SUMMARY

Results-driven **Python Developer** with **6+** years of experience in building scalable, secure enterprise applications using **Java Full Stack, Python, Angular, and AWS**. Proficient in Java, Spring Boot, JSP, Hibernate, REST APIs, and microservices with hands-on cloud-native development and AWS migration. Skilled in backend/API development with **Flask/Django** and deploying serverless solutions using Lambda, S3, EC2, RDS, DynamoDB, Step Functions, and EventBridge. Experienced in **CI/CD** (Git, Jenkins, Docker, AutoSys) and infrastructure automation with CloudFormation. Strong in testing (JUnit, Mockito, Jasmine, Selenium), performance tuning, and database design (Oracle, SQL Server, MongoDB). Proven track record in **Agile** and **DevOps** environments across finance, healthcare, and tech domains.

CERTIFICATIONS

- [Certified AWS \(Solutions Architect – Associate\)](#)

SKILLS

Programming Languages: Python, Java, JavaScript, PHP, PL/SQL, UNIX Shell Script

Databases: SQL Server, MySQL, Oracle, MongoDB, DB2

Java/J2EE Technologies: Servlets, Spring, JPA, JTA, JDBC, JSP, JSTL, RMI, Applets

Frameworks: Struts 2.5, Hibernate 5.x, Spring 5.0, Spring Batch, Spring Security, Spring AOP, Spring Core, Spring IOC, JSF, Django, Flask.

Web Technologies: HTML, HTML5, CSS/CSS3, AJAX, jQuery, Bootstrap, XML, Grunt, Gulp, JSON

JavaScript Frameworks: AngularJS, Angular 8, jQuery, React.js, Node.js

Web Services: XSD, Apache Axis, SOAP, Restful, GraphQL

Messaging: JMS (Java Message Service), IBM MQ, Apache Active MQ, Apache Kafka

Web Application Servers: Oracle WebLogic 10.x/9.x, IBM WebSphere 8.x/6.x, Apache Tomcat 8.0/7.x/6.x

Methodologies: Agile, Waterfall, OOAD, SCRUM

Testing Tools: JUnit, Mockito, Jasmine, Karma, Mocha, Chai, Selenium.

Version Control: SVN, CVS, GIT

Build Tools: Maven, Gradle, ANT

IDEs: Eclipse IDE, RAD 6.0/7.0, IntelliJ IDEA, Spring Tool Suite (STS).

Operating Systems: Windows, Linux, and UNIX

Software: Visual Studio, Rational Rose, and Microsoft Office

WORK EXPERIENCE

FANNIEMAE

Python Developer

Dallas, TX

Jun 2023 - Present

Delivered data-driven solutions to modernize financial data pipelines, optimize storage and compute with AWS, and enhance data quality across securities and treasury systems—enabling accurate forecasting, risk analytics, and seamless cloud migration with minimal operational disruption.

- **Designed, implemented, and optimized** data storage and retrieval pipelines using **Amazon S3**, ensuring scalable, secure, and highly available storage solutions integrated with broader **AWS services**.

- Configured and maintained **Amazon SNS, SQS, and EventBridge** to support event-driven architectures, enabling real-time notifications across distributed **microservices**
- Provisioned and optimized **EC2** and **ECS** instances with best practices in auto-scaling, security hardening, and resource management for dynamic cloud workloads
- Designed, developed, and maintained scalable backend services using **Java** and Spring Boot, implementing RESTful APIs, integrating with relational and NoSQL databases, and ensuring high availability and performance across cloud-native applications.
- Orchestrated serverless workflows using **AWS Step Functions**, automating complex business logic and reducing operational overhead, and orchestrated tasks across **Lambda, DynamoDB, and RDS services**.
- Developed, deployed, and maintained serverless applications using **AWS Lambda**, enabling scalable, on-demand compute without infrastructure provisioning
- Maintained infrastructure-as-code using **AWS CloudFormation**, monitored systems with **CloudWatch Logs**, and ensured auditability using **CloudTrail**
- Led on-premises to AWS cloud **migration** initiatives, including re-architecting legacy applications for **cloud-native operation** with minimal downtime

