

PROFESSIONAL EXPERIENCE

Project Clinic Intern, University of Buffalo

September 2025 - Present

- Partner with **corporate and mid-market clients** to analyze financial data, assess risk exposure, and design interactive dashboards supporting executive level decision making and client reporting accuracy.
- Built **budget optimization and scenario based forecasting models** for planning and resource allocation.
- Collaborated with cross functional client teams to evaluate pricing strategies and build financial dashboards mirroring client transaction service analytics at enterprise scale.

Financial Analyst, Johnson Controls (EMEA Region) |

September 2022 – June 2024

- Partnered with Finance Systems and **SAP S/4HANA** teams to streamline invoice to pay workflows, automate reconciliations, and standardize financial reporting across multi regional entities post-acquisition.
- Supported SAP enabled month end close automation and variance analytics, improving **reporting accuracy by 30%** and accelerating close timelines to strengthen liquidity visibility and risk control.
- Collaborated with FP&A and Treasury teams to design cost tracking dashboards and integrate Oracle to SAP data migration, enhancing working capital forecasting, cost allocation accuracy, and **ERP based reporting consistency (SAP S/4HANA)**.
- Leveraged **SAP Fiori, Power BI, and advanced Excel models** (NPV, IRR, scenario analysis) to evaluate cash flow impacts, optimize funding cycles, and support data driven business case development.
- Partnered with cross functional teams on liquidity and compliance reporting, applying analytical frameworks relevant to **captive insurance, underwriting risk, and financial control environments**.
- Supported financial reporting, variance analysis, and forecasting across cost centres, operating expense, and gross margin metrics, ensuring alignment with business KPIs and capital planning goals.

Intern, Ready Wealth

December 2021 – February 2022

- Built **cash flow and valuation models** for client portfolios, identifying key investment performance drivers.
- Developed **data driven client reports and visual analytics**, increasing stakeholder engagement by **10%**.

EDUCATION

University at Buffalo, The State University of New York, United States
