EDUCATION

Santa Clara University | M.S. Computer Science and Engineering - CGPA - 3.84/4.0

Coursework: AI, ML, Computer Architecture, Frontend Development, Database Systems, Data Structures, Big Data

Jun 2025

Santa Clara, CA

Jawaharlal Nehru Technological University | B.Tech in Computer Science and Engineering - CGPA - 3.8/4.0

Coursework: Design & Analysis of Algorithms, Full Stack Development, O.S, Core Java, Solutions Architecture & Cloud

Jul 2023

Hyderabad, IN

TECHNICAL SKILLS

- Programming Languages: Python, Java, JavaScript, TypeScript, C++, C, HTML5, CSS3
- Frameworks & Libraries: React, React Native, Next.js, Flutter, Node.js, Spring, Spring MVC, Spring Boot, Hibernate, Spring Data JPA, Microservices, REST API, GraphQL, Pandas, NumPy, PyTorch, TensorFlow
- Cloud, DevOps & Big Data: AWS (S3, EC2, API Gateway, SQS, Lambda), Firebase, Kubernetes, Docker, Jenkins, Maven, Git, Apache Spark, Hadoop, Kafka, Elasticsearch, OpenAPI/Swagger, OAuth2/JWT
- Databases & Tools: MySQL, PostgreSQL, MongoDB, DynamoDB, Cassandra, Redis, Database Design, JUnit, Mockito, CI/CD Pipelines

WORK EXPERIENCE

SCU Frugal Innovation Hub | *Software Developer, Santa Clara, CA*

Oct 2024 – Present

- Developed a bilingual (English-Spanish) educational science app for Android and iOS, collaborating with cross-functional teams to deliver interactive lessons, quizzes, and games with real-time progress tracking, boosting engagement and retention.
- Engineered a scalable backend (Node.js, MongoDB) and integrated Firebase for real-time sync, ensuring a seamless user experience. Built cross-browser UI/UX (Flutter, Figma, JavaScript), boosting engagement by 35%.
- Achieved 92% test coverage with Jest for 15+ features. Led Agile sprints, optimizing features and workflows, improving team productivity by 27%. Integrated text-to-speech Spanish voiceovers for accessibility and multilingual learning.

Virtusa | *Software Developer, India*

Sept 2022 – May 2023

- Built and enhanced backend RESTful APIs using Java, Spring Boot, and Hibernate for a customer support automation system that processed live telecom queries. Implemented logic for ticketing and escalations, improving response time by 48%.
- Designed and integrated data storage solutions with MySQL for structured transactional data and Apache Cassandra for handling high-volume unstructured logs, ensuring high availability and fault tolerance.
- Containerized the application with Docker and deployed it to AWS EC2, utilizing S3 for storage and CloudWatch for monitoring, enabling seamless CI/CD and reducing infrastructure maintenance time.

ACADEMIC PROJECTS

Face Recognition System | *OpenCV, Dlib, NumPy, Python, Scikit-Learn*

- Developed a facial recognition model with preprocessing, feature extraction, and CNN-based encoding techniques.
- Achieved 96.2% testing accuracy using KNN, improving facial identification accuracy and efficiency.

Movie Recommendation System | *HTML, CSS, JavaScript, Python, Flask, Docker, AWS EC2, MySQL*

- Developed a content-based movie recommendation system using Flask for backend services and MySQL for optimized data storage.
- Deployed the application with Docker and AWS EC2, enhancing scalability, reliability, and performance.

Computerized Gardening System | *Java, JavaFX, Maven, SQL, OOP*

- Developed a virtual gardening simulation with Java, JavaFX, and OOP, automating plant care using real-time environmental data.
- Built a JavaFX GUI and SQL database to monitor plant health and manage 1,000+ plants with response times under 500ms.

TAAS Rentals | *React.js, MongoDB, Node.js, Stripe*

- Built a vehicle rental platform enabling customers to browse, book, and track vehicle reservations.
- Integrated Stripe for secure and seamless payment processing.

Job Search App | *React Native, Rapid API, Expo CLI*

- Built a React Native job search app with real-time listings, advanced filtering, and smooth application functionality.
- Integrated Rapid API-JobSearch to aggregate and display up-to-date job postings, enhancing job discovery.

Calories Burnt Prediction | *Python, Scikit-Learn, NumPy, Matplotlib, Seaborn*

- Developed a calorie burn prediction model using RDZSM-232 dataset, leveraging feature engineering and machine learning techniques.
- Achieved 97.56% accuracy using XGBoost, outperforming linear regression, random forest, and AdaBoost models.

CERTIFICATIONS AND ROLES

- AWS Certified Solutions Architect – Associate | NPTEL Certifications - The Joy of Computing using Python.
- Technical Seminar Presenter – Delivered a seminar on Real-Time Patient Monitoring System using IoT.
- Campus Executive - SkillVertex, drove initiatives for technical workshops and skill development to boost student engagement.
- Campus Ambassador – Acmegrade, organized events to enhance technical and professional growth.
