

SHIVANI KAMOJJALA | Full Stack Developer

KS | +1 (816) 419- 3664 | shivani.kamojjala23@gmail.com | LinkedIn

SUMMARY

Full Stack Developer with over 4 years of experience designing and delivering scalable, high-performance web applications in healthcare and enterprise IT domains. Proficient in the MERN stack (MongoDB, Express.js, React.js, Node.js), with strong backend expertise in RESTful and GraphQL APIs, secure authentication (JWT, OAuth2, RBAC), and robust database design (PostgreSQL, MSSQL). Adept at implementing CI/CD pipelines using GitHub Actions, Jenkins, Docker, and Kubernetes on AWS infrastructure. Demonstrated success in enhancing application performance, accessibility (WCAG 2.1), and system observability with tools like Datadog, Redis, and Elasticsearch. Skilled in Agile/Scrum, peer code reviews, and cross-functional collaboration to deliver HIPAA-compliant, user-centric solutions. Experienced in integrating HL7 standards, real-time sockets, and third-party APIs for seamless healthcare interoperability and workflow automation. Strong advocate for reusable component design, TDD (Jest, Cypress, Mocha), and continuous performance optimization.

TECHNICAL SKILLS

Frontend Technologies:	React.js, JavaScript (ES6+), HTML5, CSS3, JSX, DOM Manipulation, Responsive Design, Lazy Loading, Redux, Context API
UI/UX & Accessibility:	Material-UI, Bootstrap, Virtual DOM, WCAG 2.1 Guidelines, User Feedback Analysis
Backend Development:	Node.js, Express.js, RESTful APIs, GraphQL, Server-Side Rendering (SSR), Workflow Automation
Database Technologies	MongoDB, PostgreSQL, MSSQL, Schema Design, Indexing, Redis Caching, Query Tuning, Caching Strategies
Authentication & Security:	JWT, OAuth2, Role-Based Access Control (RBAC), HIPAA Compliance
Testing & QA:	Jest, Cypress, React Testing Library, Mocha
DevOps & CI/CD:	Docker, Jenkins, GitHub Actions, Kubernetes, CI/CD Pipelines, Docker Compose
Cloud & Monitoring:	AWS (EC2, SQS), Datadog, Redis, Application Observability, Page Speed Improvements
Version Control:	Git, GitHub, GitLab
Workflow Integration:	HL7, Third-party API Integration, Excel-to-JSON Automation
Agile & Collaboration:	Scrum, Sprint Planning, Peer Code Reviews, Cross-functional Teamwork, Requirements Gathering, Stakeholder Communication, BA Collaboration, EHR Systems, Healthcare Interoperability, Inventory Management Systems

EXPERIENCE

Software Developer, Module Md, MI	Aug 2024 – April 2025
- Architected a multi-tenant hospital inventory management platform using Node.js, enabling 15+ healthcare facilities to track resources in real time, improving operational visibility and reducing inventory-related delays by 35%. - Developed reusable and accessible front-end components with React.js, enhancing UI responsiveness and enabling clinicians to navigate patient records 40% faster, resulting in improved staff efficiency during peak consultation hours. - Built and optimized over 40 secure RESTful APIs using Express.js to exchange HL7-compliant patient data in JSON/XML formats, ensuring seamless healthcare interoperability across EHR and legacy systems. - Engineered high-performance database queries across MongoDB, PostgreSQL, and MSSQL to support real-time analytics and clinical decision-making dashboards, decreasing report generation time by 50%. - Implemented secure authentication mechanisms with JWT, OAuth2, and RBAC to protect sensitive patient health information (PHI), aligning with HIPAA compliance and enhancing audit traceability. - Streamlined deployments and reduced release times by 50% using Docker, AWS SQS, and Kubernetes-based CI/CD pipelines, ensuring system scalability to support 100+ concurrent users during clinic hours. - Instrumented Datadog monitoring and automated alerting to improve system observability, increasing issue detection rates by 50% and ensuring 99.9% application availability throughout 20+ Agile sprints.	
Software Developer Intern, IT Induct, USA	Jan 2024 – Jun 2024
- Designed a real-time incident monitoring dashboard using React.js and WebSockets, enabling live status updates and reducing incident reporting delay by 45% for enterprise IT operations. - Implemented a scalable Node.js and Express.js backend to handle bi-directional event-driven communication between clients and incident queues, supporting up to 2,000 concurrent sessions. - Developed a dynamic alert routing engine using Socket.io and Redis Pub/Sub, allowing critical notifications to be delivered across mobile, web, and email within 2 seconds of detection. - Integrated real-time logging with MongoDB and Elasticsearch, enabling system admins to trace error patterns and decreasing incident resolution time by 30%. - Automated incident triaging workflows using rule-based microservices, significantly improving support response time by 40% for high-priority tickets. - Tested and deployed the solution using Docker and GitHub Actions, achieving 95% CI/CD pipeline coverage and reducing manual deployment time by 70%. - Collaborated with cross-functional QA and security teams to ensure ISO 27001 and SOC 2 readiness, safeguarding system compliance and client trust. - Documented all modules and APIs using Swagger and internal wikis, accelerating onboarding for new developers and improving documentation accessibility by 60%.	

