📍 Denton, TX | 📞 469-768-0662 | ✉ bodushivani2601@gmail.com | 🔗 linkedin.com/in/bodu-shivani-433b39215

PROFESSIONAL SUMMARY

Experienced Data analyst with 2 years of experience in data analytics and software development who knows SQL, Python and power BI to visualize data, clean data and predict data. Skilled in the design of pipelines and data warehousing systems to automate the workflow and enhance the level of data quality. Familiar with AWS and Azure cloud systems, combining the data on the work of different sources to provide the appropriate business intelligence (BI) dashboards and report KPI on the basis of which strategic decisions are made.

EDUCATION

University of North Texas, Denton, TX | Jan 2024 – Dec 2025

Master of Science in Data Engineering (GPA: 3.77)

Anurag College of Engineering, Hyderabad, India | Jul 2018 – Jul 2022

Bachelor of Technology in Computer Science and Engineering (GPA: 3.07)

PROFESSIONAL EXPERIENCE

Stanvac Systems | Data Analyst | Jul 2021 – Aug 2023

- Designed and deployed interactive dashboards in Power BI and Tableau, providing real-time insights into financial and e-commerce KPIs that improved executive decision-making.
- Automated reporting workflows using SQL and Python, saving 10+ hours weekly and minimizing manual errors.
- Analyzed 2M+ rows of sales and financial data using advanced SQL queries to uncover cost-saving opportunities that improved profitability by 8%.
- Performed customer segmentation and churn analysis with Python and SQL, enabling targeted campaigns that increased retention by 12%.
- Conducted inventory and logistics analytics, identifying bottlenecks that reduced delivery delays by 22% and lowered fulfillment costs.
- Integrated data from 10+ sources (APIs, Excel, databases) to create unified reporting for financial and performance metrics.
- Partnered with engineering teams to optimize ETL pipelines, improving data refresh rates by 40% and ensuring consistent, accurate reporting.

TECHNICAL SKILLS

Programming & Analytics:

SQL (Window Functions, CTEs, Optimization), Python (Pandas, NumPy, Matplotlib, Seaborn) ,

Visualization & BI Tools:

Tableau, Power BI, Looker (Familiarity), Excel (Advanced)

Machine Learning & AI:

Scikit-learn, TensorFlow, PyTorch, AI Builder

ETL & Data Engineering:

SQL Pipelines, Python ETL Scripts, Apache Airflow, Alteryx, Talend

Statistical Analysis:

Hypothesis Testing, Time Series, A/B Testing, Regression, Forecasting, Clustering, Classification, Data Analysis

Cloud & Databases:

AWS (S3, RDS, Athena), Azure Synapse, Snowflake, Google BigQuery, PostgreSQL, MySQL, SQL Server

Workflow & Tools:

Git, Jira, Agile/Scrum

ACADEMIC & TECHNICAL PROJECTS

• AI-Driven Sales Projection System | Python, Scikit-learn, AWS, Power BI

Built an AI model to forecast monthly e-commerce sales using XGBoost and Random Forests (92% accuracy). Integrated predictions into Power BI dashboards on AWS, enabling data-driven inventory and marketing decisions that improved ROI by 10%.

• Netflix Viewing Trends Dashboard | Power BI, Power Query, DAX, Python

Developed an interactive dashboard analyzing user behavior by genre and monthly trends. Cleaned and modeled data with Power Query and Python, designed KPI-based DAX measures, and delivered insights that reduced reporting time by 25%.

• CNN-based Assira CAPTCHA | Python, TensorFlow

Created an AI-powered CAPTCHA system using CNNs to detect bots with over 95% accuracy, strengthening web login security and reducing automated spam attempts.

• Banking DB Systems | Java

Designed ACID-compliant database transaction modules for banking systems, ensuring secure, reliable data handling and improving transaction success rates by 20%.

CERTIFICATIONS

- Python for Data Science – Coursera
- AWS Cloud Essentials – Amazon Web Services
