SUMMARY

- Around **11 years** of professional experience in software design and development with a strong **Java, J2EE** background and **UI** Development. Experience in SDLC, Agile (SCRUM), Iterative, Waterfall methodologies and Object-Oriented Application Design and Programming.
- Experience in implementing middleware technologies like JMS and in **J2EE** Design Patterns like **MVC**, Singleton and Data Access Objects.
- Extensive experience in developing applications using **Java, Java Beans**, JSP, JSF, Servlets, **Spring MVC** framework, EJB, JDBC, JNDI, **Spring**, Hibernate, JUnit, Test Driven Development and Oracle.
- Experience in developing Client-Server/N-tier/ Web-Development/ Front End technologies using JSP, JSF, JSTL, HTML, DHTML, AJAX, **JavaScript** and CSS.
- Experience in Front End UI technologies like HTML5, CSS3, jQuery, JSON, AJAX, Node JS, React, Tag Libraries, and JSTL.
- Expert in Core Java with strong understanding of Garbage Collector, Collections Framework, Exception Handling Multithreading, Event handling, JDBC, JMS and Generics.
- Experience in developing Microservices.
- Experience in using **MVC** based **JavaScript** frameworks like **Angular and React**.
- Extensive experience on MVVM frameworks like **Angular** Versions 2.0 onwards also recently **Angular 9.0& 15.0** and **React** with Redux to develop dynamic web applications.
- Experienced in **React.js** for creating interactive **UI** using One-way data flow, Virtual DOM, JSX.
- Experience working on **RESTFUL** Web Services and Implementing **REST API'S**
- Experienced in using **React.JS** components, Forms, Events, Keys, Router and Flux concept
- Expertise in Back end/server-side **Java** technologies such as: Web services, **Java** persistence **API** (JPA), **Java**. Messaging Service (JMS), Apache Kafka, Rabbit MQ, **Java** Database Connectivity (JDBC), **Java** Naming and Directory Interface (JNDI).
- Excellent work experience with Database writing highly complex SQL/PL SQL queries, with major Relational Databases MS Access/Oracle/MySQL/Sybase.
- Good Experience in **React.js** for creating interactive UI's using One-way data flow, Virtual DOM, JSX, **React** Native concepts.
- Strong experience in developing Single Page Application (SPA), using **MERN (Mongo, Express, React and Node)** stack.
- Experience in working with **MongoDB**
- Experience in implementation of business applications using BEA Web logic, Web Sphere, IBM Web Sphere Application and Portal Server (WAS/WPS)
- Expertise in open-source framework Object Relational Mapping (ORM) tools like Hibernate and also used Hibernate Annotations to reduce time at the configuration level.
- Excellent Interpersonal, Communication and Presentation skills, Self-starter, Detail Oriented, Research Oriented and Customer Focused.

TECHNICAL SKILLS

Languages: Java 1.8, Java 11, Java 17, SQL, PL/SQL, Node.JS, Angular, React.

Tools and Framework: Spring, Hibernate, Spring MVC, Spring Boot, Spring Web Flow, Spring IOC, Spring AOP, Spring Security, JSF, Junit, SOAP UI, JReport, Rational Rose, Apache Kafka, Spring Boot.

Build Tools: ANT, Maven, Docker, Jenkins and Kubernetes

Version & Source Control: GIT and ClearCase

Web Technologies: HTML5, CSS3, JavaScript, React JS, Redux, TypeScript, Angular 8/15, Angular material, AJAX, **Node.JS**, **J2SE/J2EE Technologies:** Java, Spring Boot, Spring, Spring IOC, **J2EE**, RMI, Sockets, JDBC, Servlets, JSP, JMS, Java Beans, JSTL, Jakarta Struts, JSF, EJB 3.0, Spring, Hibernate, JTA, JNDI, JPA, JMS.

Methodologies: Agile, Waterfall.

Databases: Oracle, SQL-Server, MySQL server, MS SQL, IBM DB2, MongoDB, NoSQL, Cassandra, Azure Cosmos DB.

Web/Application Servers: Apache Tomcat, IBM WebSphere, Web logic Application server, JBOSS, Camel.

XML Technologies: XML, XSL, DOM, SAX, DTD, XQuery, XSD and XSLT.

