

SHRAVANI SRIDHAR

Software Engineer

sridh.shrav@gmail.com | 979-985-9831 | [LinkedIn](#)

Austin, TX (US citizen, willing to relocate)

SUMMARY

A passionate and highly motivated engineer with a Master's in CS seeking a challenging software role. Strong foundation in computer science fundamentals, data structures, algorithms, cloud computing, and ML. A strong believer in constant learning, taking opportunity for professional development and mentoring/volunteering.

WORK EXPERIENCE

AAK Tele-Science, Inc.

Software Engineer - Backend Focus | Davis, CA/Remote | Aug 2023 - Nov 2023, Nov 2024 - Present

- Streamlined authentication architecture to a centralized gateway service by removing redundant logic from **5+ Django-based backend services**. Conducted **web application testing**.
- Leading team using **Agile Scrum** and **Kanban Board** tracking, ensuring compliance to organizational requirements.
- Contributed to database migration (**MySQL** to **PostgreSQL**) and to developing scalable social networking features using **Django** and **Django REST**.

Cisco Systems, Inc.

Software Engineer | San Jose, CA | Nov 2021 - Mar 2023

Products worked on: Nexus Dashboard Insights (NDI) & Nexus Cloud

- Developed and/or tested **Python**-based core features for Nexus Dashboard Insights and Nexus Cloud **enterprise networking** products.
- Implemented **OAS 3.0**-based security enhancements for **31 critical APIs** using **Python** and **Kubernetes**.
- Built and executed automated test suites for APIs using **pytest**, achieving **100% pass rate** and **reducing testing incidents by 40%**. Documented test cases.
- Tested improvement in OpenTelemetry metric export, promoting enterprise-scale observability.
- Implemented end-to-end onboarding of a Nexus gK switch to a cloud test environment, achieving 100% successful cloud integration.
- Mentored intern on **Kubernetes**-based backend testing; collaborated with cross-functional teams to communicate about issues and deliver features on schedule.

Juniper Networks

Software Engineering Intern | Sunnyvale, CA/Remote | May 2020 - Aug 2020

- Developed a graph database - based application using Dgraph, **Python ETL** scripts, and **Vue.js/Django** for build data visualization. Presented technical solution to senior leadership, receiving approval for production deployment.

Wipro Limited

Software Intern | Bangalore, India | May 2018 - Jul 2018

- Developed a critical **IAM** module using **C#**, **.NET Framework**, and **Microsoft SQL Server** for **5,000+ enterprise users**.

EDUCATION

Texas A&M University, TX

GPA: 3.8/4.0

M.S. Computer Science (Thesis) | May 2022

National Institute of Technology Calicut (NITC), India

GPA: 8.0/10.0

B.Tech. Computer Science and Engineering | May 2019

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C++, C, TypeScript, C#, SQL, Ruby, PHP, Go

Backend/Frameworks: Django, Node.js, .NET Framework, RESTful APIs, Microservices, OAS 3.0

Frontend: React, Vue.js, HTML5, CSS3, jQuery

Databases: PostgreSQL, MySQL, MongoDB, Microsoft SQL Server, Elasticsearch

Tools & Infrastructure: Git, Bitbucket, Docker, Kubernetes, AWS (EC2, RDS), Linux, Agile/Scrum, JIRA, Kanban

Testing & Monitoring: Unit Testing, pytest, Kibana, Grafana

ML/Data: pandas, scikit-learn, MATLAB

PROJECTS, AWARDS & CERTIFICATIONS

- Projects:** Distributed cloud storage system using (non-parity) RAID-5 (**Python, 100% accuracy**) | Database application features (**Ruby on Rails, BDD with Cucumber/RSpec, >90% test coverage**) | Biology learning application (**JavaScript/jQuery/HTML/CSS via Scrum methodology, 90% user satisfaction**)
- Awards:** Cisco's Connected Recognition Award (Nexus Cloud API Security, 2022)
- Certifications:** Deep Learning Specialization (Coursera)
