PROFESSIONAL EXPERIENCE

EXUSIA (GLOBANT), USA | Business Consultant

May 23 – May 25

Client: Blue Cross Blue Shield Association

- Spearheaded **requirements gathering** for 3 data projects, ensuring alignment with business goals and reducing rework.
- Designed **PHI/PII data cleanup** for insurance systems, **eliminating 3.2M+ toxic records** reducing 45% downstream data defects.
- Developed **test plan strategies** for 2 projects, achieving reduction in testing cycles and 100% product verification success rate
- Partnered with **QA** and engineering teams to document and maintain **BRDs, FRDs, and runbooks** for **UAT** and release cycles.
- Authored **50+ user stories in Jira** using the INVEST method, translating business needs into clear Agile requirements.
- Performed **SQL data profiling** on new data model, identifying 20+ anomalies and ensuring reporting compliance.
- Constructed **health dashboards (Tableau)** replacing manual reports, saving 22% analyst hours, giving VPs real-time CPI/SPI.
- Facilitated **JAD** and **sprint planning sessions**, ensuring traceability from requirements to release across **Agile SDLC** lifecycle.
- Built **SQL scripts** for pre/post-transformation data checks, flagging mismatches across 10+ ETL jobs, cutting 40% data defects.
- Deployed **10+ production releases**, verifying configurations/integrations to achieve **100% first-time deployment** success.

PEEK INC, USA | Business Analyst Intern

Aug 22 – Dec 22

- Boosted customer footprint by 12% and retention by 23% through user interviews, trend analysis, and 3 product improvements.
- Developed **KPIs** to enhance **sprint planning** and **feature prioritization**, achieving a **17% decrease** in delivery timelines.
- Conducted user research and crafted **user stories** to inform **SDLC** and **MVP features**, significantly enhancing user experience.
- Managed **\$60,000 project budget**, maintaining resource allocation and documenting work breakdown structure for the project.

EXUSIA (GLOBANT), INDIA | Senior Business Analyst

Aug 21 – Jul 22

- Captured **business requirements** for telecom billing and order management systems, translating them into **50+ Jira user stories**.
- Performed data cleansing on 2M records using ETL process as part of content management, decreasing 60% data redundancy
- Redesigned **payment operations graph**, increasing transaction throughput by **90 TPS** and boosting user satisfaction by 16%.
- Collaborated cross-functionally with development, QA, and business teams to resolve complex production issues involving Ab Initio, UNIX, and **SQL-based** data pipelines.
- Utilized **predictive analytics (RFM)** to segment top customers, enabling loyalty/reward targeted marketing campaigns and improving customer retention rates through data-driven insights and reporting

HEWLETT PACKARD ENTERPRISE, INDIA | Operations Support Engineer

Sep 19 – Aug 21

- Supported deployment of network orchestration release, **saving \$350,000** by automating Ethernet over DOCSIS system.
- Reduced **incident response time** from 8 to 4 hours by creating real-time App Dynamics monitoring for billing systems.
- **Deployed 30+ product enhancements** leveraging agile methodologies by converting user feedback into feature enhancement.
- Developed **Tableau dashboard** for real-time monitoring and troubleshooting, resulting in 30% reduction in issue detection.

EDUCATION

Johns Hopkins University, MS in Engineering Management (CS), STEM alternative of MBA, USA

Aug 2022 - Dec 2023

SRM Institute of Science and Technology, B. Tech in Information Technology, India

Jul 2015 - Jun 2019