IDE / Tools: Eclipse, IntelliJ, Spring Tool Suite (STS)

Testing Tools / Others: JUnit, Mockito, Soap UI, SLF4J, Log4j and JIRA.

Platforms: Windows, Linux and Unix.

Web Services: REST Microservices, JAX-RPC, WSDL, JAX-RS JAX-WS, UDDI, JAX-B, CFX.

PROFESSIONAL EXPERIENCES

Equinix

July 2024 – Present

Location: CT, USA

Role: Senior Java Full Stack Developer

Responsibilities:

Involved in all phases of **Software Development Life Cycle**

(SDLC), demonstrating expertise in requirements analysis,

design, development, testing, release, and support.

- Played a pivotal role in the design and implementation of **microservices** using **Java 11**, emphasizing scalability and modularity to enhance system architecture.
- Successfully converted a monolithic app to a **microservices** architecture using **Spring Boot** and the 12-factor app methodology, improving flexibility and maintainability.
- Utilized Java libraries and frameworks such as Apache Spark, Spring Batch, and Apache Camel to streamline **ETL** workflows.
- Utilized **Spring JDBC** to handle data retrieval and updates, including insertion of data into an **Oracle** database using stored procedures, ensuring efficient database interactions.
- Experience in migrating existing Java applications to **Java 17**, ensuring compatibility and leveraging new features for improved efficiency and maintainability.
- Leveraged **Kafka** to build robust messaging platforms, optimizing communication and data flow in distributed systems, with real-time streaming of data using **Spark** with **Kafka**.
- Implemented **Kafka** producer and consumer applications on a **Kafka** cluster setup with the assistance of Zookeeper, contributing to reliable and scalable data processing.
- Utilized **Spring MVC** and **Spring JDBC** for effective handling of web-based applications and database interactions, enhancing overall application performance.
- Employed **Hibernate ORM** to seamlessly integrate **Java 11** applications with relational databases, ensuring data consistency and integrity.
- Engaged in **HTML5** and **CSS3** to design dynamic and responsive user interfaces for web applications, focusing on modern and visually appealing design.
- Built scripts on **AWS** cloud using **Python SDK** for scheduling **EC2** auto-scaling load balancer, optimizing resource utilization.
- Designed and maintained comprehensive **CloudWatch** dashboards for real-time visibility into the health and performance of **AWS** resources, facilitating proactive monitoring.
- Implemented **CloudTrail** configurations to capture and log **AWS API** activity for compliance purposes, ensuring adherence to security and audit requirements.
- Set up **AWS VPCs** for development, staging, and production environments, ensuring secure and isolated network configurations.
- Designed infrastructure components using **Terraform** scripts for efficient provisioning and management of cloud resources.
- Configured and maintained security groups to control inbound and outbound traffic to **EC2** instances, ensuring secure access controls.
- Creating reusable **Terraform** modules to abstract and encapsulate infrastructure components.
- Consumed REST services using Angular HTTP, performing various REST HTTP operations for data retrievals and updates, contributing to efficient communication with backend systems.
- Developed Angular 12 Components, Services, and Filters, actively participating in the creation of unit and integration test cases using Jasmine and Karma.
- Designed and developed the application using Agile methodology and followed Test Driven Development (TDD) and Scrum principles, ensuring iterative and collaborative development.
- Collaborated with cross-functional teams on projects involving **Angular 8**, **Node.js**, and **MongoDB**, fostering efficient development and integration of front-end and back-end technologies.
- Implemented error handling and logging mechanisms to ensure data integrity and traceability throughout the **ETL** pipeline.
- Contributed to the implementation of **CI/CD** pipelines, ensuring a smooth and automated process for continuous integration and continuous delivery.
- Engaged in scenarios involving the integration of **TypeScript** with modern front-end frameworks like **Angular**, ensuring seamless cooperation and effective development workflows.
- Contributed to the development of reusable **TypeScript** components and services in large-scale projects, promoting code modularity and maintainability.
- Engaged in **MongoDB** for efficient **NoSQL** database design and development, addressing challenges related to handling large datasets and dynamic schema requirements.
- Applied **JUnit** and **Mockito** for unit testing, ensuring the reliability and functionality of individual components, with parameterized tests in JUnit for efficient testing of multiple input scenarios.
- Collaborated with **QA** teams to share knowledge and best practices in **Mockito** for mock testing, enhancing overall test coverage.

