

Siddharth Thakkar

sid2011thakkar@gmail.com — +1 (857) 832-1306 — siddharththakkar.xyz

EDUCATION

M.S. Computer Information Systems — Boston University — Boston, MA Sept 2023 – Jan 2025

Relevant Coursework: CS520 Information Structures with Java, CS602 Server-Side Development, CS601 Web Application Development, CS669 Database Design and Implementation for Business, CS683 Mobile Application Development.

B.Tech. Electronics Engineering — K.J. Somaiya College of Engineering — Mumbai, India Aug 2019 – June 2023

Relevant Coursework: Programming in C, Data Structures, Mobile Application Development, Python, Cloud Computing.

EXPERIENCE

Data Analyst — MyMedGlobal — Remote, U.S. Mar 2025 – Aug 2025

- Managed Microsoft 365 user accounts, license assignments, and support enterprise collaboration.
- Processed and analyzed large healthcare datasets with Python to improve data accuracy and accessibility across teams.
- Designed interactive Power BI dashboards to deliver insights and improve resource allocation efficiency by 25%.

Full Stack Developer Intern — K.J. Somaiya College of Engineering — Mumbai, India Aug 2022 – Mar 2023

- Built and deployed React.js web application with contact form interface for user submissions and backend integration.
- Developed custom Express.js RESTful API endpoints to handle secure data flow between frontend and MongoDB database.
- Optimized database queries and performance tuning to enhance application responsiveness as database grew.

Software Engineering Intern — AasPaas Infotech — Remote, India Jan 2022 – Jun 2022

- Built React.js trip planning platform with intuitive interface and seamless travel planning functionality for end users.
- Integrated Google Places API and third-party services to deliver customized location-based travel recommendations to users.
- Developed RESTful APIs connected to MongoDB and optimized routing to reduce requests and improve performance.

PROJECTS

Conv — Next.js, TypeScript, NextAuth, Prisma, PostgreSQL, OAuth 2.0, Docker Jul 2025 – Aug 2025

- Built playlist converter in Next.js enabling Spotify–YouTube transfers with 90%+ accuracy using fuzzy matching.
- Implemented OAuth 2.0 authentication with Spotify and YouTube APIs, managing token refresh and strict API rate limits.
- Designed dual workflows combining URL conversions with secure authenticated dashboards for private playlist management.
- GitHub:** github.com/woustachemax/conv **Live:** conv-olive.vercel.app

Episteme – AI Wikipedia Alternative — Next.js, Express.js, Python, OpenAI API, PostgreSQL Jul 2025

- Built AI-driven platform in Next.js and Express.js generating Wikipedia-style articles using GPT-4 and automated pipelines.
- Implemented hybrid authentication with OAuth and credentials, adding role-based access and adaptive request throttling.
- Developed Python microservices for fact-checking and automated source analysis integrated with PostgreSQL.
- GitHub:** github.com/woustachemax/episteme **Live:** episteme-indol.vercel.app

Sinkronize — Next.js, Express.js, PostgreSQL, Prisma, Tailwind CSS, Socket.io Mar 2025 – Apr 2025

- Built project management platform in Next.js supporting 50+ concurrent users with real-time boards, chat, and updates.
- Implemented Socket.io WebSocket infrastructure enabling collaborative interactions and instant communication.
- Developed Express.js backend with Prisma ORM, PostgreSQL, and bcrypt authentication ensuring secure data protection.
- GitHub:** github.com/woustachemax/sinkronize

SKILLS

- Languages/Databases:** Java, Python, JavaScript (ES6+), TypeScript, SQL, PostgreSQL, MongoDB, SQL Server
- Frameworks & Libraries:** React, React Native, Next.js, Express.js, Spring Boot, Prisma ORM, Tailwind CSS, Socket.io
- Systems & Cloud:** Data Structures & Algorithms, AWS (EC2), Docker, Linux/Unix, Microservices, Appwrite
- Web & APIs:** RESTful APIs, Authentication, JSON/XML, API Integration
- Data & Tools:** Power BI, Microsoft 365 Admin, Git, Jira, Agile/Scrum, CI/CD (GitHub Actions), Unit Testing