Application Development & Migration

- Maintained and enhanced **on-premises** enterprise applications using **Spring Boot, Spring MVC, and Hibernate**, supporting key financial operations for **securities and treasury systems**
- Developed and exposed **RESTful APIs** using **Spring Boot**, integrating internal services and third-party systems.
- Designed efficient data access layers using **Hibernate ORM**, applying **lazy loading** and **query** optimization strategies
- Refactored **monolithic Java** applications into **modular, microservices-based architectures** using **Spring Boot**, enabling phased migration to the cloud
- Led **STEM component** modernization by rewriting **legacy codebases into modern Python frameworks** like **Flask Api, Django**, improving performance, maintainability, and extensibility
- Maintained hybrid **Java–and Python-based environments**, ensuring seamless integration across cloud and on-premises systems, and managed critical incident resolution
- Built and documented **ESB-based integrations**, enabling reliable service orchestration between **enterprise systems** and **external vendors**

Migration Support & Business Continuity

- Developed switch-over functionality to seamlessly **toggle** between on-premises and **cloud-based funding systems**, supporting uninterrupted business operations during **migration**.
- Conducted **end-to-end testing** for new features and integrations, ensuring compliance with software quality assurance standards

DevOps, Automation & CI/CD

- Implemented robust **CI/CD** pipelines using **Git, Jenkins, Docker, Nexus, and UrbanCode Deploy (UCD)** for efficient and repeatable application deployments
- Created **Dockerized microservices** for consistent builds and streamlined deployments to **ECS** and **EC2** environments
- Automated test execution and deployment flows, integrating unit and integration testing using **JUnit, Mockito, and Selenium in Java**, and **PyTest in Python**
- Scheduled and monitored critical batch jobs using **AutoSys**, reducing operational manual effort and ensuring reliability
- Developed **shell scripts** for task **automation**, environment provisioning, and log monitoring

Data & Analytics

- Performed **SQL-based** data analysis to uncover business insights and inform technical designs, integrating outputs into **Power BI dashboards** for executive-level reporting.
- Documented and translated business rules, technical requirements, and use cases into scalable technical solutions aligned with **SDLC best practices**

Team Collaboration & Agile Delivery

- Collaborate cross-functionally with product owners, architects, QA engineers, and business analysts in an **Agile environment**, ensuring timely delivery and alignment with business objectives.
- Contributed to knowledge-sharing, **code reviews**, and best practice implementation across the team.

- Worked in Agile teams, using **JIRA** and **Confluence** to track tasks, document systems, and ensure transparency across stakeholders.

LTI MINDTREE

Full Stack Developer

Dallas, TX

Mar 2023 - May 2023

Determined optimal site and tower utilization cadence by analyzing real-time job execution metrics, identified key drivers of operational throughput, and enabled data-driven scheduling strategies to enhance resource allocation and overall execution efficiency

- Developed dynamic, component-based UIs using **Angular 8**, **RxJS**, and **REST APIs** to display real-time job metrics and performance dashboards.
- Created **Power BI** dashboards for job execution insights, enabling data-driven resource optimization.
- Collaborated with stakeholders to translate requirements into responsive, **cross-browser-compatible UIs**.
- Improved front-end performance, reduced **API latency**, and **optimized load times**.
- Wrote unit tests using **Jasmine/Karma**, supported **SIT/UAT**, and followed **Agile** practices.
- Documented design specs and reusable **Angular** components for scalable frontend architecture.
- **Troubleshooting** and **debugging** critical issues using browser developer tools, logging mechanisms, and end-to-end diagnostic techniques.
- Applied responsive design and cross-browser compatibility best practices to ensure a seamless experience across devices and screen resolutions.
- Focused on **front-end** and **API optimization** to reduce server load, enhancing application stability during high traffic loads.
- Documented technical design specs, created reusable **Angular component libraries**, and contributed to the internal knowledge base to support future **scaling** and **maintainability**.

