EXPERIENCE

Leeds School of Business – University of Colorado Boulder

Aug 2025 – Oct 2025

Teaching Assistant

Boulder, CO

- Facilitated instruction for 190+ business minor students by reinforcing core marketing frameworks (4Ps: product, price, place, promotion) and supporting applied learning in class.
- Collaborated with faculty on curriculum planning and grading, created assessments, managed iClicker-based classroom engagement for 193 students, and mentored 30+ students individually during office hours, improving comprehension by 25%.

Primoris Renewable Energy (Capstone client – CU Boulder)

Mar 2025 – May 2025

Business Analytics Intern

Boulder, CO

- Implemented **predictive workforce planning models** (Random Forest, Survival Analysis) with stakeholder collaboration, achieving **85% forecast accuracy**, cutting hiring delays by **30%**, and optimizing **resource allocation** across 20+ projects.
- Developed QA-validated Excel/Power BI dashboards and Figma-based LinkedIn-style employee portal to centralize project postings and staff availability, reducing scheduling time by 40% and boosting team productivity by 15%.

Rudi's Organic Bakery (Capstone client – CU Boulder)

Jan 2025 – Mar 2025

Data Analytics Intern

Boulder, CO

- Built a Python-based geospatial optimization model informed by logistics team input; reduced operational costs by 12% and improved planning speed and decision accuracy by 30%.
- Designed the DataCrumb app prototype, an interactive dashboard combining predictive insights and route trends; streamlined decision-making and earned Top 3 client recognition.

Unique Motors Globe (Mahindra EV Dealership)

May 2023 – May 2024

Marketing Data Analyst

Mumbai, MH

- Conducted **customer segmentation analysis** on 15K+ EV test drives using Python & R, improving lead qualification and boosting test-drive-to-purchase conversion by **18%**.
- Designed **time series demand forecasts** in R for vehicle procurement and parts inventory, reducing excess stock by **22%** and cutting annual holding costs by **\$85K**.
- Developed and deployed an **XGBoost lead scoring model**, improving campaign targeting precision by **28%** and generating **\$210K in incremental ROI** from marketing campaigns.
- Automated the **test drive booking workflow** and built **KPI dashboards (Excel, Power BI)** to track conversion rates, churn risk, and ROI, reducing manual input by **30%** and enabling data-driven sales strategies.

SKILLS

Languages & Modeling: Python, SQL (SQL Server), R, Scikit-learn, Time-Series Forecasting, Segmentation, XGBoost

Visualization & BI: Power BI, Tableau, Excel (Dashboards, Pivot Tables, Power Query), Google Sheets, Figma

Business Tools & Processes: KPI Tracking, Resource Planning, Data Cleaning, ETL, Stakeholder Communication, A/B Testing

Leadership & Involvement: Women Development Cell (200+ participants workshops), DLLE community projects, MBAA & Women in Business

EDUCATION

University of Colorado Boulder, Leeds School of Business

July 2024 – Dec 2025

Master of Science in Business Analytics | GPA: 3.6/4.0

Boulder, CO

University of Mumbai, India

June 2020 – Nov 2023

Bachelor of Business Management Studies | GPA: 3.6/4.0

Mumbai, MH

PROJECTS

WasteTrack AI – Recycling Analytics & Contamination Prediction Platform [Link](#) | Python, ETL, ML, Docker, Streamlit

- Addressed fragmented waste data systems by engineering scalable ETL pipelines across 10+ cities, weather, and census sources with Airflow-driven orchestration, improving data quality and pipeline reliability by 40%.
- Tackled high contamination** by developing **ML models (XGBoost, LightGBM, K-Means, Isolation Forest)** for prediction and forecasting volumes, achieving **30–40% contamination reduction** and **20–35% diversion improvement**.
- Overcame lack of operational visibility by building a real-time geospatial dashboard (Streamlit, Plotly, Grafana) with 10+ KPIs, empowering city planners to optimize routes and cut operational costs by 15–25%.

BizMetrics360 – Financial & Operational KPI Intelligence Platform [Link](#) | SQL, Python, Power BI, Excel

- Built **SQL-based ETL pipelines** integrating ERP, CRM, and finance datasets (sales, churn, marketing spend, operating costs), improving **reporting efficiency by 60%** and ensuring data consistency.
- Automated **12+ critical KPIs** (CAC, CLV, revenue growth, retention, churn %, gross margin, ROI per channel), reducing manual reporting errors by **35%** and accelerating **financial analysis by 50%**.
- Designed an **executive dashboard** with drilldowns and scenario modeling, cutting reporting turnaround from 5 days to real-time and reducing **low-ROI spend by 18%** (\$250K reallocated).

Productivity Pulse – Workforce Burnout & Health Analytics [Link](#) | Power BI, SQL, DAX measures, Power Query, Excel reports

- Engineered **SQL and Power Query ETL pipelines** to clean, transform, and integrate 50K+ workforce survey records (hours, roles, salary, health issues, demographics); **automated KPI tracking with advanced DAX measures** for burnout %, absenteeism, and work–life balance, **improving reporting accuracy by 60%** and **reducing manual effort by 15+ hours/month**.
- Designed interactive Power BI dashboards with drilldowns by job role, work arrangement, and health indicators (burnout, back pain, eye strain), delivering predictive insights that enabled HR to **optimize resource allocation by 20%**, **reduce high-burnout cases by 15%**, and improve employee well-being scores by 12%.
