

Shiva Raj Tanneru | Java Full Stack Developer

Location: MO, USA | Phone: +1(913) 703-3923 | Email: shivarajtanneru.30@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven **Java Full Stack Developer** with **4+ years of experience** in designing, developing, and optimizing **scalable, cloud-native web applications**. Expertise in building **secure, high-performance applications**, migrating **monolithic systems to microservices**, and improving system efficiency. Skilled in **cloud-based deployments, DevOps practices, and CI/CD automation** to streamline development workflows. Adept at working in **Agile environments**, collaborating with cross-functional teams, and ensuring seamless integration between front-end and back-end systems. Strong focus on **performance optimization, system scalability, and reducing technical debt**. Seeking a **Java Full Stack Developer** role in the **US IT market**, leveraging experience in **cloud computing, microservices, and DevOps** to drive innovation and efficiency.

TECHNICAL SKILLS

Programming & Scripting: Java, JavaScript, TypeScript, HTML5, CSS3, SQL

Frameworks & Libraries: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JPA, Angular, RxJS, NgRx, Bootstrap, Material UI, Vue.js

API & Microservices Development: RESTful API Design, Microservices Architecture, Monolithic to Microservices Migration, API Documentation (Swagger, Postman)

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS), Docker, Jenkins, CI/CD Pipeline Implementation, Serverless Architecture

Database Management: MySQL, PostgreSQL, Oracle DB, Hibernate ORM, Query Optimization, Stored Procedures, Joins, Indexing

Version Control & Collaboration: Git, GitHub, Bitbucket, Branching Strategy, Code Reviews, Merge Conflict Resolution

Agile Methodologies & Tools: Agile (Scrum, Sprint Planning, Retrospective), Jira, Confluence, Trello, Asana

Build & Deployment Tools: Maven, Gradle, Docker, Jenkins, CI/CD Setup for Development-Staging-Production Environments

UI/UX & Front-End Optimization: Responsive Web Design, Cross-Browser Compatibility, Performance Optimization, and Collaboration with UI/UX Teams

Software & IDEs: IntelliJ IDEA, Eclipse, Visual Studio Code, Postman, Swagger UI, Microsoft Office Suite

WORK EXPERIENCE

Java Full Stack Developer | Dell Technologies, Missouri, USA

Aug 2024 - Current

- **Developed and optimized** cloud-native web applications using **Java, Spring Boot, and Angular**, delivering responsive and high-performance user interfaces across multiple devices.
- **Integrated RESTful APIs** with a microservices architecture, improving system efficiency and **reducing response times by 30%** while ensuring secure and seamless data exchange.
- **Transformed legacy monolithic applications** into microservices, enhancing system scalability and **improving maintainability by 40%**, reducing technical debt.
- **Implemented CI/CD pipelines** using **Jenkins and Docker**, automating deployments and ensuring consistent environment configurations, reducing deployment failures by **40%**.
- **Designed and maintained secure REST APIs** with **Java, Spring, and Hibernate**, ensuring high availability and efficient data retrieval in distributed environments.
- **Developed automated testing frameworks** with **JUnit and Selenium**, increasing test coverage by **25%** and reducing production defects through early vulnerability detection.
- **Integrated AWS** to improve cloud scalability, cost efficiency, and overall application performance, supporting enterprise-level deployments.

Technologies & Tools: Java, Spring Boot, Angular, Hibernate, RESTful APIs, Microservices, Jenkins, Docker, Selenium, JUnit, CI/CD, AWS, Monolithic to Microservices Migration, Agile, Git, DevOps

Java Full Stack Developer Intern | Dell Technologies, Missouri, USA

Mar 2024 - Jul 2024

- **Developed and optimized** full-stack web applications using **Java, Spring Boot, and Angular**, enhancing system performance and delivering an intuitive user experience.
- **Assisted in designing and integrating** RESTful APIs, working closely with senior developers to **reduce response times by 15%**, ensuring seamless communication between front-end and back-end services.
- **Improved microservices deployment efficiency** by containerizing applications with **Docker**, leading to a **20% increase in deployment speed and scalability**.
- **Contributed to AWS-based cloud solutions**, implementing **secure and serverless data management systems**, reducing infrastructure costs and improving resource optimization.
- **Performed unit and integration testing** with **JUnit and Selenium**, identifying and resolving defects early, leading to a **30% reduction in post-release bugs** and improved software reliability.
- **Collaborated with cross-functional teams** to enhance CI/CD pipelines and deployment workflows, gaining hands-on experience in **Agile development and DevOps practices**.

