WORK EXPERIENCE

Data Research Volunteer

Asian Community Development Council (ACDC) — Remote, U.S. | October 2025 - December 2025

- Collected and scraped data from 40+ publicly available online sources to support nonprofit programs and advocacy.
- Leveraged low-code platforms and Python scripts to extract, clean, and organize datasets for analysis.
- Collaborated remotely with the data team during weekly check-ins, shared progress updates, and maintained structured documentation for 7+ scraping workflows.

Teaching Assistant – Business Statistics

University of Colorado Denver — Denver, CO | January 2025 - May 2025

- Tutored 70+ undergraduates in stats, hypothesis testing, and data visualization with Python, R, and Excel.
- Led review sessions, improving course-wide exam performance by 10%.
- Provided individualized feedback on assignments, increasing average student grades by 15%.

Business Process Analyst

MDBS Tech Private Limited — Mysuru, India | November 2022 - June 2023

- Built SQL and Excel dashboards to track KPIs, boosting reporting and reducing manual effort by 20%.
- Streamlined business workflows, reducing process inefficiencies and saving ~80 hours/month.
- Documented and standardized SOPs across 3+ departments, improving workflow consistency and collaboration.
- Delivered weekly executive reports, highlighting key trends and insights through story-driven visualizations, enabling data-driven decisions and improving project alignment by 15%.

Process Associate

Gallagher Service Center LLP — Bengaluru, India | October 2021 - May 2022

- Managed and resolved 100+ insurance renewal discrepancies per month, ensuring timely policy updates, reducing processing errors, and supporting cross-functional teams to streamline claims workflows.
- Improved data validation processes, leading to a 30% reduction in errors and enhancing customer satisfaction.

PROJECTS

AI-Powered Academic Assistance (Python, R, Visual Studio, Knowledge Graph, FAISS, OpenAI API)

- Developed an AI-powered academic advising tool with chatbot-style interaction using keyword and vector search (FAISS + OpenAI API).
- Applied NLP techniques to improve advisor response accuracy and speed through query understanding.
- Automated answers to high-frequency student queries, significantly reducing manual advising workload.

Theater Management Database (SQL, ERD, Normalization)

- Designed and normalized a relational database for a nonprofit theater to streamline ticketing, donations, and membership systems.
- Wrote advanced and complex SQL queries (joins, aggregations) to support financial reporting and engagement monitoring.

Music & Mental Health Insights (Power BI & Tableau)

- Analyzed survey data to explore connections between music preferences and mental well-being across age groups.
- Developed interactive dashboards in Power BI and Tableau, transforming complex datasets into engaging, actionable insights for analysis and reporting.

EDUCATION

- **Master of Science, Business Analytics**
University of Colorado Denver
- **Bachelor of Business Administration**
KLE Society's S Nijalingappa College

SKILLS

- **Programming & Analytics:** Python, R, SQL, GAMS Studio, Visual Studio
