EDUCATION

Texas Tech University, Lubbock, Texas - Bachelor of Science in Computer Science

Minor: Mathematics | Expected in 05/2026

- Presidential Merit Scholarship Recipient
- Relevant coursework: Computational thinking with Data Science, Intro to Artificial Intelligence, Applied Data Science

SKILLS

Languages and Frameworks: C, C++, Java, Python, R, MySQL, JavaScript, HTML, CSS

Libraries: Pandas, Matplotlib, NumPy, Seaborn, Scikit-Learn, PyTorch, Keras

Technologies: Azure Data Factory, Apache Airflow, Linux, Apache Spark (PySpark), Tableau, Git/GitHub

Concepts: ETL, Data engineering, Data Science, SQL, Statistics, Machine Learning

Soft Skills: Communication, Management, Teamwork, Microsoft Office

Certifications: HackerRank SQL (Basic, Intermediate), Meta Database Engineer

EXPERIENCE

Undergraduate Data Science & Machine Learning Research Assistant | Animal and Food Sciences at Texas Tech University 08/2025 – Present

- Engineered an 80% accurate regression pipeline to predict carcass composition from 3D CT scan point clouds.
- Streamlined meat processing workflow, cutting labor and analysis costs through predictive automation.
- Accelerating model performance by training 3D CNNs to eliminate pre-processing steps.

Undergraduate Machine Learning Research Assistant | Wu Research Group at Texas Tech University 08/2024 – Present

- Achieved 95% tumor classification accuracy by building and training custom CNN models.
- Designed end-to-end deep learning pipelines using PyTorch, Keras, and Scikit-learn.
- Boosted weekly research output by 100% by developing a summarization chatbot to process academic papers. (see Projects)

Assistant Tutor | Google Developer Groups 01/2024 – 02/2024

- Mentored 30 students during live coding workshops; resolved bugs and improved debugging fluency.
- Reinforced foundational programming concepts in hands-on environments.

Web Developer | MS Projects 05/2022 – 08/2022

- Developed a responsive tutoring platform with dynamic course booking, improving sign-up conversion by 35%.
- Conducted UX testing and implemented iterative improvements based on user feedback.

PROJECTS

Predicting future populations using Machine Learning (Pandas, Scikit-learn)

- Modeled U.S. population growth using regression on public birth and fertility rate datasets.
- Engineered key indicators like crude birth rate and general fertility rate.
- Enhancing predictive accuracy by implementing ARIMA time-series modeling.

Digital research assistant for Research Assistants (Langchain, HuggingFace, Vector DBs, LLMs)

- Built a chatbot that converts uploaded PDFs into vector embeddings for LLM-based Q&A.
- Increased personal research output by 2x by automating paper summarization and contextual querying.

Olympic Data Insights – Tokyo 2021 (Azure Data Factory, PySpark, Pandas)

- Analyzed athlete data to uncover medal trends, age/gender distributions, and performance metrics.
- Automated the data pipeline using PySpark and Azure Data Factory for scalable analysis.

INVOLVEMENT AND LEADERSHIP

Treasurer | Students for Global Connections 05/2025 – Present

- Directing financial operations, optimizing budgeting, fundraising, and expense tracking to support large-scale events.
- Leading sponsorship acquisition and vendor coordination for multicultural campus events.
- Serve as acting president when required, ensuring continuity and representation.

Student Manager II & Food Protection Manager | Hospitality Services at Texas Tech University 09/2022 – 08/2025

- Supervised operations across 9+ foodservice units, leading a 60+ member team per shift.
- Trained 25+ new hires, reducing onboarding time by 40%.
- Created contingency plans to mitigate junior student management staff shortages.
- Certified by ServSafe.

Sponsorship Ambassador | HackWestTX by Google Developer Groups 09/2023

- Facilitated communication between event organizers and sponsors to ensure smooth partnerships.

Backstage Crew | World Wide Showcase by Students for Global Connections 04/2024 & 04/2025

- Coordinated event schedule for 30+ performers, ensuring timely performance cues, secure backstage access, and prevention of interference in public voting.
