PROFESSIONAL PROFILE

Results-oriented **Software Development Engineer (SDE)** with expertise in full-stack development, scalable system design, and cloud-based solutions. Skilled in building and optimizing applications with strong problem-solving abilities in **data structures, algorithms, and distributed systems**. Experienced in developing robust, high-performance applications across **Java, Python, React, Node.js, and AWS/Azure** ecosystems. Recognized for delivering maintainable, test-driven code and collaborating across teams to solve complex technical challenges. Passionate about continuous learning and leveraging emerging technologies.

CERTIFICATIONS

- Java Foundations
- Docker Essentials: A Developer Introduction
- Web development
- AWS Solution Architect Associate, AWS Cloud Practitioner
- Oracle Database programming with SQL
- Career essentials in software development

TECHNICAL SKILLS

Languages: **Java, C, C++, Python, JavaScript**

Framework & Tools: **React, Node.js, Express, Docker, Git, REST APIs**

Database: **MySQL, PostgreSQL, MongoDB**

Cloud: **AWS (EC2, S3, CloudWatch, IAM), MS-Azure**

Other: **Data Structures & Algorithms, OOPs, Agile/Scrum**

EDUCATION

Master of Science: Computer Science

University of Illinois Springfield, Springfield, IL, USA

Dec 2025

GPA: 4.0

Bachelor of Engineering: Computer Science Engineering

Matrusri Engineering College, Osmania University, Hyderabad, India

June 2023

GPA: 3.5

- Achieved a Gold medal in academics

EXPERIENCE

University of Illinois Springfield

Web Developer, Graduate Assistant

September 2024 -Present

Illinois, United States

- **Form design and optimization**
 - Created and optimized web forms using HTML for improved usability, accessibility, and consistency.
 - Implemented permission-based access for unit heads reducing processing time by 30%.
- **Webpage and Content Management**
 - Created, updated, and maintained university webpages, ensuring content clarity with university standards.
 - Collaborated with faculty and staff to refine digital content, increasing page engagement by 15%.
- **Website Maintenance and Structural Improvements**
 - Identified, resolved dead links, enhancing navigation and site functionality.
 - Redesigned website components while ensuring consistent messaging through stakeholder collaboration.

Cloud4C services private limited

Associate Engineer

June 2023 – August 2024

Hyderabad, India

- **AWS System Operations and Governance**
 - Managed EC2 and S3 services for compute and storage operations.
 - Configured IAM policies and CloudWatch alarms reducing downtime incidents by 20%.
- **Azure Resource Monitoring and Optimization**
 - Monitored Azure resources such as VMs, and networks to ensure consistent performance and availability.
 - Leveraged Azure Monitor, Log Analytics, and Azure Advisor to detect issues, optimize resource utilization.
- **Windows/Linux Operations and Virtual Server Snapshot Management**

- Optimized Windows and Linux operations by troubleshooting and applying best maintenance practices.
- Captured and managed virtual server snapshots to ensure data integrity, enable quick recovery.
- **Strengthened Organizational and Interpersonal Skills**
 - Enhanced communication and collaboration through cross-team coordination.
 - Developed time management and task ownership by consistently meeting operational goals.

IEEE Pantech-E-Learning

September 2022 – December 2022

Software Development Intern

Hyderabad, India

- **Full stack Management System Development**
 - Designed and developed a dynamic eBook web application using Java Servlets, JSP, and PostgreSQL.
 - Implemented features for user registration, browsing, cart management, and order tracking.
- **Admin Panel & Backend engineering**
 - Built an admin interface to add, update, and manage book listings with server-side validation.
 - Enhanced content scalability and usability through responsive design and backend optimization.
- **Database & Security Enhancements**
 - Designed and optimized a PostgreSQL schema for book and order data management.
 - Integrated role-based access control and session security to safeguard sensitive data.

ACADEMIC PROJECTS

Interactive eBook Web app with Admin and Cart functionality

- Developed a dynamic eBook web application using Java Servlets, JSP, and PostgreSQL, allowing users to register, browse books, add them to a cart, and review order details with secure session handling and order tracking.
- Implemented an admin panel to manage book listings, including features to add and update book details, supported by intuitive user interfaces and robust server-side logic for seamless book and order management.

ChatConnect Application

- Built a real-time chat application using ReactJS for the frontend and Socket.IO for WebSocket-based communication, enabling users to exchange messages instantly and responsive UI.
- Implemented features including online status indicators, profile picture updates, and seamless message flow, ensuring a dynamic and user-friendly chat experience.

Rating an airport mapping database

- Team project, played a role as team leader. Designed a user-friendly, responsive web interface with advanced search functionality, enabling seamless navigation for passengers and staff
- Developed a structured MySQL database for efficient data management, while ensuring robust security using JWT authentication and optimizing performance through caching and front-end enhancements.

CloudFileUploader

- Built a file upload system with Node.js and Express, integrating AWS S3 for scalable and secure cloud storage of user files and manage efficiently.
- Configured AWS IAM user policies and access keys for secure permissions, and used Postman to test and validate API endpoints effectively.
