Business Analyst (4+ years) | Skilled in Product Strategy, Agile Methodologies and Digital Transformation in the fintech industry | Currently pursuing a Master of Science (MS) in Information Systems at Georgia State University, Atlanta | Actively seeking full-time opportunities in Business Analyst role.

EDUCATION

Master of Science (MS) in Information Systems

Georgia State University

(Awarded Merit-Based Tuition Scholarship, active member of TAG and Women in Technology, contributing to leadership and inclusion initiatives)

Atlanta, GA

Jan 2025 - May 2026

Bachelor of Engineering (Computer Science & Engineering)

KLS Gogte Institute of Technology (VTU Affiliated)

Belgaum, India

Aug 2016 - Aug 2020

GRADUATE PRACTICUM

AI-Powered News Fact-Checking & Misinformation Detection

Mar 2025 – May 2025

- Developed an AI-powered fake news detection tool using Python, GPT-4o, LangChain, and FAISS for real-time classification.
- Deployed the solution via Flask and ngrok to enable browser-based user input and verdict display.
- Integrated WikipediaLoader and the LIAR dataset to support Retrieval-Augmented Generation (RAG) for grounded fact-checking.
- Used newspaper3k for clean content extraction and evaluated model performance using precision, recall, and F1-score.
- Enabled explainable AI outputs to enhance user trust and improve detection transparency.

Business Process Modelling for Mortgage Company

Jan 2025 – Feb 2025

- Analyzed Mortgage Underwriting workflow, identifying inefficiencies and pain points affecting processing time
- Developed BPMN (Business Process Models and Notation) models As-Is and To-Be, to improve loan processing efficiency (30%)
- Proposed automation solutions, reducing manual effort (40%) and ensuring compliance with fair lending regulations
- Evaluated obstacles in process redesign and recommended data-driven solutions to scale operations for increased loan applications

WORK EXPERIENCE

Graduate Research Assistant (Dept. of Computer Science & Information Systems)

Atlanta, GA

Georgia State University

Jan 2025 - Present

- Facilitating hands-on Python labs for 150+ undergraduate students, promoting an interactive and inclusive learning environment.
- Evaluating coding assignments and delivered personalized feedback to strengthen students' understanding and problem-solving skills.

Business Analyst (Agile Delivery, Product Strategy & Data-Driven Solutions)

Belgaum, India

Kiyaan Infotech

Jul 2021 - Sep 2024

- Conducted churn analysis to identify high-risk user segments and key behavioral patterns for a digital banking client.
- Delivered insights that contributed to a 15% churn reduction over two quarters through targeted retention strategies.
- Collaborated with UI/UX teams to redesign the support portal using Figma and user feedback, enhancing usability and engagement.
- Defined and prioritized user stories in JIRA across multiple projects to align with sprint goals and improve development efficiency.
- Analyzed user reviews and app data using Python to support product decisions for upcoming feature enhancements.
- Created Business Requirement Documents (BRD) and worked closely with stakeholders to ensure alignment with business needs.
- Supported Agile delivery by coordinating daily stand-ups, sprint planning, and retrospectives to resolve blockers.

Business Product Analyst (Client-Facing Delivery, Workflow Optimization & Digital Solutions)

Belgaum, India

Cubiccode Digital Media LLP

Sep 2020 - Jun 2021

- Gathered and translated patient and clinician requirements into clear user stories to support platform development.
- Designed wireframes in Balsamiq to streamline patient onboarding and nutrition consultation flows.
- Mapped appointment scheduling and follow-up workflows using BPMN to identify automation opportunities.
- Defined CRM requirements and automated follow-up workflows, saving clinicians 4+ hours weekly.
- Boosted patient engagement by 30% through reminder automation and optimized follow-up processes.
- Conducted UAT by logging and resolving functional and UI issues to ensure a smooth platform launch.

CORE COMPETENCIES

- Programming:** Python, SQL
- Data Analysis Tools:** Tableau, Advanced Excel
- Methodologies:** Agile, Scrum, Waterfall, Lean Six Sigma, Kanban, Root Cause Analysis, Software Development Life Cycle (SDLC)
- Development:** JIRA, Figma, Story Board Management, Bizagi Modeler, SharePoint Designer
- GenAI Skills:** OpenAI API, LangChain, Retrieval-Augmented Generation (RAG), FAISS, GPT-4o, Flask, ngrok, Prompt Engineering, n8n (workflow automation)
