SUMMARY

- 2+ years of experience with enterprise-scale Cloud Native & Big Data applications to solve challenges in collaboration.
- Operated on 3 projects fraternizing with cross-functional teams and best practices in Hadoop Ecosystem & infrastructures.
- Infosys Certified Kafka Developer, well-versed in stream processing, distributed systems, CI/CD: Jenkins, IAC: Ansible.

EDUCATION

University at Buffalo, The State University of New York, Buffalo, NY. Jun 2023

Master's Degree in Data Sciences and Application.

- Database Management System, Machine Learning, Statistical Data Mining I & II, Programming.

Walchand Institute of Technology, India.

Jun 2019

Bachelor of Engineering in Computer Science and Engineering.

- Data Structures and Algorithm, Design and Analysis of Algorithm, Big Data, Cloud Computing.

EXPERIENCE

Systems Engineer | Big Data Engineer, Infosys Limited, Chennai, India. Jan 2020 - Jan 2022

Data Migration

- Enabled Kafka Streams API to fetch 10K records per second deducing retrieval time per transaction.
- Built Cloud-native architecture steering 8 billion of records plus 1.2M real-time logs to yield information.
- Deployed Microservices on Kubernetes Clusters having multiple Kafka brokers to pass 1.5M records $\leq 1hr$.
- Resolved data serialization challenges in Apache Avro and JSON files and query optimization, surging portability.
- Constructed ETL data pipelines, data modeling, data acquisition, and data warehousing with the data infra team

Application Log Analysis and Management

- Performed index operations on 1.1M+ logs in Elasticsearch augmenting filing speed and quick searches.
- Stimulated real-time logs enhancing transformations up to 95% by Kibana queries for filtering and development.
- Led a team of 3 data engineers focusing on automatic platform setup through Ansible playbook (YAML file) and testing with code writeup in Azure Cloud Shell to create Kubernetes Clusters on Azure Kubernetes Services.

Infy Store - An Enterprise Application

- Integrated Spring Microservices architecture according to use cases, ensuring an 80% scalability increase.
- Designed program packed 8 containers in Docker decreasing the number of servers and reducing licensing costs.
- Delivered microservice application utilizing AWS CDK executing a fully automated deployment pipeline.

ACADEMIC PROJECTS

Reducing Commercial Aviation Fatalities

Apr 2022 - Jul 2022

- Studied unidentified & ineffective attention of pilots and inferred from activities to decrease 56% accidents.
- Predicted pilot's state of mind accurately working on 45+ physiological features for 18 crew members.
- Created 3 classifiers: LGBM, LR, and RF and checked for accuracy, precision, confusion matrix, ROC & AUC.

Credit Card Fraud Detection System

Jan 2022 - Mar 2022

- Generated batch of historical data 50K+ records into Hive - HBase table, loading AWS-RDS files.
- Channeled 100% continuous data stream through Apache Kafka and parsed data to Spark engine for refining.
- Built 5+ user interactive dashboards for reporting and visualization to make business decisions & performance.

Marketing Data Cleansing

Feb 2021 - Apr 2021

- Defined schema for a nested dataset, eliminating incorrect datatype and runtime errors to increase reliability.
- Improved space consumption from dirty data with 10+ transformations and aggregations on pyspark data frames.

Automatic Plant Temperature Monitoring System

Mar 2020 - Jul 2020

- Streamlined data pipeline to record the 2GB raw data/day generated from different types of sensors.
- Implemented plant's health status notifications via messaging saving 24/7 monitoring time and troubleshooting.

SKILLS

Programming: Python, R, Core Java, Spring frameworks, Spring Microservices, Rest API, SQL.

Big Data Technologies : Hadoop, Spark, Scala, Hive, Kafka, Sqoop, Avro, NoSQL, Airflow.

DevOps and Cloud platform : Amazon Web Services(AWS), Elasticsearch, Kibana, Ansible, Jenkins, Docker, Kubernetes, GCP, BigQuery, ETL/ELT, OLAP, Business Intelligence.

Tools : RStudio, VSCode, Jupyter Notebook, IntelliJ, JIRA, DBWeaver, MySQLWorkbench, Postman, Github.