Technologies & Tools: Java, Spring Boot, Angular, RESTful APIs, Microservices, Docker, AWS, Serverless Computing, JUnit, Selenium, CI/CD, Agile, Git

Software Engineer | Accenture Sol. Pvt. Ltd., Hyderabad, India

Oct 2021 - Dec 2022

- **Developed and optimized** full-stack web applications using **Java, Spring Boot, Angular, and SQL**, delivering **highly scalable and efficient solutions** while ensuring code maintainability and performance.
- **Designed, built, and maintained Spring Boot microservices**, decoupling monolithic applications to support **independent deployments**, improving system reliability, and increasing availability.
- **Developed and implemented** RESTful APIs to facilitate **secure and scalable data exchange** between front-end and back-end services, **reducing API response times by 20%**.
- **Collaborated with UI/UX teams** to develop **dynamic and responsive Angular components**, enhancing user engagement and ensuring seamless cross-platform compatibility.
- **Optimized database performance** using **Hibernate ORM and SQL**, improving data persistence, **reducing query execution time by 30%**, and enhancing overall system efficiency.
- **Integrated third-party services and APIs**, automating **CI/CD pipelines with Jenkins and Docker**, which **accelerated deployment speed by 40%** and improved operational efficiency.

Technologies & Tools: Java, Spring Boot, Angular, SQL, Hibernate, RESTful APIs, Microservices, Jenkins, Docker, CI/CD, UI/UX Collaboration, Agile, Git

Java Full Stack Developer | Genius Soft Tech, Hyderabad, India **Jan 2020 – Sep 2021**

- **Developed and optimized** dynamic web applications using **Java, Spring Framework, and Angular**, enhancing system functionality and delivering **responsive, high-performance user interfaces**.
- **Architected and implemented** a **microservices-based system**, enabling modular development and independent deployments, leading to a **20% improvement in scalability and reliability**.
- **Designed and integrated** secure **RESTful APIs** with external authentication services, improving system interoperability and streamlining the **front-end experience using Vue.js**.
- **Enhanced backend efficiency** by implementing **JPA for ORM and PostgreSQL for database management**, **reducing query execution times by 18%** and improving data transaction speeds.
- **Implemented Agile best practices**, actively participating in **sprint planning, backlog refinement, and retrospectives**, ensuring the timely delivery of high-priority features.
- **Deployed cloud-native applications on AWS**, leveraging cloud storage and computing resources to **increase operational efficiency and reduce infrastructure costs by 23%**.
- **Boosted system reliability** through **comprehensive unit and integration testing** with **TestNG and PowerMock**, achieving **92% test coverage** and minimizing post-deployment defects.

Technologies & Tools: Java, Spring Framework, Angular, Vue.js, Microservices, JPA, PostgreSQL, RESTful APIs, AWS, TestNG, PowerMock, Agile, CI/CD, Git

EDUCATION

Master of Science in Computer Science University of Central Missouri	May 2024
Bachelor of Technology Computer Science and Engineering Gokaraju Rangaraju Institute of Engineering and Technology (JNTUH Affiliated)	May 2021

CERTIFICATION

Full Stack Java Developer (84-hour course) | Udemy | **MuleSoft 4** (51-hour course) | Udemy | **Database Programming with SQL** | Oracle Academy | **Python 3.4.3 Training** | IIT Bombay | **Introduction to Internet of Things** | NPTEL Online Certification | **User-Centric Computing for Human-Computer Interaction** | NPTEL Online Certification
