SUMMARY

Experienced Systems Analyst with 3 years of expertise in business intelligence, process optimization, and software development. Skilled in requirements gathering, stakeholder management, debugging code, performing code reviews, and managing assets. Experienced in designing test cases and coordinating user acceptance testing (UAT) to ensure software quality. Proven ability to translate business needs into actionable solutions using data processing and visualization, streamline workflows, support strategic decision-making, and collaborate effectively with cross-functional teams for successful project delivery.

SKILLS

Analysis: Tableau, Power BI, Plotly, SQL, Python Pandas, Data ETL, Data Modeling
Technical: Python, Java, C#, JavaScript, RESTful APIs, Microsoft PowerApps, Github, JIRA, Selenium, SDLC
Framework: React.js, Node.js, .NET, Jenkins, GitHub, MongoDB, PostgreSQL, Apache Hive
Business: Requirements Gathering, Documentation, Workflow Optimization, Stakeholder Management
Collaboration: Agile Methodologies, Cross-Functional Teamwork, Software Testing
Cloud: AWS, Microsoft Azure, Google Cloud Platform, Snowflake Data Warehouse, CI/CD pipelines
Testing: Automated Testing, UAT, Test Case Development, API Testing, A/B Testing

EXPERIENCE (3+ YEARS)

Student Analyst

Dec 2023 - Present

University of Texas at Dallas

Richardson, TX

- Supported data validation and management of resident information databases using **SQL**, ensuring data accuracy and integrity.
- Used **Python** scripts to automate routine data cleaning tasks, reducing manual effort and improving data consistency.
- Assisted in tracking and reporting IT helpdesk requests using **JIRA** and **SQL**, analyzing ticket trends to identify recurring issues and recommend process improvements.
- Collaborated with team to create simple **data visualizations** for monthly activity reports, enhancing clarity for supervisors.

System Engineer

Mar 2022 - Apr 2023

TATA Consultancy Services

Mumbai, India

- Designed, programmed, and maintained robust application software systems using **C#** and **.NET**, collaborating on seamless integration across web and desktop platforms and **database integration** using **SQL** Server.
- Diagnosed, troubleshooted, and resolved programming and production issues in **.NET** applications, developed and executed **testing scripts** using **MSTest** and implemented code fixes that reduced recurring incidents by 30%.
- Led enhancements and modifications to existing **Windows** standalone applications, streamlining workflows and implementing automation solutions with **SQL** backend optimizations, resulting in a 25% increase in operational efficiency.
- Authored and updated comprehensive **technical documentation**, including **disaster recovery plans**, **operating procedures**, and instructional guides for effective **system maintenance** and knowledge transfer.
- Provided end-user **training** and direct **technical support** on **application features**, increasing **adoption rates** and reducing support response times.
- Translated departmental needs and user requests into clear **technical specifications**, collaborating with **cross-functional teams** to deliver new features and improvements.
- Actively participated in **on-call support** rotation for production systems, ensuring timely issue resolution and minimal disruption.

Assistant System Engineer

Jan 2021 - Mar 2022

TATA Consultancy Services

Mumbai, India

- Collaborated with **stakeholders** to gather, document, and analyze **business** and **technical requirements**, supporting development throughout the **project lifecycle** and enabling successful solution delivery.
- Developed, tested, and maintained dynamic **user interfaces** with **Web Forms Designer**, optimizing **usability** and **performance** for business processes.
- Supported integration of **C#** backend services and **RESTful APIs**, improving **system reliability** and **data flow**.
- Conducted **application performance analysis** and developed interactive **dashboards** to monitor **KPIs**, which led to a 30% reduction in load times and improved decision-making.
- Developed comprehensive **training** and **user documentation** for new software **releases**, empowering end users to quickly understand features and facilitating smoother transitions to updated **systems** with fewer support requests.
- Leveraged **Agile methodologies** to drive efficient, iterative delivery and foster a culture of continuous improvement.

EDUCATION

Master of Science, Information Technology & Management, University of Texas at Dallas

Jun 2025

Bachelor of Engineering, Electronics, University of Mumbai

Feb 2021

CERTIFICATIONS

Snowflake SnowPro **Certified**

Jun 2025
