

SHOUKATH ALI SHAIK

+1 (930) 444-0530 | heyshoukath@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#) | [Medium](#) | USA (Ready to Relocate)

AI Engineer specializing in **LLM-based applications, RAG pipelines, and agentic AI** with hands-on experience integrating GPT-4o, Claude, LangChain, and vector databases into production systems. Skilled in **prompt engineering, fine-tuning, and cloud-native deployment (Azure, GCP, AWS)**, with a strong track record of building customer-centric AI solutions that improve efficiency, reliability, and user satisfaction.

EDUCATION

Master of Science in Data Science (Big Data & AI), Indiana University Bloomington

August 2023 – May 2025

Relevant Coursework: Machine Learning, Big Data Applications, Advanced Database Concepts, Statistical Analysis

Oracle Cloud Infrastructure Generative AI Professional

2024

Bachelor of Science in Computer Science and Engineering, National Institute of Technology

August 2017 – May 2021

Relevant Coursework: Data Structures, Operating Systems, Database, Deep Learning, Applied Algorithms

SKILLS

AI/ML: Prompt Engineering, RAG Pipelines, LangChain, LlamaIndex, Multi-Agent Systems, Hugging Face, OpenAI APIs, Claude, Google Gemini

Data Engineering: Python, SQL, PySpark, Databricks, ETL/ELT, Azure Data Factory, GCP BigQuery, AWS S3, AWS SageMaker, Kafka

MLOps: FastAPI, Flask, Docker, GitHub Actions, CI/CD

Visualization & Analytics: Power BI, Tableau, LLM Prompt Visualization

PROFESSIONAL EXPERIENCE

AI Engineer Intern | Blackwood Solutions

Full-time | June 2025 – August 2025

- Built AI dispatch optimization microservices on **GCP Cloud Run with Vertex AI**, improving routing efficiency by 60% and reducing delivery delays by 25%.
- Designed resilient **Azure Data Factory pipelines** integrating external APIs with 99.9% uptime, ensuring reliable data flows for customer-facing analytics.
- Automated validation and monitoring dashboards in **Power BI + Azure**, shortening QA cycles by 40% and reinforcing enterprise-grade governance.

AI Data Engineer | Stealth StartUp

Part-time | August 2024 – June 2025

- Developed a multimodal livestock health monitoring system with **agentic AI and mobile camera integration**, reducing outbreak response time by 50%.
- Built **RAG-enabled GCP pipelines** processing 1M+ daily records, generating predictive insights that boosted feed efficiency by 18%.
- Delivered ML early-warning alerts with 92% accuracy, lowering veterinary costs by 35% through proactive interventions.

Data Engineer (AI) | Indiana University Bloomington

Client Project | February 2025 – May 2025

- Automated ETL pipelines in **Python/SQL**, increasing ingestion efficiency by 30% and reducing manual data fixes.
- Created **interactive Power BI dashboards** to visualize survey data, enabling near real-time insights for client strategy.

Data Scientist (GenAI) Intern | Geeky Insights

Full-time | June 2024 – August 2024

- Engineered a **RAG-enabled ad generation platform** using **Azure LLMs + vector DB**, boosting engagement 35% and driving 20% revenue growth.
- Designed scalable **PySpark ETL pipelines on Databricks** handling 1M+ records/month, increasing throughput by 35%.
- Integrated **Kafka streaming pipelines** delivering sub-second analytics, optimizing ad spend and reducing waste by 15%.

PROJECTS

Voice-Only Omani Arabic AI Therapist (Sawt-AI-Faraj) | GPT-4o, Claude, Whisper, Azure TTS, LangChain

- Built culturally aware **voice-only chatbot** with sub-20s response time; integrated **dual-model RAG pipeline** for faith-based counseling and crisis detection.

Retrieval-Augmented Generation (RAG) Implementation | Qdrant, Sentence-Transformers, OpenAI API

- Developed reproducible reference pipeline combining **vector DB + LLMs** for accurate, grounded document QA.

Sales-Bid Agent Analytics | Python, scikit-learn, Generative AI

- Built ML model predicting bid success with generative explanations, enabling smarter sales prioritization.

AgentAI Retailbot | Python, FastAPI, LLMs

- Designed retail assistant with **prompt-engineered product recommendations**, reducing customer support load.

ADDITIONAL EXPERIENCE

Software Developer (Data Science & AI) | Bharat Electronics Limited

Full-time | November 2022 – June 2023

- Deployed Time Series forecasting **SARIMA, Prophet anomaly detection models**, improving system reliability by 20%.
- Built **FastAPI microservices** for real-time analytics, reducing API latency 60%.

Associate Developer (Data Analytics) | BCS Technology

Full-time | June 2021 – July 2022

- Automated **Python ETL workflows**, cutting manual effort 40%.
- Delivered forecasting dashboards in **Power BI + Azure ADF**, reducing reporting cycle time by 30%.

Certifications: Microsoft Azure Data Fundamentals (DP-900), Oracle Cloud Generative AI Professional, Databricks Fundamentals, Databricks GenAI Fundamentals, IBM Data Science, Stanford ML, Deep learning.AI Python Certified, Duke University LLMOps (in progress)
