Summary

Data Analyst with 2+ years of experience in Python (Pandas, NumPy, Scikit-learn), SQL, and R for data analysis, statistical modeling, and predictive analytics. Skilled in creating dashboards with Tableau and Power BI, automating ETL processes, and performing data cleaning and validation. A/B testing, regression analysis, time series forecasting, and customer segmentation. Adept at translating complex data into actionable insights.

Technical Skills

- **Technical Skills:** Python, SQL, R, Apache Spark, Hadoop
- **Visualization:** Tableau, Power BI, Excel (VBA, Pivot Tables, VLOOKUP)
- **IDEs:** Jupiter Notebook
- **Packages:** Pandas, NumPy, Scikit-learn, Matplotlib
- **Database:** MySQL, PostgreSQL, Oracle
- **Statistical Methods:** Hypothesis Testing, Regression Analysis, Time Series Analysis, A/B Testing
- **Data Management:** ETL Processes, Data Cleaning, Data Warehousing, Database Management
- **Soft Skills:** Problem-Solving, Cross-Functional Collaboration, Stakeholder Communication

Experience

DXC Technology, India

Jun 2023 - Dec 2024

Data Analyst - Remote

- Developed and maintained interactive Tableau dashboards to monitor KPIs, resulting in a 15% improvement in operational efficiency for cross-functional teams.
- Conducted predictive analytics using Python and Scikit-learn to forecast customer churn, achieving a 20% reduction in retention costs through targeted campaigns.
- Designed and implemented ETL pipelines using SQL and Apache Spark to process 10TB+ of unstructured data, reducing data processing time by 30%.
- Performed A/B testing and statistical analysis to optimize marketing strategies, increasing conversion rates by 12% for e-commerce platforms.
- Collaborated with product teams to identify key user behavior trends, leveraging segmentation analysis to inform feature development and improve user engagement by 18%.
- Utilized Matplotlib and Seaborn to visualize distribution trends, customer segmentation, and model performance metrics for better storytelling and analysis.
- Automated recurring reports using Python scripts and SQL queries, saving 25 hours manual reporting effort per month.
- Presented actionable insights to C-level executives, translating complex data findings into strategic recommendations that drove a 10% revenue increase.

CitiusTech, India

Jan 2022 - May 2023

Data Analyst

- Analyzed sales and inventory data using SQL and Power BI to identify underperforming product lines, leading to a 5% reduction in excess stock.
- Built time series models in R to predict seasonal demand, improving supply chain planning accuracy 22%.
- Cleaned and standardized 5M+ customer records using Python and Pandas, enhancing data quality for CRM system integration.
- Created Excel models with VBA to streamline budgeting processes, reducing forecasting errors by 15%.
- Conducted cohort analysis to evaluate customer lifetime value, enabling marketing teams to refine loyalty programs and boost retention by 10%.
- Worked with relational databases including MySQL, PostgreSQL, and Oracle to support data extraction, transformation, and reporting tasks.
- Partnered with IT to optimize data warehouse queries, cutting report generation time by 40% through indexing and query tuning.
- Delivered monthly presentations to stakeholders, using data visualizations to highlight trends and recommend process improvements, resulting in a 7% cost savings.

Education

Master of Science in Data Science

University of Alabama at Birmingham, Birmingham, AL

Jan 2024 - Aug 2025

Bachelor of Technology in Computer Science Engineering

Malla Reddy Institute of Engineering & Technology, Hyderabad, India

Aug 2019 - Jul 2023
