

SHIVAM NIRWANI

Arlington, TX | 📞 +1(817)-676-4965 | ✉️ shivamnirwani31@gmail.com | [in LinkedIn](#)

SUMMARY

Dedicated and results-driven Software Engineer with **3+ years** of professional experience in designing, developing, and maintaining high-performance solutions. Proficient in implementing CI/CD pipelines for efficient software delivery and managing ETL processes for effective data integration and transformation. Experienced in data processing and data analysis using various programming languages, tools, and technologies, and known for strong problem-solving skills and commitment to staying current with industry trends.

TECHNICAL SKILLS

Programming Languages: Python, C++, C, Java, JavaScript, PHP, Node.js, HTML, CSS.

Frameworks: React, Selenium, MEAN Stack, Spring MVC, Hibernate, REST, Angular, Laravel, Django, Flask.

Database: Scala, Apache Pig, Hive, PostgreSQL, MongoDB, MySQL, Hadoop, Spark, Oracle, PhpMyAdmin.

Version Control and CI/CD Tools: Git, GitHub, Jenkins, Docker, Kubernetes.

Project Management Tools: Visual Studio, PyCharm, IntelliJ, Eclipse, Postman, JIRA, Figma, Swagger, Android Studio, Maven, Junit.

Cloud Experience: AWS (Amazon Web Services), Google Cloud Platform (GCP), Azure, IBM Cloud, Oracle Cloud, Firebase.

WORK EXPERIENCE

JJTECH Systems Inc. | Alpharetta, GA, USA

May 2024 – Present

Software Engineer

- Developed responsive web applications using Java, JavaScript, HTML, and CSS, leveraging AWS services such as Elastic Beanstalk for application deployment, S3 for static asset storage, and CloudFront for content delivery to ensure scalability and high performance.
- Created and optimized user interfaces with **React.js**, improving user experience through iterative design and rapid prototyping.
- Automated backend processes using **Python** scripts for data processing and integrated them with **RESTful** services to streamline workflows.
- Collaborated in an **Agile** environment using **JIRA** for task management and **Jenkins** for continuous integration and deployment, improving delivery speed and quality.
- Used **Git** for version control, **Postman** for **API** testing, and **Docker** for containerization, ensuring consistency across different environments.

Ruteksystems LLC | Iselin, NJ, USA

Mar 2024 – May 2024

UI Developer

- Developed and refined software programs by analyzing **workflows**, creating diagrams, and applying knowledge of computer capabilities, enhancing overall program efficiency.
- Developed interactive dashboards and **user interface** designs using **Power BI**, creating prototypes and visual workflows to enhance user experience and data accessibility.
- Created Proof-of-Concepts (POCs) with **HTML**, **CSS**, **JavaScript**, **jQuery**, **ReactJS**, **Redux**, **Angular**, and **NodeJS** to validate new features and functionalities.
- Assisted in programming team activities by supporting task coordination, conducting **code reviews**, and providing feedback to peers while learning best practices in **software development**.
- Utilizing tools like **JIRA** for project tracking and ensuring alignment with project timelines and objectives.

University of Texas at Arlington | Arlington, TX, USA

Jul 2023 – Jan 2024

Research Assistant

- Enhanced independence for individuals with disabilities by leveraging advanced technologies, including **computer vision** and **machine learning** algorithms.
- Utilized **YOLOv8** to analyze a dataset of over **10,000 images**, achieving **95%** accuracy in data recognition for improved object detection.
- Developed innovative solutions to assistive technology challenges, focusing on real-world applications of **data recognition** and **signal processing**.
- Transformed **EEG and EOG** signals from 14 participants into numerical data using **neural networks**, enabling more accurate interpretation of brain and eye activity.
- Conducted thorough **evaluations** of technology effectiveness, ensuring that solutions were **user-friendly** and met the needs of individuals with disabilities.

- Developed and Deployed a **CI/CD** Pipeline leveraging **Jenkins** and **Docker** for the marketplace web application, ensuring efficient and automated testing, integration, and deployment processes. This pipeline reduced deployment times by 40% and enhanced consistency across environments.
- Implemented Data Extraction, Transformation, and Loading (**ETL**) Processes using **AWS Lambda** functions triggered by **Amazon EventBridge** to manage data ingestion from various sources into **MongoDB**. This cloud-native approach streamlined real-time data updates and enabled accurate product availability and personalized user recommendations.
- Collaborated on **NoSQL** Optimization and data architecture design in **MongoDB**, refining over 500 aggregation queries and achieving significant improvements in data retrieval speed and query execution efficiency for analytics reports and recommendations.
- Automated End-to-End Testing through **JUnit**, **Selenium**, and **Postman** integrated within the **CI/CD** pipeline, allowing continuous validation of new features and maintaining code quality and application reliability in each deployment phase.
- Enhanced Real-Time Communication and User Engagement by implementing **WebSocket** protocols (**Socket.IO**) for live product tracking and notifications, ensuring seamless interaction for services like movers and packers.

PROJECTS

SIREMAR | Cloud, HTML, CSS, React, PHP, Laravel

- Created a comprehensive website for population registration and streamlined associated administrative procedures and benefits.
- Maintained the database using PhpMyAdmin and MySQL to ensure optimal data management and performance.
- Hosted of the web application on UTA Cloud, ensuring its accessibility and performance optimization.

DSV | HTML, CSS, React, JavaScript

- Designed and developed interactive Data Structure Visualizations website to enhance the educational experience and make abstract concepts more accessible to learners with a responsive and user-friendly interface.
- Utilized JavaScript for the implementation of data structure algorithms and used dynamic animations for engaging learning environment.

DATA SCIENCE SALARY ESTIMATOR | Python, Selenium

- Designed a tool that estimates data science salaries to help data scientists negotiate their income during HR interview.
- Scraped over 1000 job descriptions from Glassdoor using Python and Selenium.
- Engineered features from the text of individual job description to quantify the value companies put on Python, AWS, and Spark.

AWS GPT | Amazon Web Services

- Cloud-based speech-to-speech bot capable of answering user queries using natural language processing and speech synthesis.
- Implemented Amazon Transcribe for speech-to-text conversion and Amazon Polly for text-to-speech conversion.

STOCK PRICE PREDICTION | Python, Machine Learning

- Developed a deep learning-based Python project to forecast future market trends by analyzing historical stock data from five companies spanning the past 5 years.
- Achieved 96% accuracy by implementing Convolutional Neural Network (CNN) model.

CERTIFICATIONS

- AWS Certified Solutions Architect
- AWS Certified Machine Learning Engineer
- Microsoft Technology Associate

EDUCATION

Master of Science in Computer Science

University of Texas at Arlington, USA, GPA 3.5/4.0

Aug 2021 – May 2023

Bachelor of Engineering in Computer Science

Rajiv Gandhi Proudhyogiki Vishwavidyalaya, India, GPA 3.5/4.0

Aug 2016 – May 2020