Full Stack Developer [Jan 2021 – Dec 2022]

- Developed end-to-end full-stack web applications using MongoDB, Express.js, React.js, and Node.js to modernize client-facing digital platforms, resulting in a 35% reduction in service response time and improved customer satisfaction.
- Built and consumed RESTful and GraphQL APIs to streamline communication between distributed systems, enabling real-time data retrieval and enhancing application responsiveness for high-volume enterprise applications.
- Created reusable React components and modular UI structures following accessibility and WCAG 2.1 standards to ensure inclusive design, leading to a 20% increase in usability scores based on client feedback.
- Implemented CI/CD pipelines with GitHub Actions and Jenkins to automate testing and deployment, reducing manual deployment errors and accelerating release cycles by 30%.
- Deployed containerized applications using Docker and Kubernetes on AWS to ensure scalability and high availability, which enabled the system to handle 2x expected peak traffic with zero downtime.
- Integrated secure authentication workflows using JWT and OAuth2 to protect user data and comply with enterprise security requirements, reducing vulnerability incidents during audits.
- Collaborated in cross-functional agile teams to align development efforts with iterative business goals, contributing to successful sprint deliveries and a 25% increase in on-time feature releases.
- Optimized application performance by implementing server-side rendering, and MongoDB indexing, which improved page load times by up to 40% for data-heavy modules.
- Executed unit, integration, and E2E testing using Jest, Mocha, and Cypress to validate functionality and reliability, leading to a 60% reduction in post-deployment defects.
- Translated complex business logic into scalable backend services using Node.js and Express.js to support critical workflows, ensuring high system availability and seamless user experience.
- Designed schema models in MongoDB and PostgreSQL to optimize query performance and support analytics-driven reporting, resulting in a 50% improvement in data retrieval speed.

Front End Developer [May 2020 – Dec 2021]

- Developed responsive, cross-browser compatible web interfaces using HTML5, CSS3, JavaScript, and React.js, improving customer satisfaction and reducing bounce rates across enterprise platforms.
- Interpreted wireframes, user journey flows, and design specifications to build intuitive and accessible UI components, aligned with WCAG 2.1 standards and internal design systems, enhancing inclusivity and regulatory compliance.
- Optimized front-end performance with lazy loading, image compression, and DOM virtualization, resulting in a 40% improvement in load speed and user retention on high-traffic portals.
- Integrated RESTful APIs and third-party services using Axios and Fetch; managed client-side state with Redux and Context API, enabling real-time data sync and lowering latency.
- Collaborated in Agile Scrum teams, participating in sprint planning, daily stand-ups, retrospectives, and peer reviews to ensure consistent delivery and code quality across releases.
- Validated components through unit, integration, and E2E testing using Jest, React Testing Library, and Cypress, reducing production defects and improving long-term maintainability.
- Delivered scalable, modular React components by translating complex business and technical requirements, reducing technical debt and improving code reuse across multiple initiatives.
- Customized design libraries such as Material-UI and Bootstrap to meet branding standards, while analyzing user feedback and analytics to continuously refine UI/UX and boost user engagement.

EDUCATION & CERTIFICATIONS

Masters in Computer Science, University of Central Missouri, Lee’s Summit, MO	May 2024
Bachelor of Technology, Mallareddy college of engineering and technology, Hyderabad, India	May 2021
SAP Certified Application Associate - SAP S/4HANA for Financial Accounting Associates (SAP S/4HANA 2020)	
Microsoft AZURE AZ900	

PROJECTS

Invoice Reminder App - [Link](#)

- Developed an enterprise-grade SaaS solution for automated invoice reminders, leveraging React, Node.js, and Zapier, with Google OAuth integration and a microservices architecture to enhance scalability and streamline invoice management processes.

Task Management App - [Link](#)

- Engineered a task management platform using Node.js, PostgreSQL, and Sequelize, implementing secure authentication and real-time status tracking to improve task organization and prioritization, resulting in enhanced team efficiency and workflow management.

Receipt Processor - [Link](#)

- Built a receipt processing web service using Node.js and UUID, containerized with Docker, to automate points generation for e-commerce receipts, ensuring high efficiency and seamless integration with third-party e-commerce platforms.
