EDUCATION

Rochester Institute of Technology (RIT), BS in Computer Science

Dec 2024

- GPA: 3.65/4.0, Dean's List for all semesters
- Completed Courses: Computer Science I & II (Python, Java), Principles of Data Management, Intro Software Engineering, Intro Cybersecurity, Intro Artificial Intelligence, Analysis of Algorithms

SKILLS

Programming Tools: Java, Python, C, SQL, HTML, CSS, Javascript, C#, Postgresql, React/React Native, Typescript

WORK EXPERIENCE

Software Engineer Intern, Opentrons Labworks

Jun 2024-Apr 2025

- Contributed to the development of desktop software that automate laboratory workflows utilizing Python, Typescript, and React to optimize performance and scalability.
- Implemented dynamic user interfaces and reusable React components, enhancing usability and codebase maintainability across platforms.
- Developed and managed RESTful API endpoints, using Postman for testing and ensuring robust backend functionality.
- Created and executed comprehensive unit tests to validate application functionality and reliability.
- Collaborated with software engineers and designers for code reviews and integrated feedback to maintain high quality standards.

Software Engineer Intern, Publicis Sapient

Jun 2023-Aug 2023

- Collaborated with a cross-functional team to develop a mobile app using the MERN (MongoDB, Express.js, React, Node.js) stack.
- Designed user interfaces and prototypes using Canva, ensuring a visually appealing and user-friendly app design.
- Built and Integrated the front-end React components seamlessly with the back-end Node.js to establish efficient communication between the user interface and the server, utilizing React and React Native frameworks.
- Utilized Git and GitLab for version control and collaborative development, ensuring codebase integrity and facilitating team collaboration.
- Worked closely with senior developers to debug issues, optimize performance, and enhance user experience.
- Contributed to agile development methodologies using Jira, participating in daily stand-ups and sprint planning.

PROJECTS

Chat Room, Individual Project

Feb 2023-Apr 2023

- Designed and implemented a multithreaded TCP server to create a console chat application using C# and telnet.
- Broadcasted messages to all the clients currently connected to the chat server.
- Launched a per-client chat server using ThreadPool thread and tasks to handle clients' messages and requests.

Checker Game, Team Project

Aug 2022-Dec 2022

- Collaborated closely with a team of 3 developers to build a MVC web application through various phases of project lifecycles, allowing multiple users to connect and play a game of checkers with a selected opponent.
- Utilized Java to send data to Freemarker Template in conjunction with Spark to create HTML pages.
- Led daily standup meetings and presentations, brainstorming ideas to construct models that followed object-oriented design principles.

Recipe Manager, Team Project

Jan 2022-Apr 2022

- Developed a command-line application using Python and SQL statements to process data stored in a relational database for multiple users to design their own recipes and view others' recipes after login.
- Assisted in debugging and provided solutions for database issues including redundancy and performance.
- Analyzed recipe information created by users to interpret their behaviors and healths using Excel and NumPy.
