

Shirin Meher Dalawai Software Engineer

shirin@myworkmails.com | (989) 621-7473 | USA | [Linkedin](#)

Summary

Results-driven Software Developer with 3+ years of expertise in full-stack development, cloud computing, and software automation. Skilled in building scalable, secure, and high-performance applications using modern frontend frameworks, backend technologies, and microservices. Experienced in database optimization, real-time data processing, and implementing CI/CD pipelines. Strong collaborator with a focus on delivering reliable, compliant solutions. Committed to continuous learning and applying best practices to solve complex technical challenges efficiently.

Technical Skills

- **Programming Languages:** Java, JavaScript, TypeScript
- **Frontend Technologies:** React.js, Redux, Angular, NgRx, HTML, CSS
- **Backend Technologies & Frameworks:** Spring Boot, REST APIs, Microservices, GraphQL, Python, Node.js
- **Cloud & Databases:** SQL Server, Azure SQL, MongoDB, MySQL, Redis, AWS (ECS, IAM, Encryption, CodePipeline), Azure (Azure DevOps, Azure Cloud), GCP
- **DevOps & Containerization:** Docker, CI/CD Pipelines (AWS CodePipeline, Azure DevOps), Kubernetes
- **Testing Frameworks:** JUnit, Mockito, Postman (API Testing)
- **Security & Compliance:** OAuth 2.0, Role-Based Access Control, HIPAA, GDPR, SEC Regulatory Compliance
- **Other Skills:** Unit and Integration Testing, Performance Optimization, Auto-Scaling, Monitoring, Apache Kafka, Git, GitHub

Professional Experience

- Software Engineer, Millennium Management**10/2024 – Present | Remote, USA
 - Designed and implemented robust software solutions to automate trade execution workflows and real-time risk analytics, supporting Millennium’s diverse multi-strategy investment approach. Collaborated with traders, quants, and risk managers to translate complex financial requirements into scalable, high-performance applications.
 - Developed responsive frontend interfaces using React.js and Redux, enabling portfolio managers and analysts to monitor live P&L, risk exposures, and market signals with low latency. United Kafka streams for real-time data delivery, improving UI responsiveness by 40%.
 - Optimized SQL Server queries and enforced stringent security measures using AWS encryption and IAM policies, reducing data retrieval latency by 30% while ensuring compliance with SEC and global regulatory standards.
 - Created backend microservices with Java Spring Boot to support event-driven data processing, market data ingestion, and automated trade order routing. Used Kafka for asynchronous messaging, increasing system quantity and scaling to handle bigger trade volumes.
 - Developed comprehensive unit and integration tests with JUnit and Mockito, integrated into AWS CodePipeline CI/CD workflows, achieving 85% test coverage and reducing deployment errors by 60%.
 - Collaborated with DevOps teams to deploy containerized applications on AWS ECS using Docker, implementing auto -scaling and monitoring to sustain 99.9% uptime during peak trading periods.
- Associate Engineer, Virtusa Consulting Services Pvt Ltd**06/2022 – 08/2023 | Hyderabad, India
 - Developed and deployed scalable software modules using Java, Spring Boot, and RESTful APIs, improving application response time by approximately 30%, enhancing client satisfaction and system efficiency.
 - Identified and resolved critical bottlenecks through systematic debugging and code optimization, reducing system errors by around 25% and increasing overall application stability.
 - Collaborated with cross-functional teams in Agile environments, contributing to project delivery that consistently met business goals and deadlines, improving sprint completion rates by 15%.
 - Conducted thorough code reviews focusing on clean code and security best practices, reducing post-release defects by approximately 15% and boosting maintainability.
 - Mentored junior engineers, accelerating their productivity and improving team efficiency by roughly 10% through knowledge sharing and technical guidance.
- Software Developer, The Cigna Group**01/2021 – 05/2022 | Hyderabad, India
 - Developed Angular frontend features such as claim submission, status tracking, and notifications using NgRx. Collaborated with UX and QA teams to improve user engagement by 25% via A/B testing and agile feature refinement.
 - Built and optimized backend REST APIs with Java Spring Boot for claim validation and workflow. Integrated third-party vendor services to improve processing speed. Participated in requirements gathering while ensuring HIPAA and GDPR compliance.
 - Designed and tuned Azure SQL database with indexing and partitioning, boosting query performance by 40%. Coordinated with data engineering for Millions of monthly transactions and implemented OAuth 2.0 and role-based access for security.
 - Created unit and integration tests with JUnit and Mockito achieving 85% coverage. Set up CI/CD pipelines in Azure DevOps, reducing bugs and deployment time by 40%. Supported Azure cloud deployment and maintained 99.9% uptime.

Education

Central Michigan University, Mount Pleasant, MI, USA	
Master of Science in Computer Science	08/2023 – 05/2025
GITAM University, Hyderabad, India	
Bachelor of Technology in Computer Science and Engineering	06/2018 – 04/2022

Certificate

Oracle Certified Associate, Java SE 8 Programmer Certified by Oracle