- Experience in troubleshooting and **debugging Java 17** applications, utilizing built-in debugging tools and third-party libraries to identify and resolve issues efficiently.
- Leveraged **WebLogic** for efficient deployment and management of Java-based applications, with integrated **OAuth** for secure and seamless authentication and authorization processes.
- Implemented and optimized **Maven** builds caching strategies to reduce build times, integrating **Maven**.
- Engaged in continuous integration and **DevOps** methodologies such as **Docker**, **Kubernetes**, **Jenkins**, **Gradle**, **Jenkins File**, **Docker File**, and **Elastic Search**, optimizing development workflows.
- Engaged in **GitHub** for version control and collaborative development practices, contributing to effective versioning and code management practices.
- Implemented frontend components and templates using **HTML**, **CSS**, and **JavaScript** within **AEM**.
- Developed custom **AEM** components, widgets, and dialogs using Adobe's Component Library.
- Implemented backend services, **servlets**, and **OSGi** bundles to support **AEM** components and workflows.
- Implemented microservices using **Java 11** and related technologies.
- Handled deployment scenarios for **Java 11** web applications on **Apache Tomcat**, ensuring efficient and reliable deployment processes.
- Implementing **DevOps** practices and principles to automate deployment pipelines, infrastructure provisioning, and configuration management.
- Utilized **Log4j** for efficient logging and monitoring, improving troubleshooting capabilities and error detection.
- Designed and implemented **RESTful APIs**, adhering to best practices for scalability and flexibility.
- Utilizing **JAX-RS** for designing and implementing **RESTful APIs**.
- Participated in **CI/CD** practices using **Jenkins**, **Kubernetes**, and **Docker** for automated deployment, contributing to efficient and consistent release processes.

Environment: Core Java, java 8,11 & 17, Java/J2EE, Microservices, Angular 8.0, 11 & 15, TypeScript, Scala, PHP, JPA, JSP, JSTL, Hibernate, Spring, Spring boot, Restful API, Java 17, JAX RS, NoSQL, MongoDB, TDD, IAM, Apache Kafka, IBM MQ, Apache Tomcat, Agile, Junit, Mockito, Cypress, Cucumber, GitHub, Maven, IntelliJ, AWS, EC2, S3, RDS, Docker, Kubernetes, Jenkins.

Ribbon Communications

May 2019 – July 2020

Location: Bengaluru, India

Role: Software Engineering Lead Analyst

Responsibilities:

- Involved actively in Daily Scrum meetings, Sprint planning and estimation of the user stories and providing valuable inputs through Agile methodology. Analyzed and converted Business requirements into technical requirements.
- Designed and Developed Micro services-based applications using Spring, Spring boot, Hibernate, Spring DAO, JDBC, Oracle. Used Eureka to call other proxies Microservices.
- Used Gradle as build and dependency management tool for creating EAR, WAR and JAR file to be deployed in application servers and integrated with GitHub, Jenkins, Jenkins pipeline Jobs
- Implemented core Java concepts such as multithreading, collections, and exception handling and maintained Java-based applications, ensuring high performance, responsiveness, and scalability
- Worked with React with redux to build single page application.
- Selecting the appropriate AWS service based on compute, data, or security requirements.
- Responsible for creating efficient design and developing User Interaction screens using HTML5, CSS3, JavaScript, React.js, Redux and Bootstrap.
- Designed and implemented task queues using Apache Kafka to handle concurrent requests from clients.
- Development of services and scheduled jobs for catalog data publishing and Image notification service using Spring RESTful services and Apache Kafka for data transmission between the systems.
- Worked as a full stack developer responsible for Web, middle tier and Databases in the development of the application.
- Experience working in Agile development following SCRUM process, Sprint and daily stand-up meetings.
- Involved in developing applications using Java and J2EE technologies like Spring 4.0, JDBC, EJB, JSP.
- Implemented Collections Framework for fetching and appending strings from the deployed UI.
- Use of JSX in the React components for cleaner HTML like structure inside JavaScript.
- Involved working with NoSQL with MongoDB. Performed CRUD operations on MongoDB using RESTful web services.
- Build RESTful API by building Node.JS Server in the back end to handle requests sent from the front-end JQuery Ajax calls.
- Implemented core Java concepts such as Utilized encapsulation, inheritance, and polymorphism to create efficient and modular solutions.
- Developed a RESTful web API using Spring Boot. Spring Data is used to communicate with the Mongo DB.
- Wrote internal and external API services using Node.JS modules.
- Building modules of applications in Java and integrating them into our ColdFusion application.
- Used Apache Kafka to load the data on Hadoop File system and move the same data to MongoDB NoSQL database.
- Implemented Database application programming for Oracle, Postgres SQL server using Stored Procedures, Triggers, and Views etc.
- Creates and configure Micro-Services architecture and integrated with React.Js application.

