WORK EXPERIENCE

Generative AI Intern

May 2024 - Dec 2024

ZSAnalytics

New York, USA

- Optimized LLM Models for intelligent document retrieval in customer service, leveraging RAG and Azure, increasing query accuracy by 30%.
- Built predictive models for **sales trends** and **inventory management**, reducing delivery downtime by 20% via demand forecasting.
- Enhanced CVR by 50% using personalized **recommendation chatbots**, streamlining instant data access and cutting manual workload.

Data Scientist

Dec 2022 - Aug 2023

Optiontools

Noida, India

- Implemented RAG-based LLM models for a **finance options trading chatbot**, improving premium client satisfaction by 50% through efficient **backtesting** and **query retrieval**.
- Designed predictive models with **50K+ FinTech data points** to forecast market patterns, improving prediction accuracy by 17%.
- Conducted A/B testing and advanced data modeling to analyze historical trends using SQL, boosting **SEO reach** and **social media campaigns**, driving user engagement by 100K+.
- Built dashboards using Tableau and Google Analytics to monitor user activity, producing ad-hoc insights, and improving engagement by 80%.

Software Engineer

Dec 2020 - Dec 2022

Capgemini

Mumbai, India

- Led end-to-end development of **ML models** like Random Forest and GBM on **AWS Cloud**, enhancing **business intelligence** by 63% and reducing revenue loss from credit card failures.
- Developed and optimized a **face recognition system** using CNNs and Computer Vision collaborating with cross-functional business leaders and product owners, improving fraud detection by reducing false positives by 40%.
- Implemented ETL to process **1M+ customer records**, identify purchase patterns, and marketing campaigns to boost profits by \$50,000.
- Built large-scale data-driven **seasonal trend dashboards**, resulting in actionable insights and 70% increased profits during peak seasons.

Data Analyst Intern

Jul 2020 - Sep 2020

Iconseair Management Solutions

Moradabad, India

- Applied statistical modeling to assess risk severity metrics in clients' accounts, identifying 10+ critical insights and potential compliance issues.
- Streamlined processes by integrating **MS Excel** and **MySQL**, doubling accuracy and productivity in manual data entries.
- Conducted **error rate analysis** using statistics on 10K+ client records, identifying anomalies and boosting retention rates by 10%.

LEADERSHIP EXPERIENCE

AI Engineer | Alfamodo Lifestyle

Jan 2024 - May 2024

- Developed a Next.js fitness e-commerce integrated with Sanity CMS, Redux, MongoDB, and AI-powered features to enhance user experience.
- Built a RAG-based Doctor and personalized Fitness Trainer leveraging OpenAI and Langchain, achieving 95% accuracy in retrieving medical insights from unstructured documents and streamlining healthcare recommendations.

Software Engineer | Yeshiva University

Aug 2024 - Dec 2024

- Designed and developed a cross-platform attendance app for iOS and Android using React Native and TypeScript,
- Featured GPS-based tracking and OpenCV facial recognition, reducing proxy attendance by 40%, with data synchronization for 1,000+ users.

EDUCATION

Yeshiva University

Aug 2023 - Dec 2024

Masters of Science in Artificial Intelligence and Data Science

New York, NY

Lovely Professional University

Aug 2017 - Aug 2021

Bachelor of Technology in Information Technology

Jalandhar, India

SKILLS & CERTIFICATIONS

Skills: Python, R, PyTorch, TensorFlow, Keras, SQL, NoSQL, Langchain, Full Stack, A/B Testing, NumPy, Pandas

Certifications: Natural Language Processing Specialization, Google Advanced Data Analytics Specialization, Deep Learning Specialization, Stanford Machine Learning Specialization

Achievements: Founded an e-commerce startup selling 1000+ premium products and leading product development, Achieved First Rank for Outstanding Research Project at the 2024 GCSE Seminar, Loreal Brandstorm Recognition, Capgemini Appreciation Certificate
