## EXPERIENCE

### Blue Cross and Blue Shield of Kansas

Topeka, KS

*Data Scientist*

*Nov 2024 – Present*

- Developed and deployed a Gen-AI powered customer interaction summarization tool using **OpenAI GPT 4-o mini API** and **LangChain** reducing manual case note review time by **60%**.
- Designed and delivered KPI dashboards (claims turnaround time, denial rates) in **Power BI** to support executive reporting and operational oversight.
- Built and deployed predictive models using Python, PySpark, and MLlib improving churn prediction accuracy by **19%** and achieving **87%** precision.

### CVS Health

St. Louis, MO

*Data Scientist*

*Feb 2024 – Oct 2024*

- Developed supply chain dashboards that tracked stockouts in **Tableau**, demand trends, and clinical drivers, improving inventory planning and reducing shortages.
- Conducted **exploratory data analysis (EDA)** on supply chain datasets to uncover clinical and logistical drivers, improving inventory planning and reducing stockouts across retail locations.
- Designed and deployed distributed **ETL workflows** using PySpark and AWS Glue, cutting model training times by **40%** and enabling faster insights at scale.
- Optimized predictive models, achieving an **AUC-ROC of 0.91** and lowering error rates (RMSE) by **18%**.

### Tanla Platforms

Hyderabad, India

*Data Analyst*

*July 2021 – July 2023*

- Enhanced marketing precision by 22%** through customer segmentation analysis using clustering techniques (K-means, Hierarchical) in Python, directly improving campaign ROI.
- Increased stakeholder adoption by 30%** by building and maintaining interactive Tableau dashboards with dynamic filters and row-level security, enabling data-driven decision-making.
- Accelerated incident resolution and improved monitoring by designing and operationalizing real-time analytics pipelines with Kafka, MongoDB, and HBase, streamlining reporting workflows.

### Sanofi Pharma

Hyderabad, India

*Data Analyst*

*Jun 2020 – Jul 2021*

- Improved **risk forecast accuracy by 20%** through statistical modeling using SAS and SQL.
- Boosted **data throughput by 40%** by developing ETL pipelines with SSIS to migrate data from SAS to SQL Server, accelerating downstream analytics.
- Automated **75% of recurring reporting queries** by building relational data models and SQL views, reducing manual effort and improving efficiency.
- Delivered interactive drill-down reports in SSRS, enabling **faster and data-driven decisions** for finance and executive leadership.

## SKILLS

**Programming:** Python, R, SQL, SAS

**Databases & Warehousing:** Amazon Redshift, MS SQL Server, MySQL, Oracle, PostgreSQL, Teradata

**Machine Learning & AI:** Regression, Classification, Clustering, Time Series, ANOVA, PCA, NLP

**Data Engineering & Big Data:** Apache Spark, Hadoop, Hive, AWS (S3, EMR, EC2), SQL Server Integration Services (SSIS)

**Visualization & Reporting:** Tableau, Power BI, Excel, Matplotlib, Seaborn, ggplot2

**Tools & Frameworks:** Git, Linux, SQL Server Management Studio, Visual Studio, scikit-learn, XGBoost, TensorFlow, PyTorch

## PROJECTS

### Pharma Sales Forecasting Dashboard | *Analytics & BI*

- Designed an interactive Power BI dashboard to forecast pharmaceutical sales by region, product, and seasonality, improving demand planning accuracy by **18%**.

### Customer Lifetime Value (CLV) Segmentation | *SQL, Tableau*

- Built SQL pipelines to compute CLV and churn risk scores, visualized in Tableau to inform targeted marketing strategies and boost retention.

### CIFAR-10 Classification using Wide Residual Networks | *Deep Learning*

- Implemented **Wide Residual Networks** for CIFAR-10 using **PyTorch**, improving test accuracy to **96.5%** with image augmentation and early stopping.

## EDUCATION

### Saint Louis University

St. Louis, MO

*Master of Science (M.S.) in Computer Science, Concentration: Bioinformatics*