- Implemented Java Web Services based on SOA Architecture with SOAP and WSDL.
- Integrated Spring Data Mongo Repository to retrieve and update the data from Mongo DB.
- Implemented custom Kafka Connect connectors to bridge legacy systems with Kafka, enabling seamless migration and real-time data synchronization.
- Designed and implemented Kafka Streams applications for real-time analytics, providing valuable insights into user behavior and enabling data-driven decision-making.
- Configure and monitor numerous MongoDB and NoSQL instances. MongoDB Schema Design using DB Ref, Manual Ref, Embedded Data Model Design.
- Experienced in Continuous Integration/Continuous Deployment has become one of the most common use cases of Docker, CI/CD merges development with testing which allows developers to build code from master branch of GIT repository.
- Developer and integrated RESTful web services using JAX-RPC along with Spring Boot and test cases using JMeter
- Designing and implementing the User Interface using OO JavaScript, Ember JS, HTML, CSS/CSS3, SASS and AJAX.
- Good Exposure on Web development using Java, Angular, jQuery, SOAP, REST and Micro services architecture.
- Installed Jenkins/Plugins for GIT Repository and Setup SCM Polling for Immediate Build with Maven Repository and also used web hooks to ensure Jenkins is listening to a particular branch.

Environment: UNIX, Maven, Java8, GitHub, XML Schemas, AJAX, XML, HTML5, CSS3, JSON, JQuery, Bootstrap, Node.JS, React JS, Apache Kafka, Spring 4.0, JAX-RPC, Jenkins, CI/CD, Spring Boot, Hibernate, Mockito, Mongo DB, GraphQL, AWS Cloud, STS, Maven, Microservices, RESTful services, JSP, Design Patterns, JUnit, Web Services, Spring Security

Velankani Software Pvt. Ltd.

May 2014 – May 2019

Location: Bengaluru, India

Role: Senior Software Engineer

Responsibilities:

