EDUCATION

George Mason University (GPA 3.83)

Master of Science, Data Analytics Engineering

Fairfax, United States

August 2023 – May 2025

Gujarat Technological University (GPA 3.28)

Bachelor of Engineering, Electronics and Communication

Ahmedabad, India

July 2019 – June 2023

TECHNICAL SUMMARY

Programming Languages: Python, SQL, R, C/C++, JavaScript, HTML/CSS, Java, C#

Frameworks: React Native, React JS, Spark, Hadoop

Skills: MS Excel, Tableau, MATLAB, Mathematics, Visualization, MS Word, PowerPoint, Machine Learning, Artificial Intelligence, Statistics, Power BI, UI/UX, Momentum

Databases: MySQL, PostgreSQL, MongoDB, Oracle, Amazon Redshift

Developer Tools: Google Colab, Jupyter, Google cloud, AWS, Azure, Confluence, Jira, CI/CD

AI and Automation Tools: SecureGPT, Agentic AI, Power Platform, MS Dynamics 365, Salesforce

Libraries: pandas, NumPy, Matplotlib, Seaborn, TensorFlow, SciKit-Learn, Beautiful Soup, spaCy

Certifications: C, C++, Cyber secure user, Google Digital Marketing, Python, SQL, Power BI, Microsoft power platform

EXPERIENCE

Data Analyst

January 2025 – May 2025

Accure, INC (Capstone project, George Mason University)

Fairfax, United States

- Created **Agentic AI** by integrating **SecureGPT** and **Momentum** to automate real-time analysis of logs, tickets, and network events, and reducing manual investigation time by 95%.
- Built dynamic dashboards using **Power BI**, used **Python** in **AWS Lambda** and **S3** to generate real-time insights, and leveraging **NLP** to convert user prompts into cybersecurity visualizations.
- Developed a **UI** using **React JS** for users to submit prompts and view **AI-generated dashboards**.

Microsoft Dynamics CRM

June 2024 – April 2025

Vivid Soft Global, INC

Remote (United States)

- Automated the daily comparison of fraudulent checks by extracting data from **Oracle** database and internal systems, reducing manual effort by 95% using **ETL pipelines**, **Dynamics 365**, **Power Automate**, **Salesforce CRM**, **python**, **SQL**, **MS Excel** for data preparation, and **CI/CD** for seamless deployment.
- Automated internal transfer verification using **Robotic Process Automation** and **API** integration in **Power Automate** with **JSON**, **XML** to filter data to create auto-generated reports, reducing manual effort by 90%.

Graduate Teaching Assistant

August 2024 – December 2024

George Mason University

Fairfax, United States

- Graded assignments, exams, and provided feedback to 50+ students for Health data challenge course.
- Answered topics related to **R programming**, **data security**, privacy, interoperability, and **big data**.

Data Analyst Intern

February 2023 – July 2023

Cygnat Infotech Pvt. Ltd

Ahmedabad, India

- Leveraged **Python**, **pandas**, **NumPy** for data gathering, cleaning, preprocessing, and organized data from 500k+ digital devices for **in-depth analysis**, and managed **ETL data operations** using **Spark** and **SQL**.
- Prepared insightful visualization using **Tableau**, and **Power BI**, and created **Redshift-based** dashboards.
- Developed **NLP** models using **Machine Learning** techniques to extract valuable insights from data.

Mobile App Developer Intern

June 2022 – July 2022

SoHo Dragon Ind. Pvt. Ltd.

Ahmedabad, India

- Designed the **front-end** of a **Reminder Mobile APP** using **React Native**.
- Implemented **REST API calls** to retrieve and display data for end-users, ensuring a seamless and superior **User Experience (UX)** design that enhanced user interactions by 80%.

PROJECTS

AI generated content detection

- Built an ML pipeline using NLP techniques to classify AI vs. human text.
- Trained ML models to identify features like lexical diversity, POS sequences, and TF-IDF scores.

Risk-Based Bridge Maintenance Prioritization

- Built ML models using Random Forest, GBT, and Linear regression to predict high-risk bridges.
