Education

University of Massachusetts, Boston

Jan 2023 - Dec 2024

Information Technology

Ajeenkya Dy Patil, India

Sep 2017- June 2021

Information Technology

Skills

Scripting & Automation: Python, Bash, Shell scripting, SQL, UNIX shell, Perl

Operating Systems: Proficient in Linux/Unix system administration and troubleshooting

Monitoring & Automation Tools: Splunk, Grafana, AWS CloudWatch, ServiceNow, JIRA

Networking & Real-Time Technologies: TCP/IP, UDP, SNMP, Multicast

Experience

VIS Global Inc- IT Analyst Consultant

Mar 2025- Present

- Led **Linux-based systems monitoring and troubleshooting** for global infrastructure covering NA, EU, and APAC regions.
- Automated frequent tasks and daily checks using **Python and UNIX shell scripts**, reducing manual effort and response time.
- Actively managed **incident lifecycle**, ensuring timely communication with impacted groups and tracking resolutions through RCA.
- Partnered with application and infrastructure teams to ensure **resilient and compliant system configurations** and coordinated production change verifications.
- Developed and documented scripts to support **ready-for-business checks, alerting, and log rotation** on production systems.
- Coordinated with third-party vendors and exchanges to resolve **real-time connectivity and market data issues**.

Fiserv- Associate System Engineer

Jan 2022 – Jan2023

- Supported critical infrastructure in the **Payment domain**, responding to system issues and conducting post-mortems to identify root causes.
- Built real-time dashboards and alerts using **Splunk and custom scripts**, improving visibility into performance bottlenecks.
- Worked closely with database teams to run and optimize **Oracle and MySQL queries** for issue resolution.
- Acted as a liaison between development, QA, and operations to drive system **stability, change coordination, and DR preparedness**.
- Used **network diagnostic tools** to identify failures and latency issues, improving system uptime and transaction throughput.

Verzeo - Data Science Intern

Feb 2020 - April2020

- Conducted **sentiment analysis using Python & SQL**, leveraging data-cleaning techniques for quality insights.
- Developed **ETL pipelines** for large-scale data processing, optimizing **AWS S3 & Snowflake** storage.

Projects

NYPD Crime Analytics |TABLEAU

- Uncovered crime patterns and forecasted trends using Tableau to support data-driven decisions for public safety

Data Integration and Analytics | Snowflake & Amazon S3

- Integrated large datasets from Amazon S3 into Snowflake to enable seamless data analysis and reporting, improving data accessibility and supporting strategic insights.
