

PROFESSIONAL SUMMARY:

3+ years of experience as a Data Analyst leveraging expertise in predictive analytics, ETL processes, machine learning, and data visualization to drive impactful insights in healthcare and finance. Proficient in patient stratification, risk modeling, fraud detection, and regulatory compliance. Technical skills include Snowflake, Azure Data Factory, SSIS, EPIC, Facets, claims systems, Tableau, Scikit-learn, XGBoost, Python (Pandas, NumPy), ICD-10, CPT, LOINC, HIPAA, HITECH, Apache NiFi, Databricks, PySpark, Power BI, AML, KYC, R, Talend, AWS Redshift, SAS.

TECHNICAL SKILLS:**Programming Languages:** Python, R, SQL**Python Libraries:** Pandas, NumPy, Scikit-learn, XGBoost, PySpark**Data Visualization:** Tableau, Power BI**Machine Learning & Modelling:** Scikit-learn, XGBoost, R (statistical modeling), SAS (risk scorecards), PySpark (model training), A/B Testing**ETL & Data Integration:** Azure Data Factory, SSIS, Talend, Apache NiFi**Big Data & Cloud Platforms:** AWS Redshift, Azure**Healthcare & Medical Coding:** ICD-10, CPT, LOINC, EHR, EPIC, Facets, HEDIS, SDOH**Data Governance & Compliance:** HIPAA, HITECH, PHI/PII Masking, AML, KYC**Statistical Techniques:** Predictive Analytics, Risk Stratification, Forecasting, Credit Risk Modeling, Fraud Detection, Exploratory Data Analysis (EDA), Statistical Modeling**Data Processing & Pipelines:** ETL Pipelines, Data Ingestion, Data Cleansing, Data Transformation, Data Validation**DevOps & Automation:** Apache NiFi, Automation Scripts (Python), Caching Mechanisms**Security & Encryption:** PHI/PII Encryption, Compliance Monitoring**PROFESSIONAL EXPERIENCE:****CVS Health – PA | Data Analyst | Aug 2024 – Present**

- Spearheaded a predictive analytics initiative that reduced chronic care costs by 18%, using patient stratification models and targeted engagement strategies for high-risk populations.
- Improved dashboard response time by 35% by optimizing Snowflake queries and implementing caching mechanisms to accelerate access to claims and EHR data.
- Designed and implemented robust ETL pipelines using Azure Data Factory and SSIS to ingest, cleanse, and transform structured/unstructured data from EPIC, Facets and claims systems into a centralized analytics warehouse.
- Developed interactive Tableau dashboards to visualize key healthcare indicators, including chronic disease trends (diabetes, CHF), HEDIS quality metrics, patient utilization patterns and readmission rates.
- Built and deployed machine learning models using Scikit-learn and XGBoost to predict patient 30-day readmission risk and emergency department (ED) visit likelihood, achieving a model accuracy of 87%.
- Created risk stratification algorithms integrating clinical, behavioural and social determinants of health (SDOH) data using Python libraries (Pandas, NumPy), improving care management prioritization.
- Standardized diagnosis, lab and procedure data by mapping to ICD-10, CPT and LOINC code sets, enhancing interoperability and supporting value-based care reporting.
- Ensured HIPAA and HITECH compliance by implementing automated PHI/PII masking and encryption across all analytics workflows, reducing audit risk and enhancing data governance.
- Automated ingestion and validation of EHR feeds using Apache NiFi, enabling real-time data quality monitoring and reducing manual data entry errors by 42%.
- Utilized Databricks with PySpark to perform large-scale exploratory data analysis (EDA) and model training on millions of records from claims, pharmacy and eligibility datasets.

BitInfoCom Technologies – India | Data Analyst | April 2021 - July 2023

- Spearheaded the design & implementation of a sophisticated credit risk model utilizing advanced statistical techniques, resulting in a 30% enhancement in risk assessment accuracy, thereby enabling more informed lending decisions.
- Engineered and deployed machine learning-based fraud detection algorithms that successfully identified and mitigated fraudulent transactions, achieving a 15% reduction in fraud-related losses and safeguarding the bank's assets.
- Developed dynamic and user-friendly dashboards in Power BI for real-time monitoring of key performance indicators (KPIs), which accelerated decision-making processes by 40% and provided stakeholders with actionable insights.
- Partnered with compliance and risk management teams to ensure adherence to Anti-Money Laundering (AML) and Know Your Customer (KYC) regulations, conducting thorough data analysis to identify potential compliance risks.
- Leveraged Python and R for advanced statistical modelling and predictive analytics, resulting in a 20% improvement in forecasting accuracy for financial trends and customer behaviour.
- Oversaw the end-to-end ETL (Extract, Transform, Load) processes using Talend, optimizing data workflows and achieving a 35% reduction in data processing time, which enhanced the overall efficiency of data operations.
- Conducted rigorous A/B testing on various marketing initiatives, leading to a 10% increase in customer engagement and conversion rates, thereby driving revenue growth through data-driven marketing decisions.
- Designed and maintained robust data pipelines in AWS Redshift, ensuring high data integrity and availability for analytical purposes, which supported timely reporting and strategic planning.
- Actively participated in user acceptance testing for new dashboard features, achieving a 95% satisfaction rate from stakeholders by ensuring that the final product met user requirements and enhanced usability.
- Created and refined risk scorecards utilizing SAS analytics, significantly improving the credit decision-making process by providing quantifiable risk assessments that informed lending strategies.

EDUCATION:**Master of Technology Management** - Pittsburg State University, Pittsburg, KS, USA**Bachelor of Technology** - KG Reddy College of Engineering and Technology, Hyderabad, India
