SUMMARY

Analytical and detail-oriented Data Analyst with expertise in transforming complex datasets into actionable insights. Skilled in SQL, Python, and visualization tools such as Tableau and Power BI. Experienced in statistical analysis, KPI reporting, and building data-driven strategies to optimize business performance. Currently pursuing a Master's in Data Science with a strong foundation in predictive analytics and data modeling.

SKILLS

- **Programming:** Python (Pandas, NumPy, Matplotlib), R, SQL (PostgreSQL, MySQL), C++
 - **Data Visualization:** Tableau, R (ggplot2, dplyr), Power BI
 - **Big Data & Cloud:** Google BigQuery, AWS, Snowflake (Basics)
 - **Tools:** Git, Jupyter Notebook, RStudio, Excel (Pivot Tables, VLOOKUP), Palantir Foundry
 - **Data Analysis:** Statistical Analysis, Hypothesis Testing, Regression, Clustering
 - **Database Management:** Data Cleaning, Data Wrangling, SQL Optimization
-

WORK EXPERIENCE

HCL, Bangalore, India – Data Analyst

Sep '22 – Mar '24

- Designed and maintained scalable ETL pipelines using SQL and Python to integrate and transform large datasets from multiple sources.
- Developed and optimized interactive dashboards and KPI-driven reports in Tableau, enabling faster and more informed decision-making.
- Collaborated with cross-functional teams to define data requirements, build analytical views, and deliver solutions aligned with business goals.
- Optimized SQL queries and data models to reduce data retrieval latency and improve report performance, while implementing data quality checks and anomaly detection to ensure pipeline reliability.

PROJECTS

- **Sales Performance Dashboard** - Created an interactive Tableau dashboard to analyze sales trends, customer demographics, and product performance, enabling data-driven decisions.
 - **Customer Segmentation Analysis** - Implemented K-means clustering using Python (Pandas, Scikit-learn) and SQL to identify distinct groups based on purchasing behavior, enabling targeted marketing strategies.
 - **CRM Analytics in Palantir Foundry** - Built data pipelines and ontology models to integrate CRM datasets and track key metrics. Developed contour dashboards for real-time updates.
-

EDUCATION

Lindsey Wilson University - Columbia, KY

Aug '24 – Dec '25 (Expected)

- Master's in Data Science -- Relevant Coursework: Probability & Inference, Statistical Modeling, Machine Learning, Data Wrangling, Data Visualization, Big Data Analytics, SQL & Database Management, Predictive Analytics.

Sir M. Visvesvaraya Institute of Technology, Bangalore, India

July '22

- Electronics & Telecommunications Engineering -- Relevant Coursework: Mathematics, Advanced Mathematics, Software Engineering, AI & ML for signal Processing, Product Development & Process Planning.
