PROFESSIONAL SUMMARY

Results-driven Backend Developer & Data Engineer with 2+ years of experience in building scalable server-side applications, optimizing high-volume data pipelines, and integrating ERP systems. Strong expertise in Python, PHP, SQL, and cloud technologies like Azure and Databricks. Proficient in automating ETL workflows, enhancing system efficiency, and improving data-driven decision-making through Power BI. MS in Computer Science, focusing on backend development, data engineering, and cloud infrastructure. Passionate about designing efficient, and high-performance systems that drive business value.

WORK EXPERIENCE

Data Engineer | *Dev Information and Technology - IT firm offering Website Development services.* Jan 2023 - May 2023

- Scraped and cleaned multi-source data using **Scrapy, Pandas, Numpy**, improving data reliability and accessibility.
- Designed and implemented ETL workflows using **Azure Data Factory and Databricks**, optimizing data transfer efficiency by **25%**.
- Automated data ingestion with Python, SQL, and Terraform, reducing manual effort by **50%** improving system efficiency.
- Launched interactive **PowerBI dashboards** connected to ERP data and provided real-time insights into supply chain bottlenecks, accelerating inventory turnover by **15%** and reduced carrying costs.
- Optimized data handling processes, cutting, overall data processing time by **40%**.

Backend Developer | *Evrig Solutions - IT firm offering Website Development services.* Dec 2023 - Jan 2025

- Designed and maintained RESTful backend **APIs** supporting ERP integrations with 99.99% uptime.
- Developed scalable server-side apps using **Python and PHP**, integrated with dynamic front-end modules.
- Reduced database query times by **30%**, boosting system efficiency by 15%.
- Coordinated deployment workflows and performed debugging to ensure application stability.

Data Engineer | Auburn University - Research Assistant Jan 2025 - May 2025

- Managed full data lifecycle: collection, transformation, and validation for academic performance analytics.
- Revamped the class list system ensuring compliance and AI/ML readiness.
- Ensured smooth data handoff to reporting layers and machine learning pipelines.

TECHNICAL SKILLS

LANGUAGES, FRAMEWORK & Tools : Python, PHP, SQL, C++, C, Django, Power BI, Tableau, ETL Pipelines, ERP Data Integration.
Cloud, Infrastructure, Databases & Integration : Azure(Data Factory, Storage, Synapse), Databricks. MySQL, MongoDB.

ACADEMIC PROJECTS & EXTRACURRICULAR

Football Analytics Using Power BI - College Project

- Analyzed player and venue statistics across 5 tournaments using Python(**Pandas,Matplotlib**).
- Executed SQL-based data cleaning and leveraged PowerBI for actionable dashboards.

E-commerce Website - Personal Project

- An E-commerce website made with the framework Magento to design the front-end part and PHP to handle the back-end of this process. Features like E-mail only coupon , and bundled products were implemented.

EDUCATION

Auburn University | *MS in Computer Science* **CGPA: 3.5/4** Aug 2023 - May 2025

Indus University | *BS & MS in Information and Technology.* **CGPA: 3.85/4** Aug 2018 - June 2023

PROJECTS AND CERTIFICATIONS

Coursera - Google Cloud Leader Training, Building Web Applications in PHP, Databases and SQL for Data Science with Python.

[\[Website\]](#) - Google Cloud Skill Boost Badges.