FANNIEMAE

Full Stack Developer

Dallas, TX

Feb 2022 - March 2023

Led application discovery and environment decoupling for legacy financial systems under the AMTM initiative at Fannie Mae, driving the redesign of core Spring Boot and Hibernate-based modules into cloud-compatible microservices and enabling a scalable modernization roadmap aligned with future-state architecture and long-term client engagement

- Modernized legacy **Java** applications into **Spring Boot**-based **microservices** under the **AMTM** initiative, enabling scalable cloud migration.
- Led the design and development of critical enterprise application components using **Java/J2EE**, **Spring Framework**, and modern open-source technologies.
- Played a key role in the Business Analysis & Decision Team, contributing to the full lifecycle development of applications like **Credit Works**, **Credit Portfolio Data Services**, **Reporting Center**, and **Credit Risk Portal**.
- Developed core modules using **Java**, **Spring**, **Hibernate**, and integrated with **INTEX** for **REMIC** pricing logic.
- Built **CRUD UI** components using **JSP**, **Struts**, **AJAX**, and **JavaScript** for admin workflow management.
- Designed high-volume data processing components using **Spring Batch**, **EMS**, and **Shell Scripts**.
- Authored Interface Control Documents (ICDs) and led secure module development using **encryption** for password management.
- Created **JUnit tests**, optimized database interaction by migrating **JDBC to Hibernate**, and maintained CI pipelines using Cruise Control.
- Participated in production deployments and performance tuning across **backend** and **database** layers.
- Led **debugging** and **production** support efforts, significantly reducing incident rates and improving overall system reliability.
- Conducted performance tuning by optimizing **memory usage**, **database queries**, and **server configurations**, ensuring support for scalable and highly available systems.

L&T INFOTECH

Full Stack Developer

Mumbai, India

May 2019 - Jul 2021

Analyzed drug safety reporting and user interaction patterns within the Pharmacovigilance platform to optimize data submission workflows, identified key factors affecting timely adverse event reporting, and implemented automation and personalized alerts to increase hospital staff engagement and reporting compliance.

- Designed and developed a full-featured Pharmacovigilance application using the **MEAN stack (MongoDB, Express.js, Angular, Node.js)** for ADR reporting.
- Built dynamic, responsive front-end interfaces in **Angular**, integrating **RESTful APIs**, form validations, and interactive charts for enhanced UX.
- Developed scalable **Node.js/Express.js APIs** for real-time data flow and seamless integration with **MongoDB**.
- Engineered advanced **MongoDB** schemas with validation, indexing, and optimized queries for efficient data handling.
- Implemented **JWT-based authentication** and **authorization** to secure sensitive healthcare data in line with **HIPAA-like standards**.
- Collaborated with **cross-functional stakeholders** to gather and translate business requirements into robust technical deliverables.
- **Automated** server monitoring, data extraction, and reporting with **Python scripts**, reducing manual tasks by 60%.
- Provided **L2/L3** production support for critical systems like CITRIX, PAS-X, GAS PLASMA, KEPWARE OPC, and EDHR2.
- Conducted root cause analysis and resolved performance issues to ensure high system availability.
- Participated in **Agile ceremonies** and collaborated with cross-functional teams using **JIRA** and **Confluence**.
- Performed unit and integration testing with **Jasmine, Karma (Angular), and Mocha (Node.js)** to ensure robust code quality.
- Followed **GitFlow** branching strategy using **Git** for version control and team collaboration.
- Conducted regular **code reviews**, promoting clean **coding practices** and **maintainability**.
- Deployed builds to **QA** and production using **Jenkins** and **Docker**, working closely with DevOps teams.
- Proposed and implemented workflow optimizations, reducing downtime by 30% and improving **deployment stability**.

EDUCATION

UNIVERSITY OF TEXAS AT DALLAS

MS in Business Analytics

GPA: 3.4/4

DALLAS, US

Aug 2021 - May 2023

AMRITA VISHWA VIDHYAPEETHAM

BTECH in Computer Science

GPA: 3.5/4

Coimbatore, India
