Professional Summary

I am a passionate data enthusiast with a background in Computer Science and practical experience as an LMS Data Administrator at Cognizant. Currently pursuing a Master's in Information Science with a focus on Data Analytics, I excel at solving complex problems, optimizing processes, and uncovering actionable insights through data. I am eager to contribute to data-driven decision-making and stay at the forefront of emerging trends in data analytics.

Education

- Masters in information science – Data Analytics (Pursuing)
University at Albany, SUNY
Expected Graduation: December, 2025
 - Bachelor of Technology in Computer Science and Engineering
CMR Technical Campus – India | 2021 | 65%
-

Professional Experience

Programmer Analyst Trainee (Learning Management System Data Administrator) Cognizant
Technology Solutions | Hyderabad, India | November 2021 – January 2024.

- Collected and analyzed LMS usage data to support training effectiveness and inform decision-making.
- Developed and maintained reports and dashboards to visualize user engagement, course completion rates, and content performance.
- Utilized Power BI (including DAX and Power Query), SQL, and Excel to generate insights and develop interactive dashboards.
- Managed and resolved system issues and user requests through ServiceNow, achieving a 90%+ first contact resolution rate and reducing ticket backlog by 30%.
- Partnered with cross-functional teams to define data requirements and streamline LMS processes, improving data accuracy and system efficiency.

Technical Skills

- Tools & Platforms: Power BI, Microsoft Suites, Tableau, VS Code, Android Studio, Verilog, Eclipse
 - Programming: C, JAVA, SQL, HTML/CSS, Python
 - Other: Data Visualization, Data Cleaning, Reporting
-

Projects

Alzheimer's Disease Detection Using MRI Scans

[August, 2024 – January, 2025]

Independent Research Project

- Utilized Python and machine learning (SVM, CNN) to classify MRI images for early detection of Alzheimer's disease.
- Performed data preprocessing, feature extraction, and model evaluation using classification metrics.
- Applied SQL for data manipulation and Power BI for visualizing diagnostic trends and classification results.
- Demonstrated skills in medical imaging analysis, data visualization, and handling imbalanced datasets.

Road Accident Analysis

[January 2021- May 2021]

Independent Research Project

- Analyzed traffic accident datasets using Python (Pandas, Matplotlib, Seaborn) to identify patterns and high-risk zones.
 - Employed SQL for data extraction, cleaning, and transformation from relational databases.
 - Built interactive dashboards in Power BI to visualize accident trends by time, location, and severity.
 - Delivered insights to support data-driven decision-making in transportation safety.
-

Certifications

- Certified in IRB: Human Subject Research (Investigators, Advisors)
 - Certified in Microsoft Power BI Desktop for Business Intelligence
-

Soft Skills

- Problem Solving.
 - Leadership.
 - Time Management.
 - Communication & Quick Learner.
-

Interests

- Passionate about solving puzzles and brain teasers, which sharpen analytical thinking. I enjoy traveling and exploring new cultures, reading non-fiction and tech articles to stay updated, and occasionally blogging about technology and learning experiences.
