PROFESSIONAL SUMMARY

Business Analytics graduate student with 3.5 years of experience in lean data management, business intelligence, and process optimization. Skilled in SQL, Python, and BI tools for data visualization, requirements gathering, and translating analytical data insights into actions that solve complex problems, drive strategic business decisions, and improve operational efficiency.

EDUCATION

Master Of Science, Business Analytics

August 2024 – May 2025

Arizona State University, W.P. Carey School of Business, Tempe, Arizona

GPA: 4.0/4.0

(Relevant Coursework: Machine Learning- Business, AI & Data Analytics, Business Process Analytics, Predictive Analytics)

Bachelor of Engineering, Electronics & Telecommunication Engineering

August 2016 – October 2020

University of Mumbai, A.P. Shah Institute of Technology, Mumbai, Maharashtra

GPA: 3.11/4.0

TECHNICAL SKILLS

Programming Languages: SQL (Joins, CTEs, window functions), Python, C, JCL, HTML

Databases & Cloud Platforms: MySQL, Teradata, Snowflake, Oracle, AWS (Quicksight, Sage Maker), Jupyter Notebook, Colab

Analytics & BI Tools: Tableau, Power BI, Informatica ETL, SPSS, Microsoft Office Suite, Minitab, MATLAB

Statistical & Quality Tools: Root Cause Analysis, Regression, Hypothesis Testing, Lean, Six Sigma, Control Charts, FMEA, DOE

WORK EXPERIENCE

Senior Quality Engineer

January 2021 – June 2024

LTIMindtree

Navi Mumbai, Maharashtra

- Led data-driven decision-making for an insurance client by using SQL, Tableau, and Excel for dashboard creation and KPI reporting. Collaborated with stakeholders on root cause analysis, process improvement, and reporting automation.
- Translated business requirements into process maps and collaborated with cross-functional teams to automate ETL workflows and apply data cleansing scripts, improving data integrity and reliability, reducing processing time by 30%.
- Developed BI reports using informatica and SQL to track policy performance metrics and support data-driven decisions. Delivered 95% on-time data solutions with 92% accuracy, improving transparency across teams and quality assurance.
- Automated policy validation workflows using Informatica ETL, API integration, and SOAP UI, reducing validation time by 99%, from 300 to 3 minutes for 100 policies. Validated JSON/XML responses and executed UAT, DEV, and regression testing in Agile environments to ensure functionality, compliance, defect resolution, and risk-free deployments.

Management Associate Intern

November 2020 – January 2021

Evolution Fitness Center

Thane, Maharashtra

- Led financial reporting and time tracking, improving accuracy and reducing discrepancies by 8%.
- Implemented costs and quality control measures, reducing expenses by 12% while improving service standards.
- Conducted customer segmentation analysis, identifying patterns that led to a 20% increase in upselling opportunities and customer retention.

PROJECTS

ML-Driven Fraud Detection for Staged Auto Accidents, Academic Capstone Project

December 2024 – May 2025

- Developed ML model (Logistic Regression, Gradient Boosting) to detect staged auto accident fraud at FNOL, boosting accuracy by 28%. Prioritized high-risk claims via risk segmentation, saving \$1.66M in payouts and achieving 257% ROI.

House Pricing Prediction, Academic Project

November 2024 – December 2024

- Built predictive models (Linear Regression, Decision Trees, XGBoost) to improve pricing accuracy by 12%. Analysed 80+ features using EDA, feature engineering, and hyperparameter tuning to identify key drivers and enhance forecasting.

Third Party Reports Automation, Professional Project

June 2023 – November 2023

- Designed Informatica ETL pipeline to automate report generation with SQL-driven filters, cutting delivery time from 8–16 hours to minutes and enabling real-time access for faster stakeholder business decision-making and insights.

Policy Validation Automation, Professional Project

December 2022 – May 2023

- Built automated policy validation tool using Informatica ETL and API integration, accelerated validation time by 99%. Converted manual workflows into scalable self-service automation, enabling validation of 100 policies in 3 minutes.

Certifications

- Python Bootcamp, SQL for Data Analysis, Six Sigma: Green Belt, Fortinet Information Security Awareness & Evolution of Cybersecurity Training, AWS Partner: Technical/Business/Cloud Economics, and Cisco: Introduction to IOT.