- Designing, Developing and Deploying web based multi-tiered interfaces including user account and payment screens using Java, Hibernate and Spring with Extensive use of Java Multithreading concepts.
- Extensive knowledge on Spring modules like Spring MVC, Spring Boot, Spring IOC, Spring DAO, Spring AOP, Spring Batch.
- Used Spring Core Annotations for Dependency Injection Spring DI and Spring MVC for REST API, Spring Boot for Micro services and Spring Batch for running batch jobs.
- Responsible for writing J2EE compliant Java code for application development effort which involved working with JDBC, XML, Hibernate, Spring etc.
- Involved in SDLC Requirements gathering, Analysis, Design, Development and Testing of application using Agile Methodology (Scrum).
- Created applications using React.js and Node.JS libraries NPM, gulp directories to generate desired view and flux to root the URL's properly.
- Used CI/CD tool Jenkins CI to Build, Test, Deploy the code in the Pivotal Cloud and improved scalability of applications on cross-platforms. Configured Log4j for logging mechanism.
- Developed unit and Integration test cases using JUnit, Mockito. Provided guidance on technical issues during deployment and got a chance to do defects tracking across multiple teams with cross collaborations.
- Has experience in the bug fixing, debugging, troubleshooting and testing Java with multi-threading, collections and Spring as the core technology.
- Has implemented and enhanced complex software like Network Adapters using technologies like XML, JAXB, Rest, Camel Framework, Expect4j, Socket programming which permits the vendors to fetch the inventory of the network in the format they want.
- Performed code reviews in line with the coding standards to enhance application development and maintenance.
- Worked with several teams to ensure that the deadline are met.
- Gave presentations to the team on the newly implemented features and has mentored the juniors in the team.
- Implemented MVC architecture with React components as Views, models, and controllers in Node.JS for API development.
- Designed and implemented server-side RESTful web services using Node.JS and handled communications to the client side (React JS) using JSON.
- Designed and implemented RESTful APIs using Node.JS and Express for seamless communication between front-end and back-end systems.
- Created Spring Core Annotations for Dependency Injection Spring DI and Spring MVC for REST API's and Spring Boot for micro-services.
- Hands on experience in developing Single Page Applications (SPA) using React.js.
- Implemented data models and schemas using MongoDB (Node.JS) and MySQL/PostgreSQL (Java).
- Played a key role in developing the business layer and data management components of this web-based system over J2EE architecture. Implemented core Java concepts such as encapsulation, inheritance, and polymorphism to create efficient and modular solutions
- Used Java Messaging Services (JMS) for reliable and asynchronous exchange of important information such as payment status report.
- Worked in using React JS components, Forms, Events, Keys, Router and Flux concept.
- Configured routes in Apache Camel using XML for routing messages between end points.
- Implemented Business processes such as User Authentication using Spring security.
- Implemented persistence layer using Hibernate that uses the POJOs to represent the persistence database tuples. These POJOs are serialized Java Classes that would not have the business processes.
- Used Spring and Hibernate for implementing IOC, AOP and ORM for back-end tiers.
- Used Hibernate, object/relational-mapping (ORM) solution and technique of mapping data representation from MVC model to

Oracle Relational data model with SQL-based schema

- Implemented the application using the concrete principles laid down by several design patterns such as MVC, Business Delegate, Session Facade, Adapter, Data Access Object, Singleton and Factory.
- Used GIT for version control across common source code used by developers.
- Used XML Web Services using SOAP to transfer the amount to transfer application that is remote and global to different financial institutions.
- Used XML parser APIs such as JAXP (SAX) and JAXB in the web services request response data marshalling as well as un-marshalling process.

Environment: Java8, GitHub, XML Schemas, React JS, AJAX, XML, HTML5, CSS3, React, JSON, JQuery, Bootstrap, Spring 4.0, JAX-RPC, Jenkins, Apache Kafka, CI/CD, Spring 4, Node.JS, Spring Boot, Hibernate 4.2, Mockito, Mongo DB, Micro services, RESTful services, JSP, Design Patterns, Junit, Swagger.

Wipro Technologies

Aug 2010 –April 2014

Location: Bengaluru, India

Role: Java Developer

Responsibilities:

- Worked in all phases of the Software development life cycle (SDLC) starting from requirement gathering, designing functional document to implementation, delivery, test planning, execution and production support.
- Closely worked with business system analyst to understand the requirements.
- Worked on development and project integration tools like Eclipse, Rational ClearCase, ANT and Rational Rose.
- Has experience in development and maintenance of PM applications for LTE/WRAN and Core network nodes using Core Java, RMI, JMS and XML in Solaris environment.
- Implemented Database-First Entity Framework to retrieve and store task data in entity models.
- Also has experience in using static analysis tools like PMD, Cobertura and Runtime analysis tools like JProbe.
- Used Java Swing to create robust desktop application.
- Designed, developed and programmed in Java 7, Spring.
- Supported Quality Assurance Team during various phases of the project.
- Maintain, enhance, and recommend solutions that best suit business and technology needs from UI standpoint.
- Strong communication, analytical and interpersonal skills working within cross-functional teams.
- Worked on cross browser compatibility issues and fixed the bugs pertaining to various browsers.
- Excellent analytical and logical programming skills with a good understanding at the conceptual level and possess excellent presentation, interpersonal skills with a strong desire to achieve specified goals.

Environment: Java 7, Sybase DB, Junit, Eclipse, PMD, Cobertura, JProbe, XML, Corba, RMI, ANT, JSON, XML, Jira, Java/J2EE,

Education:

Bachelor's in Computer Science and Engineering - SRM University (May 2010)

Master's in Computer Science - CUNY Brooklyn College (December 2024)

Certifications:

Oracle Certified Java SE 8 Programmer
