

SHRII SUDHAN KANNAN

shriisudhankannan@gmail.com | (682) 416-6688 | [linkedin.com/in/shrii-sudhan-kannan-608255223/](https://www.linkedin.com/in/shrii-sudhan-kannan-608255223/)

SKILLS

Technical skills: Python, Java, C#, HTML, CSS, Javascript, SQL, React, Typescript

Development Environments & Tools: MySQL, Azure DevOps, Git, PowerBI, Tableau, Networks

Domain knowledge: Problem solving, Software development, Agile, Research & Analysis, RESTful API

EXPERIENCE

Software Engineer Intern

Jan 2025 - Present

Atlas Systems | Agile - stakeholder communication |

New Jersey, United States

- Built scalable front-end modules in React with Material-UI, improving responsiveness and performance.
- Acted as a liaison between technical teams and business stakeholders, translating requirements into testable solutions and providing clear client documentation.
- Worked closely with product owners and testers to translate tech features into clear, business outcomes.
- Collaborated in an **agile environment**, accelerating feature delivery by **25%** through sprint-based development and cross-functional teamwork.
- **Explained** software automation **features to non-technical clients, ensuring clear understanding** of technical concepts.
- **Prepared** and maintained internal **documentation for newly researched libraries** to support future development and onboarding.

Software Engineer Intern

Sep 2022 - May 2023

Appmerise Inc | Html - Javascript - Python - client presentation |

Chennai, India

- Developed a dynamic website for a domestic airline, supporting 500 daily users and 100+ bookings per day, by optimizing the user interface and backend that **reduced booking time by 20%**.
- Gathered client requirements, researched industry systems, and proposed scalable solutions — demonstrating early consulting exposure.
- **Documented and presented** the technical architecture to a mixed **technical/non-technical team** for future scale-ups.

PROJECTS

AI-Driven garbage sorting | Python - ResNet V2 - pandas - CNN |

- Designed and implemented a machine learning solution using ResNet V2, achieving **92.5% accuracy** and improving waste classification efficiency by **40%** in simulated ERP-style workflows.
- Conducted research on academic models, collaborated with peers, and documented solution design decisions to ensure shared understanding and scalability.

Campus Dining Management System | Html - css - Javascript (ES6+) - Styled components- PHP - SQL |

- Built an **ERP-like dining order management system** that reduced order processing time by **40%** and improved adoption by **20%** through streamlined workflows.
- Designed dynamic menu customization features and optimized SQL queries, ensuring **scalability and seamless experience** for 500+ daily active users.

Digital Thesis Repository | Next.js - Express.js - SQL - socket.io |

- Developed a centralized ERP-style repository with **real-time communication and notifications**, enabling faster collaboration for students and faculty.
- Improved database efficiency with optimized SQL queries, achieving a **25% faster retrieval time**, while enhancing usability through a **user-friendly interface**.

EDUCATION

Master of Science, Computer Science

Aug 2023 - May 2025

University of Texas at Arlington

Bachelor of Engineering, Computer Science

Jul 2019 - May 2023

National Engineering College
