

SHREYA GHOSH

Java Full Stack Developer

Houston, TX | +1 (551) 310-0161 | shreya.gho160@gmail.com | [LinkedIn](#)

SUMMARY

- 5+ years of experience as a Java Full Stack Developer, specializing in building scalable and secure applications using Java (Spring Boot) and front-end technologies like React.js and Angular.
- Expertise in designing and implementing microservices architectures to optimize performance and scalability, with experience using RESTful APIs for seamless communication between services.
- Proficient in integrating event-driven communication using Kafka, enabling real-time updates and handling high transaction loads efficiently.
- Strong background in developing secure payment processing systems using Spring Security, ensuring secure transactions and data protection via encryption and two-factor authentication.
- Experience deploying applications on AWS and Microsoft Azure, utilizing EC2, RDS, S3, Azure App Services, and Azure SQL Database for scalable, high-performance hosting.
- Skilled in containerization using Docker and orchestration with Kubernetes, improving application portability and streamlining deployment across environments.
- Proficient in database optimization and schema design using PostgreSQL and MySQL to support high transaction volumes and ensure efficient data retrieval.

SKILLS

Programming Languages:	Java, C, C++, SQL, C#
Frameworks:	Struts, Hibernate, Spring Boot, Spring Batch, Spring Security, Spring AOP, Spring Core, Spring IOC, Angular 12, jQuery, Node.js, React.js, Express.js
Web Technologies:	HTML, CSS/CSS3, AJAX, jQuery, Bootstrap, XML, JSON, UI Material, SASS, Typescript, ES6, Redux, React Hooks, RESTful API
Java/J2EE Technologies:	Servlets, Spring, EJB, JPA, JTA, JDBC, JSP, JSTL, Webservices, Microservices, Spring MVC, Hibernate, ORM
Database:	Oracle SQL, MySQL, MongoDB, PostgreSQL, PL/SQL, DynamoDB
Cloud Platforms:	Amazon Web Services, Microsoft Azure
IDEs:	Visual Studio Code, Eclipse IDE, IntelliJ IDEA, Spring Tool Suite (STS)
Web/Application Servers:	Oracle WebLogic, IBM WebSphere, Apache Tomcat 8.0, Apache Tomcat, JBoss
Testing Tools:	JUnit, Mockito, Selenium
Build/ Other Tools:	Maven, Gradle, ANT, Jenkins, Docker, Kubernetes, SOAP/REST API, Postman, Jira, SonarQube, Kafka, Pandas, NumPy, Jupyter
Methodologies:	SDLC, Agile, Waterfall, SCRUM
Version Control:	Git, GitHub, SVN, Bitbucket
Operating System:	Windows, Linux, Mac OS

EXPERIENCE

Java Full Stack Developer | IBM, Texas, USA

May 2023 – Present

- Designed and developed a scalable e-commerce platform using Java (Spring Boot) for backend services and React.js for front-end development, delivering a seamless user experience across multiple devices.
- Implemented microservices architecture to manage user accounts, product inventory, order processing, and payment systems, improving system scalability and maintainability.
- Designed RESTful APIs using Spring Boot to enable communication between microservices and third-party systems, optimizing the e-commerce ecosystem.
- Implemented asynchronous communication via Kafka to handle high loads and mitigate delays during peak sales periods, ensuring seamless order processing.
- Integrated Kafka for event-driven communication between microservices, enabling real-time updates across product availability, order status, and payment processing.
- Developed a robust and secure payment processing system using Spring Security for user authentication and authorization, ensuring secure transactions in the e-commerce platform.
- Leveraged Docker for containerization and orchestration, ensuring the application was scalable, portable, and easily deployable across multiple environments.

- Deployed the application on AWS utilizing cloud services such as EC2, RDS, and S3, improving performance, scalability, and cost-efficiency.
- Optimized database performance by using PostgreSQL and designing efficient schemas for product inventory, user accounts, and order history, supporting high transaction volumes.
- Built responsive and dynamic front-end interfaces using React.js and Redux for state management, providing a smooth user experience for product browsing and order management.
- Implemented continuous integration and continuous deployment (CI/CD) pipelines using Jenkins, Docker, and Kubernetes, improving the speed and reliability of the development lifecycle.
- Collaborated in an Agile environment with cross-functional teams, using Jira for task management and GitHub for version control, ensuring timely delivery of new features and bug fixes.

Java Full Stack Developer | Wipro, INDIA

Feb 2019 – Aug 2022

- Developed the backend services of the platform using Java Spring Boot to support seamless transaction processing, real-time wallet balance updates, and user authentication.
- Designed and implemented efficient database structures using MySQL to store user wallet data, transaction history, and payment logs with scalability in mind.
- Integrated PayPal and Stripe payment gateway APIs into a digital wallet platform, enabling users to perform secure transactions using RESTful APIs.
- Implemented Spring Security to secure financial transactions, applying encryption techniques and two-factor authentication for enhanced security.
- Developed and deployed microservices for transaction processing, user management, and payment gateway integration using Spring Boot and Docker for containerization and streamlined deployment.
- Built the user interface using Angular to provide an intuitive and responsive experience for managing digital wallets and transactions.
- Applied UI Material, Bootstrap, and SASS to create responsive and user-friendly interfaces for digital wallet management, ensuring compatibility across various devices and browsers.
- Enabled cross-platform compatibility for the payment gateway integration, ensuring a consistent experience across Windows, Linux, and Mac OS environments.
- Implemented transaction history tracking and generated financial reports by utilizing SQL queries and REST APIs for seamless retrieval of user data.
- Set up Jenkins pipelines for automated testing, build, and deployment of the application, ensuring quick and safe delivery of new features and updates.
- Used Postman to thoroughly test SOAP APIs, ensuring seamless communication between the frontend, backend, and integrated payment gateways.
- Used Selenium for automated UI testing, ensuring the functionality and performance of the digital wallet platform across multiple browsers, and identifying issues in real-time during the development cycle.
- Deployed and managed the digital wallet platform on Microsoft Azure, utilizing Azure App Services for scalable hosting, Azure SQL Database for data storage, and Azure Key Vault for secure management of sensitive data and credentials.

EDUCATION

Master of Science in Computer Science - New Jersey Institute of Technology, Newark, New Jersey

Bachelor of Technology in Computer Science and Engineering - Techno Main Salt Lake, Kolkata, INDIA
