GitHub: [shirinmjr](#)

Full-Stack Software Engineer focused on building scalable, user-friendly web applications. 5+ years of experience with JavaScript, TypeScript, and modern frameworks. Background in Software Quality, with experience optimizing CI/CD and ensuring secure, high-quality code.

Work Experience

Full-Stack Software Developer

Oracle | 01/2025 – 9/2025 | Remote

- Developed features for a microservice application using Preact, TypeScript, and Oracle JET with responsive UI enhancements.
- Implemented multi-layer API integrations with custom hooks and adapter utilities.
- Managed complex state with Context API, ensuring consistent and reliable data flow.
- Built infinite scrolling, pagination, and lazy-loading to enhance performance.
- Improved build and deployment scripts, ensuring compliance with security standards.
- Contributed to planning meetings, offering ideas for feature design and workflow.

Full-Stack Software Developer

Freelance | 01/2023 – 12/2024 | Remote

- Developed full-stack solutions integrating external APIs with Next.js, TypeScript, and Node.js, and implemented secure SSO authentication (Google, GitHub).
- Built mobile-first landing pages and eCommerce sites using Tailwind CSS and Material UI for consistent, responsive design, boosting engagement and improving user experience.
- Streamlined data collection and validation with Webpack and Axios.
- Built eCommerce sites and client features using JavaScript, HTML, and CSS.
- Volunteered on community projects, creating websites to boost local business visibility.

Full-Stack Software Developer – Founding Member

Organize App | 12/2023 – 04/2024 | Remote

- Designed and implemented a dynamic form builder using reusable components, Webpack, Material UI, React Native, and Tailwind CSS, enhancing engagement and conversion rates.
- Built an API for NoSQL database with Firebase, Node.js, Express, and Axios for user data storage and verification.
- Coordinated and performed daily releases on Vercel.

Software Quality Engineer

StoryBlocks | SAIC | FINRA | Northrop Grumman | 01/2018 – 12/2022

- Developed two Cypress test automation frameworks, enhancing testing efficiency. Maintained legacy Selenium tests to ensure seamless transition.
- Streamlined CI/CD pipeline with GitHub Actions scripts, cutting deployment time by 50%.
- Designed a health-check script for 400 endpoints, generating performance reports.

Education

General Assembly

Completed a full-time, 12-week software engineering immersive program.

Built 5 solo projects and led 2 group projects.

University of Maryland University College, Adelphi, MD

B.S. Software Development and Security, Summa Cum Laude (GPA: 4.0)

Azad University, Iran, Tehran

B.E. Electrical Engineering, Electronics

Skills

Languages: JavaScript, TypeScript, Node.js, Java.

Libraries and Frameworks: Next.js, React, Redux, Express, HTML5, CSS, Oracle JET, Tailwind, Material UI, Bootstrap, Natural Language User Experience (NLUX).

Databases: MySQL, PostgreSQL, MongoDB, Mongoose, Prisma, Cosmos DB.

Cloud: Amazon Web Services (AWS: IAM, EC2, S3, RDS, Route 53). Azure Storage, Azure APIs, Oracle Cloud Infrastructure (OCI).

Tools & Practices: Linux Command Line, Shell Scripting (Bash), Git, GitHub, Bitbucket, Eclipse, IntelliJ, VS Code, Figma, Agile, Scrum, Jira, TDD, Splunk, Section 508 Compliance.

Certifications

Meta: Meta Front-End Developer Professional Certificate.

LinkedIn Learning: [Become a JavaScript Developer \(28h\)](#): [ES6+](#), [Scope](#), [Prototypes](#), [Closures](#), [Classes](#), [HTML](#), [Web Performance](#), [JSON](#), [Ajax](#).

React Learning: [React.js Essential Training](#), [Building an Interface with React](#), [React Hooks](#).

ASTQB/ISTQB: [Foundation Level Software Testing Certification](#), [ISTQB Agile Tester](#).

Coursera: [Git and GitHub \(Google\)](#), [Cypress UI automation with real-time scenarios](#), [Cypress API](#).
