

Shivam Vispute

Software Developer

CA| (501) 232-1899 | shivam.v@newjobrequire.com

SUMMARY

Software Developer with 3+ years of experience specializing in **Python** development, delivering robust and scalable solutions for enterprise applications. Proficient in **Django**, **Flask**, and **FastAPI** for building high-performance web applications and APIs, with expertise in **MySQL**, **PostgreSQL**, and **MongoDB** for efficient data management. Skilled in leveraging **AWS**, **Docker**, and **Kubernetes** to deploy and manage microservices architectures, complemented by hands-on experience with **CI/CD pipelines** using **Jenkins**. Adept at implementing **Agile** and **Kanban** methodologies to ensure the timely delivery of projects while maintaining high code quality through **PyTest** and **Selenium** testing.

SKILLS

Methodologies: Agile, Scrum, Kanban, SDLC

Programming Languages: Python (Advanced), JavaScript, SQL, HTML/CSS

Frameworks & Libraries: Django, Flask, FastAPI, Pandas, NumPy, Scikit-learn, TensorFlow

Tools & Platforms: Git, Docker, Kubernetes, Jenkins, AWS (S3, EC2, Lambda), CI/CD pipelines

Databases: MySQL, PostgreSQL, MongoDB, SQLite

Testing & Debugging: PyTest, Unittest, Selenium, Debugging with PyCharm and VS Code

Other Technical Skills: RESTful APIs, GraphQL, Microservices architecture

Soft Skills: Problem-solving, teamwork, effective communication, time management

Other: Machine Learning (scikit-learn, TensorFlow basics), Data Structures, Algorithms, Linux

EDUCATION

Master of Science in Computer Science

May 2025

California State University Long Beach, Long Beach, CA

Bachelor of Engineering in Computer Engineering

May 2022

Savitribai Phule Pune University, Pune, India

EXPERIENCE

DXC Technology, CA - Software Developer

Nov 2024 – Current

- Developed and optimized **RESTful APIs** using **FastAPI** and **PostgreSQL**, enhancing system performance by 25% for a high-traffic enterprise application.
- Spearheaded the adoption of **Kanban** methodology, improving workflow visibility and reducing task completion time by 20% for a team of 6 developers.
- Deployed containerized applications using **Docker** and **Kubernetes** on **AWS EC2**, achieving 99.8% service availability for critical client services.
- Built machine learning pipelines with **Scikit-learn** and **Pandas**, enabling predictive analytics for client data, which improved decision-making accuracy by 15%.
- Automated testing processes using **PyTest** and **Selenium**, achieving 90% test coverage and reducing regression defects by 30%.
- Utilized **Git** for efficient version control, implementing branching strategies that streamlined code integration and cut merge conflicts by 35%.
- Demonstrated strong **teamwork** and **communication skills** by collaborating with stakeholders during Agile sprints, ensuring alignment on project goals and timely deliveries.

Infinite Infolab, India - Software Developer

Jan 2021 – July 2023

- Engineered web applications using **Django** and **MySQL**, delivering secure user management features for a healthcare platform, improving user onboarding by 20%.
- Implemented data processing workflows with **NumPy** and **Flask**, enabling real-time insights for business intelligence dashboards, reducing report generation time by 30%.
- Configured **AWS S3** for scalable storage solutions, optimizing data retrieval for analytical applications with large datasets.
- Conducted thorough debugging using **VS Code** and wrote unit tests with **Unittest**, ensuring robust code quality with minimal production issues.
- Contributed to **Agile** sprint planning and retrospectives, driving a 10% increase in team efficiency through process improvements.
- Developed responsive front-end interfaces using **HTML/CSS** and **JavaScript**, enhancing user experience for client-facing web portals.
- Designed and queried **MongoDB** databases for a microservices-based application, improving data access speed by 25% for real-time features.
- Leveraged **Linux** scripting for task automation and deployment, reducing manual operational tasks by 15% and boosting team productivity.

PROJECTS

Enterprise Application Performance Optimization

- Developed and optimized **RESTful APIs** using **FastAPI** and **PostgreSQL**, resulting in a **25% performance boost**.
- Containerized and deployed** the application using **Docker** and **Kubernetes** on **AWS EC2**, ensuring **99.8% service uptime**.
- Implemented ML pipelines** using **Scikit-learn** and **Pandas** for client data modeling, improving **decision accuracy by 15%**.
- Championed the **Kanban agile methodology**, reducing **task cycle time by 20%** for a team of 6.

Healthcare Intelligence Platform

- Developed secure web modules using **Django** and **MySQL**, improving **user onboarding by 20%**.
- Designed real-time BI workflows using **NumPy** and **Flask**, reducing report generation time by **30%**.
- Engineered **responsive front-end UIs** with **HTML**, **CSS**, and **JavaScript**, enhancing the **user experience** for clinicians.
