Professional Summary

With a robust background in business finance and a master's degree in Decision Analytics from Virginia Commonwealth University, I bring a unique blend of financial acumen and data analysis skills to the table. My passion lies in translating complex data into actionable insights. I am adept at utilizing various data systems and statistical software to drive business growth. Beyond technical expertise, I possess essential soft skills such as critical thinking, problem-solving, and effective communication honed through academic and professional experiences. I thrive in collaborative environments and actively seek ways to enhance processes and foster innovation. My commitment to continuous learning and my ability to adapt to diverse challenges make me a dedicated problem solver and a strong advocate for high-quality work.

Work Experience

Elan Technologies Inc: Data Analyst

Irving, TX, Feb'24 - Present

- Developed a predictive model using multi-variable regression analysis to forecast product spread values. Quantified accuracy with metrics like *MAE* & *RMSE* boosting trading profits.
- Developed & maintained *10 dashboards* using data visualization tools (Power BI) enabling real-time tracking of program effectiveness and improving resource allocation by *20%*.
- Optimized data storage & retrieval process using Snowflake resulting in a *30% reduction* in query response time & a *40% improvement* in overall data analysis efficiency. Presented data-driven recommendations to leadership.

Strategic Analysis India Pvt. Ltd: Statistical Analyst

Gurgaon, IND, Jul 2018 - Aug 2022

- Created *5 interactive dashboards* in Tableau for weekly comparison of operational & performance KPIs. Developed diverse report types by integrating analyses from SPSS and SAS resulting in *25% revenue increase*.
- Developed dashboards for inventory optimization, compliance & PO status from ERP to build supplier priority network.
- Managed stakeholders across the account management, operations, & product teams to help solve data discrepancy issues. Facilitated informed decision-making with a *15% improvement* in model accuracy optimizing predictions.
- Streamlined file navigation by developing Python scripts to map drives to hierarchical tree format, resulting in *20% search time reduction*. Consulted on sales performance, GTM strategies, & KPI optimization.

Bansal Gupta & Associates: Financial Analyst

Ghaziabad, IND, Aug 2015 - Jun 2018

- Created customer satisfaction dashboards using Tableau. Identified & addressed service issues thereby contributing to a *15% improvement*. Conducted regular updates of Accounts Payable and supported profitability modernization projects through month-end reconciliations. Assisted clients in preparing Balance Reconciliation Statements (BRS).
- Conducted variance analysis in Excel revealing a *\$95K consulting revenue* shortfall below budget due to lower utilization rates. Implemented strategies to increase utilization resulting in *12% recovery*.
- Created an Excel forecasting model with historical data achieving *5% accuracy* in predicting next year's expenses.

Education

Master of Science, Decision Analytics: Virginia Commonwealth University, Richmond, VA

Dec. 2023

Coursework: Econometrics, Advanced Decision Analytics, Decision & Risk Analytics, Business Data Analytics, Database Systems, Forecasting Methods, Quality Management & Six Sigma

GPA: 3.9/4

Bachelor of Commerce, Honors: Jesus & Mary College, University of Delhi, India

July 2015

Coursework: Business Statistics, Human Resource Management, Financial Accounting, Auditing & E-Commerce, International Business, Fundamentals of Investment, Principles of Marketing, Corporate Accounting, Macro Economics, Corporate Laws

GPA: 3.74/4

Academic Projects

Risk Modelling, Decision Dilemma for International Students

Richmond, VA, Spring 2023

- Developed a risk model using Precision Tree in Palisade Decision tools and Sentiment Analysis to identify drivers behind the career choices of STEM students in the USA and India.
- Adopted by Virginia Commonwealth University's career services as an aid for F-1 students' decision-making process.

Pallet Allocation Optimization for the Interchange Group

Richmond, VA, Spring 2023

- This project involved designing a decision support framework for the Interchange Group, Inc., a logistics company that provides blast-freezing services for poultry and meat products. It helped to increase the throughput of poultry and other meat products by *40% after optimizing* blast freezer allocation.

Song Success Prediction: Comparative Classification Modeling on Spotify

Richmond, VA, Fall 2023

- Through this project I successfully developed a classification model using the KNN algorithm providing accurate predictions of a song's success. The evaluation of multiple models revealed KNN as the most effective with notable performance metrics. These insights shed light on the influential factors affecting the success of songs on Spotify.

Skills

Software Tools-Snowflake, SAS, SQL, SAP, Python, R, Power BI, Agile, Databricks, SSIS, Minitab, Excel, Tableau, Salesforce, Oracle
Hard Skills - Data Modeling, Data Visualization, Data Manipulation, Financial Analysis, Statistical Data Analysis, ERP Systems, Process Improvement, Business Strategy, Leadership, Project Organization, Teamwork, Collaborative Problem Solving, Vendor Relations, Data & Process Modeling, Supplier Development, Market Research, Budget Planning, Continuous Improvement

Certifications

- Introduction to Data Science
- Lean Six Sigma - Green Belt
- Introduction to Data Analytics
- FBI Cybersecurity
