## PROFESSIONAL EXPERIENCE

### IT Software Engineer, Senior | Health Plan of San Joaquin

Nov 2024 - Jul 2025

- Leveraged **ASP.NET (Blazor, Razor Pages, WebForms)** and **Javascript (React JS)**, alongside **CSS**, to develop **CRM web applications** for the Pharmacy, Compliance, Analytics, and ESDI teams in the healthcare industry.
- Utilized **AWS S3 API** to store and fetch member documents from **AWS Cloud Block Storage** and **On-premise SFTP data store** to create secure **RESTful APIs** accessed by providers and agents via CRM platform.
- Implemented **Secure Sign-On (SSO)** authentication by integrating an **Active Directory** server and **SP** portals with third-party applications (JIVA, QNXT), standardizing **Role-Based Access Control (RBAC)** using **Auth0**.
- Engineered **Extract Transform Load (ETL) data pipelines** and **Electronic Data Exchange (EDI) workflows** using **dbt, Python, SSIS, T-SQL** and **Azure Data Factory** streamlining data exchange for critical healthcare operations like letter generation, claim letter adjudication, defining risk groups and member management.
- Developed **SMTP email** and **MS Teams alerts** for ETL job statuses, automating operational monitoring.
- Audited workflows, tools, and documentation for architecture and compliance, then published SOPs using **Confluence, IcePanels, MS Visio**, and **MS Word** to enhance clarity and adherence.

### Software Engineer - Data | Gainwell Tech. (via PSquare Technologies)

Jul 2024 - Nov 2024

- Engineered data visualization dashboard in **ASP.NET Core (Blazor and SignalR)** and **D3.js**.
- Leveraged **SQL Server Integration Services (SSIS) ETL workflows** to integrate **SQL Stored Procedures, AWS Lambda API Web Hooks, NFS, SFTP** and **SMTP** servers to create and distribute AFS File to clients.
- Maintaining **ASP.NET** microservice endpoints on **AWS cloud** ecosystem including **AWS EC2, AWS Lambda** and **AWS Elastic Container Service (ECS)** to capture real-time customer events to **AWS Aurora SQL DB**.
- Built on-demand data analysis pipelines for time-series data using **Databricks, Python, Pandas, NumPy, SQLAlchemy** and generating KPI **MS Excel** reports using **Seaborn** and **Plotly**.

### Software Engineer | SUNY at Buffalo

Aug 2023 - Jul 2024

- Created a SLURM module for UB CCR's ColdFront platform using **Python Django, MongoDB, and Redis**.
- Integrated **OpenLDAP-based IAM** for secure authentication and authorization, deployed as **OpenStack** plugin.
- Authored **C++** programs into **Python** testing suite for testing scaling, networking, storage and logging.
- Automated **Docker** image builds and releases to **GitHub Container Registry** and **Docker Hub** via a **GitHub Actions CI/CD pipeline**, streamlining deployments.

### Software Developer | GeekWork

Jun 2021 – Nov 2021

- Established Real-Time, Event-Driven Backend for NIDO Workz ERP **Django** Web App via **Postgres SQL** Database to observe status of factory automation robots and sensors using embedded **Python** microservers.
- Designed **RESTful API** endpoints for real-time and on-demand data retrieval, integrating with **jQuery** to dynamically update user interfaces created in **Bootstrap CSS** and **HTML5**.

## EDUCATION

M.S. in Computer Science | The State University of New York at Buffalo

Jan 2022 - Jun 2023

B.E. in Computer Engineering | University of Mumbai

Aug 2017 - Jun 2021

## TECHNICAL SKILLS

.NET, C#, Blazor, Razor, SignalR, Azure, Azure Data Factory, CSS, Rest, SOAP, API, CSS, HTML, VueJS, JavaScript, jQuery, SSIS, Databricks, Docker, Elasticsearch, FastAPI, Flask, AWS, GCP, Github Actions, git, HTML, Java, Jenkins, Kubernetes, Lambda, MongoDB, NoSQL, Oracle, OpenStack, PL/SQL, T-SQL, Postgres, PyTest, Pandas, Python, S3, SNS, SQL, SQS, Selenium, Tableau, Terraform, ActiveBatch, WhereScape, Airflow, PowerBI, Snowflake, Retool, NumPy, Pandas, Plotly, EC2, JMeter, grunt
