

Shrenik Poly Setty

Software Developer

Woodridge, IL | +1 (443) 851 3006 | shrenikp1220@gmail.com

SUMMARY

- 3+ years of hands-on experience in the analysis, object-oriented design, development, implementation, and maintenance of software applications using Java technologies.
- Proficient includes designing and developing web applications while adhering to Software Development Life Cycle methodologies such as Agile and Waterfall, ensuring the delivery of high-quality, scalable solutions.
- Knowledge of Core Java concepts, including Exception Handling, Multithreading, JavaBeans, JDBC, and Collections, essential for creating robust and efficient applications.
- Skilled in leveraging the Spring Framework, utilizing features like Spring MVC, Spring Boot, Spring Security, Microservices, Hibernate, and JPA to build dynamic and secure enterprise applications.
- Well-versed in front-end development, creating responsive and user-friendly web interfaces using technologies such as HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, and XML.
- Good capabilities in database management, including crafting sub-queries, stored procedures, triggers, cursors, and functions within MySQL, ensuring optimal performance and data integrity.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Languages: Core Java, Java 8/11, SQL

Frameworks: Spring (MVC, Boot, Security), Microservices, Hibernate, JPA, JSF

IDEs: NetBeans, IntelliJ IDEA, VS Code, Eclipse

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC, Java Mail

Web Technologies: HTML, CSS, JavaScript, TypeScript, Bootstrap,

jQuery, Ajax, JSON, XML

Cloud Tool/Application Server: AWS (VPC, EC2, S3, CloudFront, ELB), Azure, Apache Tomcat, IBM Web Sphere

Databases: MySQL, SQL Server, PostgreSQL, Oracle, MongoDB

Version Control/Other Tools: Git, GitHub, GitLab, Maven, Gradle, Jira, Jenkins, Junit, MS Excel, JMeter

Operating Systems: Windows, Linux, Mac

EDUCATION

Masters in Computer/Information Technology Services Administration and Management

Apr 2024

Lindsey Wilson College, Columbia, Kentucky, USA

Bachelors in Electrical and Electronics Engineering

Jun 2021

Vardhaman College of Engineering, Hyderabad, India

EXPERIENCE

Pfizer, USA | Software Developer

Jun 2024 - Present

- Delivered high-performance software solutions by applying Agile methodologies, ensuring iterative development, collaboration, and prompt delivery of prioritized features.
- Developed robust back-end functionalities using Core Java, leveraging object-oriented programming principles and advanced concepts like JavaBeans, and Exception Handling, resulting in a 30% improvement in application scalability and a 25% reduction in system errors.
- Designed and implemented enterprise-grade applications utilizing the Spring Framework, including Spring Boot and Spring Security, reducing development time by 40% and improving API security, resulting in a 20% reduction in unauthorized access incidents.
- Created responsive, and user-friendly front-end interfaces with HTML, CSS, and JavaScript, ensuring seamless user experiences across devices and browsers, achieving a 98% customer satisfaction score.
- Leveraged AWS services, including VPC, EC2, S3, CloudFront, and ELB, to design and deploy scalable cloud-based solutions. Optimized application uptime and reduced hosting costs by 20%.
- Applied Jira for project tracking and task management, ensuring clear communication of goals and priorities, contributing to on-time project delivery and improved team productivity.

Hexaware Technologies, India | Software Developer

Apr 2019 - Dec 2021

- Led the design and development of enterprise-grade applications following the Waterfall methodology, ensuring a structured approach to requirement gathering, design, development, and testing.
- Established robust back-end functionalities using Java 8/11, incorporating features like Streams, Lambda expressions, and the Java Collections Framework, resulting in a 30% improvement in application performance and a 25% reduction in code complexity.
- Implemented Spring Security for role-based authentication and authorization, enhancing system security and reducing unauthorized access attempts by 40%, while ensuring secure communication protocols across applications.
- Conceptualized Hibernate ORM for seamless integration with databases, managing object-relational mapping efficiently and minimizing database access times. Employed Java Persistence API (JPA) for maintaining data consistency and integrity.
- Designed and developed rich, interactive web applications using JSF, JSP, and JSTL, ensuring dynamic user interfaces and improved user experience. Integrated JavaBeans and JDBC for handling data processing and database interactions efficiently.
- Built responsive, user-friendly front-end interfaces using TypeScript, Bootstrap, and jQuery, increasing user engagement by 20% and ensuring 99% cross-browser compatibility and high responsiveness across devices.
- Optimized MongoDB for efficient storage and retrieval of large datasets, improving data query performance by 35% and ensuring high availability and scalability in distributed environments.
- Automated build and deployment processes using Jenkins, integrating Continuous Integration and Continuous Deployment (CI/CD) pipelines to streamline application delivery and reduce development time by 25%.
