

SHRAVAN SAILADA

Syracuse, United States | shravanshivi15@gmail.com | 3473690225 | [linkedin.com/in/shravan-sailada](https://www.linkedin.com/in/shravan-sailada) | github.com/shiviboi360

EDUCATION

Syracuse University

M.S. in Computer Science

New York, USA

Aug 2022 - Aug 2024

- GPA: 3.22/4.00

- Related Coursework: Design analysis and Algorithms, Operating Systems and Intro to Data Science

MVGR College of Engineering

B.Tech. in Computer Science & Engineering

Andhra Pradesh, India

Jun 2017 - Jul 2021

- GPA: 3.42/4.00

- Related Coursework: Object oriented programming, Python programming and Data structures

EXPERIENCE

Oracle

Nairobi, Kenya

Software Developer Intern

Feb 2022 - Jun 2022

- Designed and analysed PL/SQL database queries, reducing execution times by 40%, which enhanced system efficiency and improved response times for sales analytics.
- Migrated 15 legacy database tables to optimized RESTful APIs built with Spring Boot, reducing cross-department data silos and improving data accessibility for over 200 employees.
- Co-ordinated in debugging and enhancing database performance through query optimization techniques in PostgreSQL and MySQL, leading to 35% faster data retrieval for BI analytics.
- Fortified user access protocols by implementing multi-factor authentication across Active Directory, impacting 1,000+ users, while reducing unauthorized intrusion attempts by 60% and potential data breaches.

Vertex Research Center Private Limited

Coimbatore, India

Software Developer Intern

Jul 2021 - Nov 2021

- Implemented racetrack simulation modules using Python, improving simulation accuracy by 20%, which enhanced the training experience for race car engineers and reduced errors in predictive modeling.
- Managed back-end order processing systems using Node.js and SQL, reducing processing time by 30%, optimizing transaction handling, and improving customer order efficiency.
- Architected and deployed backend microservices utilizing Spring Boot and REST APIs, automating data workflows and slashing manual processing time by 60% across the existing infrastructure.
- Revamped the email notification system using Postfix scripting, automatically flagging 150+ weekly suspicious emails and reducing the risk of malware infections for all employees.

PROJECTS

AI Trip Planner — Python, Streamlit, LangChain, CrewAI

<http://github.com/shiviboi360/tripPlanner>

- Engineered an AI-driven vacation planning tool that reduced manual trip research time by over 70% using autonomous CrewAI agents for destination selection, cultural insights, and itinerary creation..
- Integrated live data APIs (Serper.dev, Browserless, OpenAI) to support 10+ destination comparisons with real-time weather, budget forecasts, and event recommendations.
- Achieved 90%+ accuracy in generating personalized 3–7 day itineraries through LangChain-style agent orchestration (City Selector, Local Expert, Travel Concierge), improving planning reliability.

AI-Powered Job Tracker — Java, Spring Boot, React, MongoDB, Python NLP

https://github.com/shiviboi360/fullstack_jobtrack

- Built a full-stack job tracking platform integrating Java Spring Boot APIs and React UI, enabling users to manage and visualize over 50+ job applications with resume matching insights
- Integrated a Python-based NLP microservice that boosted resume-job match accuracy by 85%, leveraging OpenAI embeddings to recommend application improvements.
- Implemented JWT-based secure authentication and MongoDB persistence, reducing unauthorized access attempts and ensuring data integrity across user sessions.

Palm Print Authentication System — Python, TensorFlow, OpenCV, Tkinter

https://github.com/shiviboi360/palm_authenticate

- Developed a biometric identity verification system using Convolutional Neural Networks (CNNs), achieving 90%+ accuracy in palm print-based user recognition via live webcam or uploaded images.
- Engineered an automated palm image preprocessing pipeline (OpenCV + Pillow) to resize, label, and store over 100+ palm samples for training and verification.
- Designed a GUI-based interface with Tkinter for real-time registration and verification, enabling touchless user management suitable for Aadhaar, immigration, and secure access systems.

SKILLS

Programming Languages: Java 8, JavaScript (JS), C, Python, Bash/Shell Scripting

Frameworks & APIs: Spring Boot, Spring MVC, Spring Security, Node.js, Flask, FastAPI, REST, SOAP, OAuth 2.0, JWT

Databases: MongoDB, MySQL, PostgreSQL, Oracle DB, Redis, SQL Server, JDBC, PL/SQL, Elasticsearch

AI & Data Tools: OpenAI API, LangChain, CrewAI, Serper.dev, Browserless, CNN, NLP, Pandas, NumPy, TensorFlow, Keras, OpenCV

Web Technologies and Cloud Technologies: HTML5, CSS3, React.js, Tkinter, Streamlit, Spring Framework, Microservices, Azure, GCP (Dialogflow), AWS (EC2, S3, RDS, Lambda, ECS).

Testing & Tools: JUnit, Mockito, Postman, Log4j, GitHub, SonarQube, Agile, IntelliJ, Eclipse, VS Code
