EDUCATION

George Washington University Masters in Computer Science Relevant Coursework: Design and Analysis of Algorithms, Cloud Computing, Machine Learning, Big Data Analytics	Washington, DC May 2025
Dr. A.P.J. Abdul Kalam Technical University Bachelor of Technology in Computer Science and Engineering Relevant Coursework: Artificial Intelligence,Cyber Security,Computer Architecture,Web Development,Data Mining	India Aug 2021

SKILLS

Languages: Java, Python, TypeScript, JavaScript (ES6+), C, Apex, HTML5, CSS3, R
Full Stack Development: React,Next.js, Redux Toolkit,Tailwind CSS, Material UI,Vite, Framer Motion, Node.js, Express.js, Passport.js,JWT, OAuth 2.0, WebSockets, Caching,RAG Pipelines, LangChain, Agentic AI
Databases: PostgreSQL, MongoDB, MySQL, SQLite
Developer Tools: AWS (S3, Lambda, API Gateway, EC2, CloudFront), Vercel, Docker, Kubernetes, GitHub Actions, Jenkins, Terraform, AWS CDK, Git, GitHub, Jira, Postman, Figma

EXPERIENCE

Sherps Inc <i>Application Developer</i> • Led UI architecture for a startup Flutter app , delivering 20+ production screens with Riverpod driven state management and iOS optimized UI principles, increasing bookings by 20%. • Implemented Firebase OTP and JWT, increasing login success rate by 21% and reducing auth error rate by 32%. • Integrated Stripe PaymentSheet (Apple/Google Pay), increasing payment success rate by 15%. • Built Mapbox tracking with background location and WebSockets, improving ETA accuracy by 10%. • Launched RAG helpdesk with LangChain , deflecting 32% of tickets and reducing median resolution time by 43%.	Hillsborough, NC Oct. 2024 – Present
--	---

Pitney Bowes <i>Software Engineer Intern</i> • Streamlined React and TypeScript UI components, boosting accessibility by 23% and fixing cross-browser issues. • Designed modular Node.js and Express.js backend with API-first principles, reducing integration time by 25%. • Architected MongoDB schemas with indexing, boosting query speed by 30% and enabling scalable data storage. • Engineered RESTful APIs with Express.js ,optimizing full-stack data flow efficiency by 30% using caching and query tuning. • Optimized CI/CD workflows with jenkins , improving deployment reliability by 40% and boosting development efficiency.. • Integrated AI -powered customer support chatbot using Ollama API with custom prompt engineering , automating 60%+ of repetitive queries and reducing response time by 35%.	Noida, India June 2024 - Aug. 2024
---	---------------------------------------

Softgains Technology <i>Software Developer</i> • Designed and deployed scalable full-stack web applications using React.js, Node.js, and PostgreSQL, reducing API response times by 35% and improving page load speed by 25%. • Optimized data management across SQL , NoSQL , and distributed databases , cutting query response time by 20%. • Leveraged Next.js for server-side rendering (SSR), improving SEO rankings by 16% and page load speed by 15%. • Built real-time backend systems using Node.js , ensuring efficient data streaming and seamless user interactions. • Collaborated in Agile sprints using Jira to implement UI enhancements, boosting user engagement by 15%. • Containerized apps with Kubernetes and automated deployment by GitHub Actions , reducing manual effort by 30%. • Implemented serverless workflows with AWS Lambda and API Gateway, speeding up feature delivery by 25%.	Noida, India July 2021– July 2023
---	--------------------------------------

PROJECTS

ShopZone – E-Commerce Platform <i>React.js, Node.js, MongoDB, Redux, Stripe, Ollama AI</i> • Built comprehensive full-stack e-commerce platform with OAuth 2.0 authentication, Redux state management, Stripe payment integration, and intelligent AI chatbot reducing customer support tickets by 35%. • Implemented scalable REST APIs with MongoDB indexing strategies, testing using Jest, and a CI/CD pipeline, improving overall performance by 30%.	
Time-Aware Recommender System <i>Python, TensorFlow, PyTorch, Pandas, NumPy, Scikit-learn</i> • Implemented and customized a TimeSASRec recommendation model with temporal attention to capture hour/day patterns and cyclic time encoding on the Instacart dataset (3M+ orders), achieving an 18% Recall@10 improvement over baseline. • Adapted existing open-source pipelines, adding ablation studies, time-segment analysis, and multi-metric evaluation (NDCG@k, Hit@k) with automated checkpointing and visualizations for model insights.
