

Shreshika Nayani

Software Engineer

New Jersey • shreshika0@gmail.com • +1 (929) 399 9748 • [Github](#) • [LinkedIn](#)

SUMMARY

- Results-driven Software Engineer with 4+ years of experience delivering end-to-end SDLC solutions, specializing in design, development, automation, and scalable deployments.
- Skilled in building dynamic web solutions with expertise in database design, query optimization, and modern software development technologies.

EDUCATION

Master of Science in Computer Science

Stevens Institute of Technology, NJ, USA

Relevant Coursework: Data Structures & Algorithms, Cyber Security, Supply Chain Analytics, Machine Learning

GPA: 3.7/4

Bachelor's in Computer Science

Neil Gogte Institute of Technology, India

Relevant Coursework: Database Management Systems, Computer Networks, Operating Systems

GPA: 8.0/10

TECHNICAL SKILLS

Programming Languages: C, Java, Python, SQL, JavaScript, TypeScript

Frameworks/Libraries: Spring Boot, Spring MVC, React.js, Angular, Vue, Redux, Node.js, Express.js

Web Technologies : HTML5, CSS3, Bootstrap5, jQuery, Ajax, XML

Testing: JUnit, Jest, Enzyme, Mocha Karma, Cypress, Postman, Mockito

Cloud: Azure, AWS GCP

Database: SQL Server, MySQL, PostgreSQL, MongoDB

CI/CD and Tools: Git, GitHub, Jenkins, Docker, Kubernetes, Jira, Maven, Grafana

PROFESSIONAL EXPERIENCE

Northern Trust, TX

Aug 2023 – Present

Software Engineer

- Leveraged **RxJS** Observables to handle asynchronous data flows in a **React** application and improved user experience by **25%**
- Automated **Java** application deployments on **AWS EC2** with **Jenkins and Terraform** to reduce provisioning time.
- Developed APIs with **Springboot** microservices, leveraging **JMS** and **Apache Kafka** for asynchronous communication and **PostgreSQL** for reliable persistence.
- Improved data processing and security through **OAuth-based** token management with **Spring Security**, enabling real-time data analysis and reporting.
- Accelerated application deployment by **50%** with **CI/CD** pipelines using **Docker, Kubernetes, Git**
- Improved API performance by **20%** through **REST/GraphQL** query optimization and caching implementation.
- Optimized front-end performance using **code-splitting, lazy loading**, and **Redux**, reducing load time by **40%** and enhancing user data flow.
- Enhanced data processing with **Kafka**, improving throughput by 60% and reducing latency from **3s to 1s** using **Redis**. Utilized **Jest** for testing

Sigma Tech Solutions, India

Jan 2021 – Jul 2022

Software Engineer

- Developed dynamic single- and multi-page web apps with **JavaScript, React, Redux, Bootstrap, and CSS**, ensuring **WCAG/ARIA** accessibility compliance.
- Deployed **Springboot** microservices for high-traffic APIs, improving system scalability by 30% during peak hours.
- Optimized **SQL** queries, procedures, triggers, and indexing with **ElasticSearch**, reducing query time by 20% and improving overall data processing efficiency.
- Developed **Node.js** microservices and deployed them to **AWS Elastic Beanstalk**, improving scalability and reliability by 25%.

PROJECTS

Full-Stack E-commerce Platform for New York-Based Retailer [Link : [Silver Colors Inc](#)]

- Led development of a fully functional e-commerce website for a NY small business, handling requirements gathering, UI/UX design, and backend development.
- Implemented data migration, hosting transition, and third-party payment integration with WordPress/WooCommerce, improving customer experience and operational efficiency.

Mental Health Prediction [[GitHub Link](#)]

- Developed Python-based predictive ML models, including XGBoost, KNN, Random Forest, Neural Networks, and ensemble algorithms to detect depression.
- Performed end-to-end data preprocessing, analysis, and evaluation to ensure model accuracy and reliability for a healthcare project.

Price Prediction of Agricultural Commodities using ML Techniques [[GitHub Link](#)]

- Built a predictive model for agricultural commodity prices using historical data and statistical methods, enabling informed decision-making.
- Improved accuracy of price forecasts to support strategic planning and data-driven insights.

Conversational ChatBot [[GitHub Link](#)]

- Developed an appointment booking chatbot using Dialogflow and Ngrok, automating scheduling processes.
- Enhanced the user experience by enabling seamless, real-time interaction with the chatbot.

CERTIFICATIONS

Full Stack Web and Multi-platform Mobile App Development (Specialization) - [Link](#)

Python Data Structures - [Link](#)

Problem Solving through Programming using C (Elite) - [Link](#)

Capstone: Retrieving, Processing, and Visualizing Data with Python - [Link](#)

ADDITIONAL INFORMATION

Languages: English, Hindi, Telugu

Interests: Movies, Animation, Art
