EDUCATION

The Pennsylvania State University

Graduation: Dec 2025

Degree: Bachelor of Science in Computer Science

GPA: 3.7/4.00

Minor: Engineering Leadership Development, Digital Arts

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Systems Programming, System Debugging, Discrete Mathematics, Computer Vision, Artificial Intelligence

Certification: Google Cloud Associate Cloud Engineer

TECHNICAL SKILLS

Languages: Python, C#, C++, C, Java, HTML, CSS, JavaScript, TypeScript, SQL, Bash

Frameworks/Libraries: React, Tailwind CSS, Express.js, Node.js, Selenium, OpenCV

Tools/Platforms: Git, Docker, Kubernetes, Linux, GCP, AWS, MongoDB, MySQL

Organizational : Project Management, ClickUp, Jira, Agile Development, CI/CD, Jenkins

Design & Creative Software: Unity, Blender, Figma, Photoshop, Illustrator, Lens Studio

WORK EXPERIENCE

Software Engineer – Student Accelerator

March 2025 – Present

Snap Inc.

Remote

- Secured **\$25,000 funding** through Snap's Spectacles Student Accelerator to develop an **AR PvP magic shooter** for Snap wearable glasses.
- Built **hand tracking**, **gesture-based attacks**, and **multiplayer synchronization** using **Lens Studio** and **TypeScript**.
- Led **Agile** sprint planning and task tracking with **ClickUp**, managing timelines and feature delivery for a 4-person dev team using **Git**.

Software Engineer Intern

May 2024 – July 2024

CredenceSoft Private Limited, NZ

Remote

- Automated inventory updates for 1000+ hotels on Google Hotel Center using **Python**, boosting update speed by **27%**.
- Enhanced web scrapers with **REST API** and **GCP bucket** integration to fetch real-time pricing data and store it in **BigQuery** using **SQL**, cutting retrieval time by **21%**.
- Built unit and integration tests to ensure scraper accuracy and reliability across multiple platforms.
- Leveraged **Git** and **GCP CI/CD workflows** to automate data pipelines, reducing time sales teams spend sourcing prospective clients by **46%**.

Undergraduate Research

Oct 2023 – Dec 2024

College of Information Science and Technology

University Park, PA

- Created a **VR Maze simulation** in **Unity** using **C#** to study spatial awareness in visually impaired users.
- Integrated spatial audio and collision feedback with **AWS Polly** for real-time **text-to-speech** interaction.
- Conducted user testing with 10+ participants and documented accessibility insights with a multidisciplinary team.

PROJECTS

Restaurant Ordering System | *React, JavaScript, Node.js, AWS, MySQL, Docker, Kubernetes, WebSockets, Raspberry Pi*

- Built a **full-stack multi-kiosk ordering system** for a local restaurant that increased operational throughput by **12%** and reduced customer wait times by **34%**.
- Engineered real-time inventory tracking and **POS synchronization** using **RESTful APIs** and **MySQL** and enabled **label printing** via **WebSockets** and **Raspberry Pi**.
- Containerized and deployed backend on **AWS ECS** with **Auto Scaling** and **Load Balancer** to create a scalable and highly available infrastructure.

Smart Itinerary Planner | *React, Node.js, Google Maps API, Gemini AI, Supabase, Docker*

- Built a **travel planner** that uses **Gemini AI** to generate personalized itineraries with multi-stop routes.
- Integrated **Google Maps Directions API** for real-time route planning with travel time calculations and custom map markers, enabling users to visualize and plan multi-destination trips efficiently.
- Deployed online using **Docker** with a scalable microservices setup featuring **React** frontend, **Node.js** backend, and **Supabase** authentication.

LEADERSHIP EXPERIENCE

IT Student Support Specialist

Aug 2024 – Present

Penn State IT

University Park, PA

- Lead and mentor support staff and provide technical assistance to students across **Windows**, **Linux**, and **macOS**
- Developed a **Chrome extension** to streamline internal time clock-in and boost workflow efficiency.
