PROFESSIONAL SUMMARY

Senior Data Analyst with 7+ years of experience designing and optimizing scalable data pipelines, cloud infrastructure (AWS/Azure/GCP), and ETL systems. Proven expertise in ETL optimization, data warehousing (Snowflake, Redshift), and workflow automation. Reduced data processing time by 50-70% using dbt, PySpark, and cloud-native tools. Certified Azure Data Engineer and AWS Data Analytics Specialist.

TECHNICAL SKILLS & TOOLS

Programming Language: Python (NumPy, Pandas, Matplotlib), R, SQL, T-SQL

Databases: MySQL, Microsoft SQL Server, PostgreSQL, Oracle, Teradata, DB2

Data Visualization: Tableau, Microsoft Power BI, Looker, Microsoft Excel (Pivot Tables, VLOOKUP, VBA, Macros)

Data Warehousing: Amazon RedShift, Hive, Snowflake

Big Data/Cloud Technologies: Microsoft Azure, AWS, Databricks, GCP, Azure Synapse, dbt

Data Integration/BI/ETL: Talend, SQL Server Integration Services (SSIS), Azure Data Factory, ER/Studio, Visual Cron, Spark (PySpark, Scala), SSRS, SAP, A/B testing, Alteryx, BigQuery

Methodologies: Agile (Scrum/Kanban) methodology

Other Tools: JIRA, Confluence, MS Office, Git, Jupyter Reports, Trello, Lucid Chart, Balsamiq, Microsoft Project

EDUCATION

Boston University

Boston, MA, USA

Master of Science in Computer Information Systems

2021

R.G.P.V University

Bhopal, India

Bachelor of Engineering in Computer Science Engineering

2016

WORK EXPERIENCE

Microsoft, USA

New York, NY

Sr. Data Analyst

Nov 2022 – Feb 2025

- Built SSIS/SQL ETL pipelines integrating 6 data sources into Power BI, increasing marketing ROI by 5%
- Automated incremental loads from Azure Data Lake to Snowflake using dbt, improving pipeline reliability by 40%
- Engineered dbt models standardizing raw sales data schemas, cutting processing time by 50%
- Developed Python scripts automating ADF to SQL Server flows, enabling real-time sales reporting
- Optimized Snowflake clusters through workload analysis, reducing query costs by 25%
- Implemented data validation frameworks in PySpark, improving dataset accuracy by 30%

Environment: Power BI, ETL, Azure synapse, SQL Server 2016, SSMS, dbt, Microsoft Azure, Azure ADF, Python, Data Lake, Hive, Pyspark, Snowflake, Data Management & Governance, Data Lineage, Data Quality Management

Compass, USA

New York, NY

Data Analyst

Jun 2021 - Nov 2022

- Migrated 12 TB BI data to Redshift with optimized keys, slashing query runtime by 60%
- Architected AWS Glue pipelines processing 2M+ daily transactions, cutting ingestion latency by 10%
- Developed PySpark data lakes for real estate analytics, enabling MLS decision automation
- Orchestrated pipeline monitoring with custom Dash/Plotly dashboards, reducing 50% failure response time
- Designed DynamoDB schema for fast metadata lookups, accelerating ETL by 15%
- Trained and mentored 9 consultants in BigQuery, Databricks and AWS, and supervised their work.
- Promoted data literacy and decision-making by presenting sales and revenue data insights to technical and non-technical users.
- Leveraged Databricks and Synapse to analyze real estate data, achieving 85% data accuracy and enabling improved decision-making for MLS.

Environment: Python, SQL, Tableau, Databricks, ETL, Pyspark, Google Tag Manager, Google data Studio, Big Query, Amazon Web Services (AWS), Agile, Scrum, A/B Testing, Data Analytics & Reporting

Boston University (Massachusetts General Hospital), USA
Data Analyst

Boston, MA
May 2020 - May 2021

- Collaborated with Massachusetts General Hospital to model breast cancer treatment outcomes for patients, analyzing over 7000 rows of data in Excel VBA with predictive analysis and achieving 60% accurate results in breast cancer diagnosis.
- Improved the accuracy of breast cancer diagnosis by 65% through analyzing 7000+ patient reports in Python and SQL.
- Devised procedures for data extraction, transformation, and integration of administrative claims data using hive, and PySpark establishing to robust validation techniques.
- Contributed to database design using SQL, and performed data mining and testing in close collaboration with clinical programmers.

Environment: Python, SQL, Agile, Scrum, Statistical Analysis, Predictive Analysis, Excel, Pyspark, Data Lake, Scrum

WebCraft IT (Citi Bank), India
Business Data Analyst/ Consultant

India
Feb 2015 - May 2019

- Reduced data processing time by 70% by implementing an innovative database schema with over 43 tables, improving overall financial data analysis and tradeoffs analysis.
- Conducted A/B tests on UI changes in trading portals, using R and Python for significance testing and driving a 15% improvement in user task completion.
- Revised and implemented backup recovery procedures, achieving a 56% increase in accuracy for metrics reports.
- Enriched stakeholder communication by conducting 15+ user interviews and developing empathy maps and personas, resulting in a 27% boost in customer retention.
- Increased capital market team efficiency by 30% by implementing agile and scrum methodology and using JIRA for user story management.

Environment: Python, MySQL Server, Power BI, Jupyter, Excel, Jira, Confluence, Scrum, A/B Testing, Agile

VOLUNTEERING EXPERIENCE

AICamp

Community Manager, New York

Jan 2023 - Present

- Coordinated partnerships with local tech companies and speakers to sponsor AI community events.

Women in Data Science Worldwide (WiDS)

Team Leader

Jan 2024 - Present

- Organized and executed a successful Women in Data Science (WiDS) New York Regional Event, attracting over 300 attendees.

Mindstone

Community Lead, Worldwide

Jan 2024 - Present

- Developed strategic partnerships with industry leaders to co-host AI awareness events within the global AI community

CERTIFICATIONS

- Microsoft Certified: Azure Data Engineer Associate
- Google Cloud Certified: Professional Data Engineer
- Data Visualization with Power BI (Microsoft)
- Data Analytics Certified from Google & AWS
- Genrative AI (Google)
