

SHRUTI DAUNDKAR

Software Engineer

Email: shrutidaundkar8@gmail.com | Contact: 971-387-6978 | Location: OR, USA | LinkedIn

PROFESSIONAL SUMMARY

Experienced Software Engineer with over 3+ years of expertise in designing and developing dynamic, scalable web applications and backend systems. Proficient in Java, Python, Spring Boot, React, Node.js, and Golang, with a strong focus on building robust RESTful APIs and deploying secure, high-performing microservices. Skilled in optimizing system performance, enhancing user experiences, and implementing CI/CD pipelines using Jenkins, Docker, and Kubernetes. Adept in leveraging AWS (EC2, S3, Lambda) and Redis for cost-efficient, scalable cloud solutions, achieving a 10% reduction in server costs. Blockchain enthusiast with experience developing dApps and creative solutions using Ethereum smart contracts.

SKILLS

- Methodologies:** Agile (Scrum, Kanban), SDLC, Waterfall
- Programming Languages:** Java, Python, Golang, JavaScript, TypeScript, C, C++
- Frameworks/Libraries:** Spring Boot, Hibernate, Flask, Django, FastAPI, React, Angular, RxJS
- Web Development:** RESTful APIs, HTML5, CSS3, AJAX, GraphQL, gRPC, SQLAlchemy
- Database Technologies:** MySQL, PostgreSQL, MongoDB, Oracle, Redis
- Caching:** Redis, in-memory data storage optimization
- Big Data Processing:** Apache Kafka, RabbitMQ, ETL processes
- Testing Tools:** JUnit, Mockito, Pytest, TestNG, Selenium, Postman, Mocha
- Version Control:** Git, Bitbucket, SVN, branching strategies
- Cloud Platforms:** AWS (EC2, S3, Lambda, RDS), Azure, GCP
- DevOps & CI/CD Tools:** Jenkins, Docker, Kubernetes, Terraform, Ansible, Maven
- Security & Compliance:** OAuth 2.0, JWT, Spring Security, HIPAA compliance
- Soft Skills:** Problem-solving, collaboration, adaptability, effective communication

EXPERIENCE

Bristol Myers Squibb, United States

May 2024 - Current

Software Engineer

- Developed a web application using Java and Spring Boot, optimizing performance through effective design patterns and dependency injection, achieving a 30% increase in response time.
- Created a responsive user interface with React, utilizing Redux for state management, resulting in a 25% increase in user engagement and satisfaction ratings.
- Implemented a microservices architecture using Flask to manage user authentication and authorization with JWT, enhancing system modularity and reducing deployment times by 40%.
- Automated deployment pipelines with Jenkins and Docker, utilizing Docker Compose for multi-container orchestration, enabling continuous integration and reducing release times from two weeks to one week.
- Deployed applications on AWS (EC2, S3), implementing Elastic Load Balancing and Auto Scaling to ensure a 99.9% uptime and improved scalability for high-traffic events.
- Employed New Relic for performance monitoring and application profiling, proactively identifying bottlenecks and achieving a 15% reduction in downtime through real-time alerts and reporting.
- Collaborated in Agile sprints using JIRA, enhancing project delivery timelines by 20% through effective task management, sprint retrospectives, and continuous feedback loops.
- Enhanced API performance by 1.5x through the strategic transition from REST calls to gRPC, reducing network latency.
- Spearheaded agile development, achieving a 30% cycle reduction through effective Scrum practices using Python, JavaScript, and Java, emphasizing collaboration, microservices implementation, and scaling features.
- Implemented advanced API authentication and authorization protocols with JWT (JSON Web Tokens), reducing unauthorized access attempts by 30%.

Hexaware Technologies, India

Jan 2020 - Aug 2022

Software Engineer

- Designed and developed a customer dashboard using Angular, implementing RxJS for reactive programming and improving UI responsiveness, resulting in a 35% increase in user interaction.
- Built robust RESTful APIs with Spring Boot, utilizing Hibernate ORM for object-relational mapping, leading to a 50% decrease in response time and enhanced overall system performance.
- Integrated Apache Kafka for handling real-time data streaming in a logistics application, implementing consumer groups and partitioning strategies to significantly enhance data processing efficiency.
- Managed data storage with MySQL and PostgreSQL, optimizing complex queries through stored procedures and indexing strategies that improved data retrieval efficiency by 30% for analytics features.
- Developed a data visualization tool using Python and Matplotlib, enabling stakeholders to derive insights from data effectively and enhancing reporting capabilities with interactive dashboards.
- Conducted unit and integration testing using JUnit, Mockito, and Postman, achieving a 40% reduction in post-deployment issues and increasing overall code reliability through thorough test coverage.
- Implemented version control with Git and Bitbucket, employing branching strategies (feature branching, GitFlow) to facilitate smooth collaboration among team members and minimize conflicts during development.
- Employed Redis for caching strategies, resulting in a 20% decrease in database load and significantly improving application response times through in-memory data storage and retrieval.
- Incorporated Docker containerization into a robust CI/CD pipeline, streamlining the deployment of microservices, ensuring rapid, reliable, and scalable delivery of software updates.

EDUCATION

Master of Science in Computer Science

Portland State University, USA

Sep 2022 - Jun 2024

Bachelor of Engineering in Computer Science

Savitribai Phule Pune University, India

Aug 2018 - Jun 2021

Diploma in Computer Engineering

Government Polytechnic, Pune, India

Aug 2015 - Jun 2018
