, reducing timelines by 8%. - Developed analysis models to identify trends in outcomes, providing insights that drove 10% improvement in strategic decisions. - Created interactive dashboards to visualize data, enhancing data-driven decisions & communicating insights to stakeholders.		

PROJECTS

- Developed HR analytics dashboard in **Tableau**, **reducing data compilation time by 50%** & delivering actionable workforce insights.
- Researched GDP & birth rate relationships in **Excel**, identifying key socio-economic trends to inform policy recommendations.
- Forecasted gold prices using **Python & R**, enabling data-driven investment decisions & **improving portfolio returns by 15%**.
- Explored dairy industry trends in India using **Python**, identifying factors affecting milk production & distribution for strategic planning.
