

SHIVANGI MODI

Milpitas, CA | smodi0123@gmail.com | +1 (408) 640-4201 | <https://www.linkedin.com/in/shivangimodi0123> | [GitHub](#)

Objective:

Detail-oriented and results-driven Data Analyst / Data Scientist with a strong foundation in Computer Science and hands-on experience in data analysis, machine learning and visualization. Adept at transforming raw data into actionable insights using tools like Python, SQL, Power BI, Tableau and Machine Learning Frameworks.

Education:

San Francisco Bay University, Fremont, CA	2024 to May 2025
<i>Master of Science (M.S.) in Computer Science</i>	<i>GPA: 3.83/4.00</i>
Gujarat Technological University, Ahmedabad, India	2017 to 2019
<i>Master of Engineering (M.E) in Computer Engineering</i>	<i>GPA: 4.00/4.00</i>
Gujarat Technological University, Ahmedabad, India	2013 to 2017
<i>Bachelor of Engineering (B.E) in Computer Engineering</i>	<i>GPA: 3.83/4.00</i>

Technical Skills:

Languages: Python, SQL, Java, C/C++, JavaScript, HTML5, CSS3

Libraries/Tools: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, PyTorch, OpenCV, NLP, EDA

Data Tools: Power BI, Tableau, MS Office (Excel, PowerPoint, Word, Outlook), Google Sheets, ETL, Data Modeling, Regression Models, Statistical Analytics, Time Series Forecasting, A/B Testing, Hypothesis Testing, GenAI

Cloud & Big Data: AWS, GCP, Apache Spark, Hadoop, Docker, Kubernetes, CI/CD, GPU

Databases: MySQL, PostgreSQL, MongoDB, Oracle, SQL Server

Other Tools: Jupyter, Google Colab, Git, GitHub

Soft Skills: Analytical thinking, Problem-solving, Cross-functional Collaboration, Strategic Thinking, Communication

Experience:

Data Analyst Intern at Gabriel AI, Remote	July 2025 to Present
- Analyzed client and voice interaction record datasets using Python, SQL, and Excel to identify trends and provide actionable insights for strategic decision-making. - Analyzed social platform and follower behavior data to uncover patterns and provide insights for growth strategies.	
Data Analyst Intern at K Enterprises, Remote	Mar 2025 to May 2025
- Collected and cleaned large datasets on Commonwealth countries' SDG indicators using Python and SQL, ensuring data quality and consistency. - Performed exploratory data analysis, built Tableau/Power BI dashboards, and extracted actionable insights to support data-driven policy recommendations.	
AI/ML Developer (Volunteer) at Health4TheWorld, Milpitas, California	May 2023 to Dec 2023
- Designed and deployed a healthcare-focused chatbot using NLP techniques, improving patient engagement and expanding access to medical education. - Applied data cleaning, EDA, and text preprocessing to enhance model performance. - Achieved 98.9% model accuracy rate for generating video summaries, leveraging Glasp/ChatGPT summarizer tools.	
Data Scientist at National Institute of Technology (NIT), Surat, India	July 2019 to Nov 2022
- Developed and optimized machine learning pipelines for offensive language detection and object recognition, resulting in improved precision and recall metrics. - Analyzed large structured/unstructured datasets using Python and SQL to derive insights. - Collaborated with data engineers to scale ML models, while communicating results to non-technical stakeholders.	

Projects:

Predictive Analytics for Salary Trends Python, Google Colab, SQL, Power BI, Excel
- Performed data cleaning, transformation, and regression analysis to predict salary trends by selected features. - Created Power BI dashboards to visualize patterns, empowering HR teams with actionable compensation insights. - Improved predictive accuracy by 25% through feature engineering and model tuning.
E-commerce Customer Segmentation & A/B Testing SQL, Python, Pandas, Tableau
- Used RFM analysis and k-means clustering to segment customers based on purchasing behavior. - Designed and evaluated A/B tests for marketing campaigns, increasing CTR by 15% in high-value segments. - Built Tableau dashboards to visualize customer personas and campaign results for business teams.
Visual Question Answering (VQA) using Deep Learning Python, TensorFlow, Keras, NLP, OpenCV
- System predicts the answer to a given question related to semantic presents in the image. - Utilized pre-trained deep learning models and achieved accuracy rate of 91.1% and average time 0.83 sec, indicating that system accurately predicts the answer to a given question.
Retail Product Self-Checkout System Python, OpenCV, YOLOv8, T4 GPU, Flask, Ngrok, GCP
- Developed a Flask-based web application integrated with a YOLOv8 model to detect retail products from images and generate automated bills using a predefined product price database. - Ensured scalability with cloud storage and making the system suitable for self-checkout solutions in retail stores.

Certificates

- Coursera certified course Analyze Data to Answer Questions by Google, 2025 - [\[Credential\]](#)
- Kaggle certified course Intro to Machine Learning, 2023 - [\[Credential\]](#)
